

Habitat Work Group Update

The CCC's Habitat Work group (HWG) met via conference call on January 25, April 20, and July 21 of 2021 to set priorities, discuss current issues, and share lessons learned. In addition, we formed an offshore wind subgroup which took the lead on a presentation at the May 2021 CCC meeting. That subgroup was more or less subsumed by the CCC's Area-Based Management Subcommittee, formed at the May CCC meeting. The HWG's next conference call is scheduled for October 27, 2021, and could be made available for specific tasks assigned by the CCC.
