- Implement management changes to address climate vulnerability or improve climate resiliency of fisheries, including those that are important to underserved communities;
- Implement measures that increase responsiveness of allocations or other management measures to climate impacts;
- Develop and advance climate-related fisheries management planning and implementation efforts in support of underserved communities.

For Feedback: Criteria

 - Rather than funding single activities (e.g., a workshop), it is preferable to bundle related activities under one comprehensive proposal.
 - Actions must be completely implemented or in the final phases of approval by 2027.
 - Actions using IRA funds must be able to be sustained with no additional post-IRA funds.
