

# Next Steps to Implement new NEPA Regulations: Update for Council Coordination Committee

September, 2020

# Status Update from NOAA NEPA Coordinator

## NOAA/CEQ implementation process:

- Prepared Interim Guidance to address immediate questions of implementation
- Preparing additional guidance on interpretation and implementation of key provisions of new regulations
- Evaluating all NOAA internal policies and procedures for consistency with new regulations to identify necessary changes
- In cooperation with all NOAA line offices and in consultation with CEQ, drafting any proposed revisions
- Within one year of effective date, publish proposed revisions

# Status Update from NMFS NEPA Coordinator: Near Term Compliance

NMFS is working to:

- develop interim NMFS guidance for MSA actions; and
- request interim waivers for MSA actions relative to page and time limits.

# Status Update from NMFS NEPA Coordinator: Long-term Plan

For the longer term, we are proposing to establish a process to develop a proposed rule by Sept 14, 2021 to address required changes to the MSA NEPA process.

- NMFS will form internal working group
- How would the CCC like to engage? Form own sub-group on topic?
- Given potential FACA issues, approaches such as use of a workshop may need to be used

# Proposed Timeline to Sept. 2021

Kick-Off	Planning		Workshop		Concept Development				Writing		Clearance	Submit to CEQ
Sept. 2020	Oct.	Nov.	Dec.	Jan. 2021	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.
