COUNCIL COORDINATION COMMITTEE MEETING

+ + + + +

THURSDAY OCTOBER 12, 2023

+ + + + +

The NOAA Council Coordination Committee met at the Hilton Arlington National Landing, 2399 Richmond Highway, Arlington, Virginia, at 9:00 a.m. EDT, Kevin Anson, Chair, Gulf of Mexico Council, presiding.

PRESENT

GULF OF MEXICO COUNCIL: KEVIN ANSON, Chair J.D. DUGAS, Vice Chair CARRIE SIMMONS, Executive Director

NEW ENGLAND COUNCIL: ERIC REID, Chair RICK BELLAVANCE, Vice Chair CATE O'KEEFE, Executive Director

MID-ATLANTIC COUNCIL: WES TOWNSEND, Chair MIKE LUISI, Vice Chair CHRIS MOORE, Executive Director SOUTH ATLANTIC COUNCIL: CAROLYN BELCHER, Chair TRISH MURPHEY, Vice Chair JOHN CARMICHAEL, Executive Director

CARIBBEAN COUNCIL: CARLOS FARCHETTE, Chair VANESSA RAMIREZ, Vice Chair MIGUEL ROLON, Executive Director WESTERN PACIFIC COUNCIL: WILLIAM SWORD, Chair KITTY SIMONDS, Executive Director PACIFIC COUNCIL: BRAD PETTINGER, Chair PETER HASSEMER, Vice Chair MERRICK BURDEN, Executive Director

NORTH PACIFIC COUNCIL: ANGEL DROBNICA, Chair BILL TWEIT, Vice Chair DAVID WITHERELL, Executive Director ALSO PRESENT: JOHN ARMOR, Director, Office of National Marine Sanctuaries MICHELLE BACHMAN, Subcommittee Member, New England Fishery Management Council MATTHEW BROOKHART, Eastern Regional Director, Office of National Marine Sanctuaries JANET COIT, Assistant Administrator, NOAA Fisheries ALEXXA COLE, Director, Office of International Affairs, Trade, and Commerce KELLY DENIT, Director, Office of Sustainable Fisheries TANYA DOBRZYNSKI, Division Chief, Office of Protected Resources LEEANN HOGAN, Regional Operations Coordinator, Office of National Marine Sanctuaries LISA HOLLENSEAD, Fishery Biologist, Gulf of Mexico Council EVAN HOWELL, Director, Office of Science and Technology

ADAM ISSENBERG, Assistant General Counsel for Fisheries, NOAA Office of General Counsel

JON KURLAND, Regional Administrator, Alaska Regional Fishery Office JESSICA KONDEL, Director of Policy, Office of National Marine Sanctuaries SARAH MALLOY, Acting Regional Administrator, Pacific Islands Regional Fishery Office EMILY MENASHES, Deputy Assistant Administrator for Operations, NOAA Fisheries EMILY MUEHLSTEIN, Public Information Officer, Gulf of Mexico Council DAN NAMUR, Director of Financial Assistance, National Marine Fishery Service BRIAN PAWLAK, Chief Financial Officer, & OMB Director, NOAA Fisheries MICHAEL PENTONY, Regional Administrator, Greater Atlantic Regional Fishery Office SAM RAUCH, Deputy Assistant Administrator for Regulatory Programs, NOAA Fisheries KATHERINE RENSHAW, Section Chief, NOAA Office of General Counsel RYAN RINDONE, Lead Fishery Biologist, Gulf of Mexico Council ANDY STRELCHECK, Regional Administrator, Southeast Regional Fishery Office JENNI WALLACE, Sustainable Fisheries CISCO WERNER, Director of Scientific Programs and Chief Science Advisor, NOAA Fisheries DAVID WHALEY, Independent Consultant

1	P-R-O-C-E-E-D-I-N-G-S
2	(9:08 a.m.)
3	MR. ANSON: I'd like to reconvene the
4	CCC meeting for Day 2. A couple of
5	housekeeping issues before we get into the
6	first agenda item.
7	And as we have a couple of members
8	who weren't present yesterday, I'd just like
9	for them to introduce themselves.
10	MR. TWEIT: Good morning, everybody.
11	Apologize for missing yesterday. We ended up
12	being as I think everybody knows, we ended up
13	being the Council that got to butt up right
14	against CCC.
15	I'm happy to be here today though.
16	I'm Bill Tweit. I am Vice Chair of the North
17	Pacific Council.
18	MS. DROBNICA: Thank you. Angel
19	Drobnica. I'm the newly elected Chair for the
20	North Pacific Council. Happy to be here.
21	Little jet lagged, but it's I look forward
22	to meeting everyone. Thanks.

(202) 234-4433

Neal R. Gross and Co., Inc. Washington DC

1	MR. ANSON: Thank you and welcome.
2	So the other item that I'd like to discuss
3	before we get started is a little bit of a
4	scheduling issue. Yesterday I had mentioned
5	about moving one of the topics, the ESA
б	discussion for tomorrow to 4:30 p.m. to 5:15
7	p.m.
8	But we'd like to, I'd like to move
9	that instead to 1:30 p.m. today. So the ESA
10	integration policy update, I'd like to move to
11	1:30 p.m. and then there's a little bit of time
12	left over in that 1:30 p.m. to 3:00 p.m. time
13	slot if everything goes as planned.
14	So we'll just kind of follow up with
15	some subcommittee reports to fill in that time.
16	And then maintain the schedule except for 4:30
17	p.m. We need to move that topic to tomorrow at
18	9 o'clock.
19	So we'll fill in, put in the ESA at
20	1:30 p.m., continue with subcommittee reports
21	through that time slot, and then pick up
22	subcommittee reports at 4:30 p.m. to 5:15 p.m.

7

at that time.

1

2	So we need to be a little flexible.
3	So thank you for that. Otherwise, we'll go
4	ahead and get started with today, day two's
5	agenda.
6	And the first agenda item is NOAA
7	Fisheries policy regarding Governance MSA
8	304(f). It will be led by Ms. Denit.
9	MS. DENIT: Great, thank you, Chair.
10	Good morning, everyone. Welcome to your
11	morning of the Kelly Denit show. I am looking
12	forward to all of our conversations this
13	morning and welcome to Bill and Angel.
14	Great, glad you all made it. And so
15	let's just jump right in. And thank you,
16	Chair, for the little grace there as I was
17	maneuvering my car through the parking garage
18	below the hotel so we could start a couple of
19	minutes late.
20	So we're here this morning first off
21	to discuss our draft procedural directive on
22	MSA Section 304(f) which has to deal, which

1 deals with fisheries that cross multiple 2 council jurisdictions. 3 We presented this to you all at the last two CCC meetings so I'm not going to go 4 5 back through the policy. Instead, I'm just going to step through a guick timeline here and 6 then leave the bulk of the time for the 7 discussion. 8 9 So we actually started these 10 conversations over a year ago back in May of 11 2022, but we first presented the outline of the 12 policy back in October. We had the East Coast 13 Scenario Planning Workshop that concluded 14 earlier this year. 15 We provided a draft proposed policy 16 in the spring of 2023 in large part based on 17 the feedback from the CCC in the fall of 2022 18 that you wanted us to make sure and take into 19 account the outcomes of that East Coast 20 Scenario Planning Workshop. 21 We presented that back in Key West 22 and have a comment period that is still open

Neal R. Gross and Co., Inc. Washington DC

for everyone to provide input. We will have this discussion today. Welcome any additional feedback.

I know there's a letter that you all have provided to us and as we note on here, the comment period is open until November 17th for any additional input beyond the joint letter that you've already submitted.

9 And our intent is to finalize and 10 roll out the policy by next summer of 2024. So 11 just a quick run through of what's happened 12 since May.

We presented to the New England Council who asked to come and do so. And we also conducted a public webinar on that same day. And at this point, we're awaiting any additional input that the Councils have with regard to this particular policy.

And that's it, Chair. Happy to hear additional feedback that folks have and go from there or answer any questions.

6

7

8

MR. ANSON: Thank you. Are there any

1	questions? Anybody have Chris?
2	MR. MOORE: Thank you, Mr. Chair. I
3	have comments.
4	MR. ANSON: Go right ahead.
5	MR. MOORE: And silly questions.
6	MR. ANSON: Okay, comments,
7	questions, yes. You ready?
8	MR. MOORE: Thank you. Thanks, Mr.
9	Chair. Thanks, Kelly, for the overview and
10	presentation. You might expect given our
11	interactions over the last 18 months or so I
12	have another comment so I'd like to make this
13	morning for consideration by the CCC.
14	I think you know that this has been
15	somewhat difficult for us because we know the
16	folks that drafted the document. We like the
17	folks, those folks, but we don't like this
18	directive.
19	And although my comments are
20	critical, I offer them hoping that you find
21	them constructive. So I think you know that
22	the Mid-Atlantic Council Review developed

comments on the procedural directive at our August meeting.

3 At that meeting, the Council 4 considered input from our SSC as well, which 5 had reviewed the draft in July. The, both the Council and the SSC outlined a number of 6 7 concerns with the draft policy including 8 concerns related to the proposed process and criteria for review as well as the potential 9 10 implications for the Northeast Region.

I think you may know that we're holding a public webinar on October 16th from 2:00 p.m. to 4:00 p.m. to gather comments from stakeholders. We're doing that because of our concerns related to the lack of public outreach and lack of opportunity for public comment during the development of the policy.

18 In addition, we're opening a comment 19 forum on our website and we'll be compiling 20 comments received there to submit to NMFS prior 21 to your November 17th deadline.

22

1

2

In addition to the seven pages of

1 comments from our SSC and our four-page CCC 2 letter, I have a few general comments that I 3 would like to make today. We'll have additional concerns that 4 we'll include in the Mid-Atlantic's letter to 5 the Service that we're currently preparing for 6 submission by the deadline. 7 8 First, in terms of the proposed

9 process and its implications, the draft policy 10 treats changes and counsel management authority 11 responsibility as a first course of action for 12 addressing governance issues associated with 13 shifting stock distributions.

We think revisions to the management, we think any revisions that management authority should be considered as a last resort.

And other approaches have been deemed inadequate. We think that the draft policy undermines the efforts of the recently completed East Coast climate change scenario planning initiative.

1	We think that NOAA fisheries should
2	be investing resources and helping those
3	actions succeed instead of taking a
4	prescriptive approach to the application
5	Section 304(f).
6	I think you understand that
7	transferring management responsibility between
8	Councils or transitioning to joint management
9	would be a complex and disruptive process.
10	Procedural directives should be more
11	explicit as it considers the cost, challenges
12	and timeframes associated with the various
13	designation options.
14	The directive is intended to
15	establish a more transparent and orderly
16	process for fisheries management. However, in
17	its current form, the policy is missing key
18	details leaving a lot of room for inconsistent
19	and unpredictable application which we think
20	will create more confusion than clarity.
21	The SSC in their meeting indicated
22	that it's not clear how this document fits into

NMFS's policy directive system. The draft procedural directive appears to be a set of instructions without a clear link to an underlying policy making it very difficult to evaluate how well the draft or active vote achieve its objectives.

7 We think that as written, the draft 8 policy could lead to a near constant review for 9 some species creating the possibility of 10 frequent changes in management authority.

11 The Agency and Council Staff, time 12 and resources required to conduct such frequent 13 reviews would be considerable and divert 14 resources from other critical projects, some of 15 which we've talked about this week, initiatives to increase the climate resilience of our 16 fisheries and the adaptive capacity of the 17 18 Councils to deal with change.

In terms of the review criteria
proposed in the directive that trigger changes
and management responsibility, we think they
are potentially problematic, unclear and

Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

5

unrelying intent.

1

2	For example, the directive relies
3	heavily on commercial revenue and recreational
4	fishing effort estimates, both of which are
5	compounded by many other factors not
6	necessarily good indicators of stock
7	distribution or catch location, excuse me.
8	The draft policy also does not
9	acknowledge the complexities of evaluating
10	changes in stock distribution. The proposed
11	process could create demands for data and
12	analyses that in many cases could not be
13	supported.
14	As noted by our SSC, there are many
15	ways to consider changes in stock distribution
16	and additional research is needed on
17	appropriate methods including how to
18	distinguish short-term from long-term trends
19	and how to reconcile the virgin trends and
20	various indicators to reduce instances of
21	conflicting interpretations of distribution
22	change results.

1	We think that national standard six
2	already requires fishery management plants to
3	be flexible enough to account for variations
4	and contingencies including climatic
5	conditions. Transitioning from single counsel
6	to joint counsel management based on this draft
7	which is a likely outcome for a number of Mid-
8	Atlantic and New England fisheries would
9	generally make the management regime less
10	flexible and efficient.
11	The fact that NMFS acknowledged that,
12	this fact and this recent disapproval of the
13	Council's recommendation to add Black Sea Bass
14	allocations to the Council's FFP.
15	As we stated in our letter, we are
16	disappointed in the lack of public involvement
17	in both the development of the directive and
18	the process that it proposes.
19	Transparency and public participation
20	are fundamental aspects of fisheries management
21	process under Magnuson and the stakeholders
22	should be given meaningful opportunities to

16

provide comments whenever major changes are being considered.

3 Finally, many of the problems with the document that could have been avoided if 4 the Councils had been consulted in a more 5 meaningful way. The unilateral process used by 6 7 NOAA fisheries to develop the directive is a missed opportunity to work collaboratively with 8 the Councils to address climate-related 9 10 governance challenges. 11 With that, having said all that, Mr. Chair, I have a motion when you're ready for 12 13 CCC consideration. Thank you. 14 MR. ANSON: I would say go ahead with 15 your motion. 16 MR. MOORE: Put that up, Morgan. Oh, 17 there it is. So I, this is the motion the CCC 18 agrees with the need for transparency and for 19 thinking in our collective efforts to address 20 climate related governance issues. 21 However, as described in the joint 22 CCC letter, a draft climate governance policy

> Neal R. Gross and Co., Inc. Washington DC

1

1 developed by NOAA fisheries has a number of serious flaws that need to be addressed before 2 3 any guidance is finalized and implemented. Therefore, I move to recommend that 4 5 NOAA fisheries engage the Councils and the CCC to develop a revised version of the policy 6 directive to effectively address cross-7 8 jurisdictional fisheries governance issues. 9 Okay, we have a motion on MR. ANSON: 10 the Board. Is there a second to the motion? 11 MR. CARMICHAEL: Second. 12 MR. ANSON: Seconded by John. Any 13 discussion on the motion? I'd say no 14 discussion and is there any opposition to the Seeing none, the motion carries. 15 motion? 16 MR. MOORE: Thank you, Mr. Chair. 17 MR. ANSON: Is there any other 18 discussion under this agenda item? Seeing 19 none, that will take us to our next item and 20 IRA Climate Ready Fisheries Council Funding 21 Priorities in Process. Ms. Denit? 22 Okay, great. MS. DENIT: I, oh

1 I am going to do my best to describe sorry. 2 the process that we are envisioning to make 3 sure that we're all on the same page in 4 understanding how we're intending for this to 5 function. And then I will gladly answer 6 7 questions and then transition over to the 8 template that I shared for the specific project 9 proposals. 10 So I've been trying to come with an 11 appropriate visualization to help describe this 12 process because I understand that it's 13 confusing. 14 And in part, that is because we are 15 trying to be responsive to the concerns that 16 you all have expressed with regard to the 17 administrative burden on the Councils in order 18 to access the funds with the processes that we 19 need to adhere to in order to execute the 20 funds. 21 So I'm not saying that the balance is 22 exactly right in what we are proposing here,

1	but that is the intent to try and find that
2	right balance.
3	So as we discussed back in July, our
4	intent is to provide a request for applications
5	for grants which would be noncompetitive to the
6	Councils.
7	As we discussed and you all provided
8	feedback back in July, our intent is to provide
9	an initial amount of funding that is an equal
10	division of the \$3 million that we had
11	discussed back in July.
12	Now, this is where I'm going to ask
13	you to form a picture in your mind. So we are
14	working to set up a process that is essentially
15	an umbrella. Okay?
16	This initial grant that you will
17	apply for will be that umbrella. And it will
18	be the mechanism through which we can add
19	additional funds to that initial, was \$375k
20	approximately to each Council, once it's
21	approved that we would be able to add the
22	funding to that.

1 The purpose of the project proposals 2 is then you would submit one package to NMFS 3 and then we would be in a position for those projects that we approve to add that to the 4 5 grant, provide the funding to you. So that Step 1, is that initial 6 7 umbrella which is the full grant. Step 2 and 3 would be underneath that umbrella and would be 8 9 the more iterative process through which we 10 would develop the specific projects that you 11 all would be submitting and we would be 12 funding. 13 So now I'm going to step through each 14 of the steps. Now that you have that beautiful 15 picture in your head, okay, so request for 16 applications post. Hopefully that will be 17 later this month. 18 You will submit a grant package to us 19 that provides how you would spend that \$375k 20 and you will need to include some additional 21 broad descriptions around the kinds of other 22 projects that you might submit.

1 We will run the project proposal 2 process, Step 2. And we're going to talk about 3 that template here in a second. That would be the place where you will flush out in a little 4 5 bit more detail the kinds of projects that you are envisioning for your respective Council. 6 7 And we'll talk through the priorities 8 here in just a second too that are kind of the 9 sandbox in which to operate for those project 10 proposals. You'll submit those project 11 proposals to NMFS, we'll conduct a review for those projects that we fund. 12 13 We will likely have a little bit of a 14 back and forth as we need to refine any of the 15 information that came in the proposal. And 16 then as I mentioned, the intent is we would be 17 able to then take that project proposal, add it to the grant, and provide the funds to the 18 19 Council without an additional submission or 20 separate submission from the Council. 21 That would be our process here in 22 FY24 and then we would run that same process

1	again in FY25. To the extent that there are
2	any funds remaining of the \$20 million that's
3	available total, then we would potentially run
4	the process again in '26.
5	But we'll see what kind of proposals
6	you all provide in terms of the amount of
7	funding that gets spent. I'm going to pause
8	right there and then I'm happy to answer
9	questions and then I have a team of grant
10	experts behind me to help me should I get off
11	the rails.
12	And if you see any of them cringing,
13	you'll know that I'm getting off the rails. So
14	let me pause there before I go into the
15	priorities and then go into the template and
16	I'll do my best to answer questions.
17	MR. ANSON: Any questions? Bill.
18	MR. TWEIT: Thanks, Mr. Chair.
19	Thanks, Kelly. So there's what's news to me
20	I think here and maybe I just wake up later
21	than everybody else in the room, but is that it
22	sounds like the, after the initial part, we're

1 going to have to instead of being able to plan 2 for three years and have essentially a three-3 year project in mind that goes all the way through '26, it sounds like each year we're 4 5 going to have to resubmit. And there may or may not be funds 6 7 left in '26 for us to implement a three-year 8 plan. 9 Thank you for that great MS. DENIT: 10 question, Bill. No. You can submit a proposal 11 in FY24 that is a three-year proposal. Here's 12 what we plan to do for the next three years. 13 And if that's funded, off you go. In 14 terms of and this is where we're getting into a 15 little bit of the weeds and people I know are 16 going to start glazing over, but in terms of 17 our access to the funds, we don't necessarily -- I can't just give you \$17 million. 18 Right? 19 I have an internal Government process 20 that I have to go through. So it might be that 21 you give me a three-year proposal and I'm 22 making the numbers up.

1	Let's say it's for a million dollars,
2	I say I'm going to give you that full million
3	dollars, but in year one, I can only give you
4	\$500k. In year two, I can only give you \$200k
5	and in your three, I'm going to give you the
6	final \$300k.
7	So you would know you're getting that
8	full amount and we would go back and forth on
9	how we could divvy that out so yes. You can
10	submit multi-year proposals.
11	What I am anticipating and what I
12	heard from you all, which maybe I
13	misunderstood, was that you felt like you were
14	going to have some projects that you were ready
15	to submit proposals for now and there might be
16	some others that you needed a little bit more
17	time to think about what you want to put in.
18	And so it's possible that that's why
19	I was envisioning we would need to run it again
20	in '25. If we don't and the Councils all
21	submit proposals that the agency agrees that we
22	can fund, then we may not have to run the

process again.

2	But I was anticipating that would not
3	be the case based on the feedback that I heard
4	at our previous conversation. Thank you for
5	reminding me to clarify about the multi-year
6	proposal part.
7	MR. ANSON: Chris, followed by Cate.
8	MR. MOORE: Thank you, Mr. Chair.
9	Kelly, thanks again for the presentation.
10	Thanks, NOAA Fisheries for increasing that
11	initial chunk from \$2 million to \$3 million.
12	I'm still uncertain about the
13	timeline so for the \$375, you know. I'm
14	starting to figure out the rest of it, but the
15	\$375, could you go over that again because I'm
16	not, it's not clear to me.
17	MS. DENIT: That's because it's not
18	clear to me either, Chris so.
19	MR. MOORE: That explains everything.
20	MS. DENIT: Yes. Our vision is that
21	will be, that the RFA will post by the end of
22	this month for the Councils to apply for the

\$375k.

1

2	And then ideally, you will receive
3	that money in Q1 of FY24 so you would have that
4	money by the end of the calendar year. I'm
5	waiting for the tomatoes to get thrown at me
6	from my grant people behind if I got that
7	wrong, but that would be our ideal scenario.
8	Then we would run the project
9	proposal process. You would get a second slug
10	of FY24 funds that would be for the projects
11	that we have determined to fund based on the
12	project proposal. So you would get two slugs
13	of funds in FY24.
14	MR. ANSON: Follow up?
15	MR. MOORE: Yes, just a quick follow
16	up. So there's some uncertainty there. And
17	scenario two, if I'm reading between the lines,
18	might be that you bundle up the \$375 with the
19	rest of the other junk.
20	MS. DENIT: That's why you get paid
21	the big bucks, Chris Moore.
22	MR. MOORE: Exactly. So is that what
	Neal R. Gross and Co., Inc.

1	you guys, is that a potential then? I mean, so
2	I'm just
3	MS. DENIT: That would be, that would
4	be a backup plan. If we have challenges in
5	getting the RFA posted or it continues to be
6	delayed, then yes, we would do likely one slug
7	of funds to the Councils that would include the
8	\$375 and it would likely be early calendar year
9	2024.
10	MR. MOORE: Thank you.
11	MR. ANSON: Cate?
12	DR. O'KEEFE: Thank you. Thanks,
13	Kelly. It's a similar question to Chris's.
14	When the RFA is posted, is there not a 60-day
15	open period for submitting applications in the
16	Federal grants process?
17	So that would bring us to the end of
18	the calendar year with just the proposal, the
19	RFA being an open period or is there plans for
20	a different open amount of time that's
21	different than typical Federal grant openings?
22	MS. DENIT: I'm phoning a friend.

1	(Off-microphone comments.)
2	MS. DENIT: I have no idea.
3	MR. NAMUR: Okay.
4	MS. DENIT: Yes. Come on up.
5	MR. NAMUR: Good morning, everybody.
б	Dan Namur, Director of Financial Assistance at
7	the National Marine Fishery Service. I'm
8	underneath Brian Pawlak.
9	The question was whether or not the
10	RFA would be open for 60 days. That's the
11	standard for competitive processes, but because
12	this is non-competitive, we can leave it open
13	as long as needed.
14	So we will make sure that it stays
15	open throughout the duration so that you guys
16	don't have the closing on you.
17	MR. ANSON: Eric?
18	MR. REID: Yes. Thank you, Mr.
19	Chair. So I still have the umbrella in my
20	head, but my umbrella is like inside out
21	because it's blowing about a hundred miles an
22	hour and pouring rain.

1	So I'm a little bit confused. I
2	mean, yesterday we heard that the \$375 was
3	going to be available very shortly. Now it's
4	not going to be available relatively shortly.
5	And, you know, to me the \$17 million
6	over and above, is we're competing with each
7	other. So it is a competitive process. I
8	mean, that's the way I see it.
9	So I don't know if that's, you going
10	to waive the 60 days, but I'm unsure about
11	that. But the review process itself is a
12	little concerning to me.
13	You know, in the template it says
14	there's going to be three reviewers. And does
15	that mean three people are going to review all
16	the proposals from the eight Councils or is
17	there going to be three separate teams or eight
18	separate teams?
19	So maybe you could explain to me all
20	the steps because you're going to have a review
21	process for the competitive grants, and then
22	it's going to have to go through several other

1	steps, I'm sure, including probably General
2	Counsel and everything else.
3	So can you explain to me what the
4	review process is from start to finish and what
5	that timeline actually is going to be. Thank
6	you.
7	MS. DENIT: Yes, thanks Eric. And
8	I'm sorry that you're having a Mary Poppins
9	moment with your umbrella there. So two parts.
10	The actual grant for the RFA will have a review
11	process that includes three reviewers,
12	individuals.
13	That will be approved, can be done
14	quickly. Typically we have that done within 90
15	days and then we would, that would put in place
16	that umbrella and that would include the \$375.
17	Separate, but underneath that
18	umbrella is then the project proposal. You
19	would submit that to me. We will run a review
20	process that will include the regional offices
21	science centers and headquarters offices.
22	Each proposal would be reviewed by

1 three people. We have not determined the 2 specifics of who those three people would be or 3 if we would do teams. But it would be three separate 4 reviewers would review each proposal. I don't 5 envision any need whatsoever for General 6 7 Counsel review of proposals, but I don't know 8 what you all have in mind for your projects. But I don't envision that would need 9 10 to be part of the process. Once those 11 technical reviewers complete their review, the 12 Agency would look at how all of the projects 13 fell out. 14 As you saw in the bottom of that 15 template, we spell out there are certain things 16 that we intend to prioritize which we've been 17 very transparent about which is the alignment 18 with the priorities, the cross-counsel 19 collaborations where that's relevant and 20 geographic distribution of the funding. 21 So once we have those reviews, then 22 we will look at the full package, we will make

1 decisions about which proposals get funded, we 2 will communicate that to you all. 3 Those proposals would then, we would take that paperwork essentially and use that to 4 5 provide the funds via the grant that already exists. So there's not a separate grant. 6 7 It's essentially we've created a 8 process where there's one grant and we will 9 have the ability to add funds to that grant as 10 we move through the process. 11 MR. REID: All right, so now I have a beach umbrella that's inside out so we went 12 13 from having the money very shortly to maybe a 14 60-day review, but that's not in play, but now 15 there's a 90-day review so. 16 And the interesting part is the geographic distribution of funds. I mean, to 17 18 me it only gets more complicated for me. I'm 19 not a grant person. You know, I just look at 20 the numbers. 21 And to me the easiest thing is eight, 22 \$17 million divided by eight. Give all the

1 Councils an equal amount of money and this 2 entire complicated process goes away. And I 3 don't know why we don't do that. I mean that's fair and equitable to 4 5 me and it's a hell of a lot less complicated and much faster so I really wish you would 6 7 consider \$17 million divided by eight instead 8 of this process. Thank you. 9 MS. DENIT: Yes, I appreciate that, 10 Eric. And you all raised that in our 11 conversation back in July and again, I'll come back to that. 12 13 The Agency wants the opportunity to 14 review the project proposals because we are 15 going to be in the position of having to use 16 our resources to support that and that we don't 17 have additional funds coming to the regional 18 offices in order to do that. 19 So we need to ensure that what is 20 coming through from the Councils on our end 21 we're going to be able to provide the resources 22 that balance that and I appreciate that we

1	might just agree to disagree on how to divide
2	that \$17 million.
3	But that's part of the rationale.
4	And I'm sorry I just started going back and
5	forth on you, Chair.
6	MR. ANSON: That's okay saves my
7	voice. John Carmichael followed by Dave
8	Witherell.
9	MR. CARMICHAEL: All right, thanks,
10	Kevin. So just, Kelly, back to Step 1. I
11	think I understand where we're headed with
12	this.
13	Just really to try and understand the
14	timing because you said the basically the
15	intent was to have Step 1 wrapped up, the
16	disbursement, by quarter one, FY2024. Okay, so
17	yes, so that's right which is what we're in so
18	I guess I'm trying to figure out the timing.
19	The RFA goes out the end of this
20	month. If that had 30 days for us to get
21	things submitted, then that would be the end of
22	November and then you guys would have to have

like 29 days to do your review, not 30, not 60, not 90 to actually get that money out by December 31st.

But then, you know, not the first time dealing with logistics like this, we're coming to the end of the year, you've got holidays that always impact everything.

8 You know, people go on leave in 9 grants offices and everywhere else and people 10 that would be reviewers as the end of the year 11 rolls around so that's a potential challenge 12 which makes me think getting this actually 13 wrapped up by quarter one FY2024 would really 14 be a stretch.

15 And then on top of that, we have 16 impending Government closures which I know 17 totally out of your hands, but I'm sure if that 18 should go down, then all of these best-laid 19 plans are out the window and I'm assuming that 20 this whole grants change that we're in the 21 middle of right now has probably not helped 22 your efforts.

4

5

6

1 So it does seem that there's a lot of 2 things completely outside of, you know, you and 3 Dan's control that are working against this whole timeline. So I just, you know, I'm 4 5 looking at it now thinking that there's just no 6 way. 7 I think the general approach of 8 getting this initial grant setting up the 9 budget numbers and then being able to put money into that seems like an efficient way to go 10 11 forward to the future. But I'll be shocked and awed if we 12 13 have that done by the end of this calendar year 14 which would be the end of the fiscal year, 15 first quarter. 16 MS. DENIT: Yes, thank you, John. 17 All absolutely fair points. And like I said, 18 this is what Dan and I and others are, this is 19 the timeline that we are pushing to achieve. 20 I cannot quarantee that we will 21 achieve it because as I described for you back 22 in July, I -- there's just a significant amount

Neal R. Gross and Co., Inc.

Washington DC

(202) 234-4433

www.nealrgross.com

1 of review that we are working through as part 2 of this process. 3 And we intend to get that initial 4 slug of funds to you all by the end of the 5 calendar year. It's entirely possible that will not happen, but I'm going to choose to 6 7 look at the bright side. 8 And then I look forward to your shock 9 and awe the next time we meet. 10 MR. ANSON: Dave? 11 MR. WITHERELL: Thanks. Thanks 12 Kelly. I had a follow up. Part of my question 13 was exactly what John was asking relative to 14 timing and reviews. Is it just the NMFS review 15 that we need to go through? 16 You said 60 to 90 days for that or is 17 there also a grants management division review 18 and maybe a CEQ review that might add to that 19 time? 20 MS. DENIT: I am not expecting that. 21 No, so it would be a NMFS review, execute the 22 proposals, yes, there will have to be review by

our grants folks, but we are already working on our system to again try to prioritize these funds and get them out the door.

4 The Agency has already made the 5 decision and directed might be too strong of a 6 word because I don't know all of the details, 7 but our grants folks have been told, discussed, 8 whatever is the right word, that the IRA funds 9 need to be their top priority for getting out. 10 Anything you want to add on that?

11 MR. NAMUR: The only thing I'll add 12 is that to your point, Dave, is on the initial 13 grant application, the umbrella application, 14 that will undergo grants management review and 15 legal review.

To Kelly's point once we get into the proposals which is those releases of funds, then we'll be moving much quicker. And to reiterate what Kelly said, is that the director of grants management has committed to this being the number one priority for the grants management division at NOAA.

1

2

MR. WITHERELL: Excellent. Mr.
Chairman, I have a second follow up. So
thinking back about whether it's a beach
umbrella or a small umbrella it seems then
incumbent that the Councils really know and
have a plan for how they're going to spend all
the money, including the follow-up targeted
research projects that we're competing for.
We'll have to know that in the next
month or two to be able to apply for our
initial \$375. So it's like the timing is
really short for the Councils, but then it's
open-ended on the other end.
And I is that the same impression
you have with how an umbrella works?
MS. DENIT: Yes. We're going to be
in a little bit of a space where you are going
to need to use some slightly predictive
capabilities to articulate in broad strokes
where you envision overall you would want to
focus your funds.
You will not, as part of that initial

1 application, have to get into a ton of 2 specifics. So yes. And again, we're trying to do it in that way in order to facilitate making 3 the later releases of funds more quick. 4 5 MR, WITHERELL: It makes me wonder then, if the template you have for the umbrella 6 7 might be different than the one you might have 8 for the project specific grants along the way. 9 So it's I guess the template that we 10 were working from that you sent out I'm not 11 clear if that applies to the projects or the umbrella. 12 13 So that was specific to MS. DENIT: 14 the projects and Dan can speak a little bit 15 more to what would be in the umbrella part. 16 MR. NAMUR: Yes, so for the umbrella 17 award which is the initial award and the 18 release of \$375 is really not that different 19 than when you guys submit your administrative 20 awards. 21 You know, when you know you're going 22 to be getting releases of funds in the future.

So for those activities that you are sure you're going to be doing, which is in the \$375 presumably, you'll be bringing on some help, there will be some planning, those kind of

6 That will need to be flushed out in a 7 lot of detail. And match the budget and then 8 you'll have basically a description of the fact 9 that you're going to be submitting future 10 proposals to the Agency for releases of funds.

And that can be quite vague. So the umbrella application will not follow the exact template because it's going to be \$375 plus we're going to submit proposals in the future and you're just going to describe that process to us.

And then once you submit those, we'll do releases of funds. Your proposals will be associated with the umbrella award and be considered a change in scope because now we know what you're going to be doing. And you'll get the associated funds at that time.

3

4

5

things.

1	MR. ANSON: Any other questions? Ms.
2	Simonds?
3	MS. SIMONDS: You called me Mrs.
4	Simonds. So that's why I didn't recognize it.
5	I guess I have a basic question. Do you have
6	this money in hand? And if you do, great.
7	If you don't, what are the steps that
8	you have to take in order to get the money to
9	you all or approval for you all to spend this
10	money for our \$20 million?
11	MS. DENIT: Great question, Kitty.
12	Yes. I believe that as of yesterday, I think I
13	have the \$3 million because that was carry over
14	funds from FY23. And so yes, there is a
15	Federal Government process through which we get
16	the funding appropriated from Congress.
17	Then we have to go through a process
18	of getting it actually apportioned from ONB to
19	us to then actually be able to spend it and
20	execute it.
21	And my understanding is that yes, I
22	think it's either this week or next week I will

1 have the ability to access the \$3 million and 2 then we will shortly thereafter have access to 3 the FY24 funding amount which I believe --4 you'll have to forgive me, but is a roughly an 5 additional \$10 million. So that in '24 we would execute 6 7 approximately \$13 of the \$20 million 8 potentially. Depending on how many, what 9 proposals we get, et cetera, it might be that 10 we don't spend that full amount. 11 But that would be what we would have 12 and the steps that are required and that we are 13 already in the process and just awaiting the 14 apportionment from ONB for the FY24 funds. 15 MR. ANSON: Kitty? 16 MS. SIMONDS: Just a quick follow up. 17 So if you have the \$3 million in hand, I think 18 that we would all, we all should receive that 19 money as soon as possible because that is the 20 planning, the original planning document that we want to work on. 21 22 Yes, message received and MS. DENIT:

1	I would love to be able to provide that funds
2	to you. But the Secretary and the White House
3	are extremely interested in all IRA funding.
4	So I have a few more things I need to
5	wait to be approved before I can post that RFA,
6	not I, we can post the RFA.
7	MS. SIMONDS: So you would want to
8	get our plan as quickly as possible then. For
9	the \$3 million.
10	MS. DENIT: Yes, once we post the
11	Request For Applications, as soon as you can
12	submit that, that's great.
13	MR. ANSON: Bill, followed by Dave.
14	MR. TWEIT: Thanks, Mr. Chair.
15	Kelly, as I'm you're probably hearing the
16	same thing I'm hearing. As I listen to the
17	discussion about timing, which is just a real
18	nervousness about, you know, every day that
19	goes by is one day less and what our
20	understanding of the overall IRA funding period
21	is and I think a lot of us have some pretty big

So what's, how much flexibility is
there between years for carry over and how much
flexibility is there at the end which I
understand is the end of FY26 for additional
carry over?
For carry over of, because some of
these things are things that are going to take
at least our planning or where we're looking as
a Council, it's going to take the full period
of time and so Government shut down, things
like that which are outside of our control come
along.
We're just losing time that's for at
least, you know, on our part is just absolutely
precious so.
MS. DENIT: So a couple of things to
unpack there. Yes, completely agree that we
are increasing our risk the longer that we are
taking to execute and get the funds out the
door.
That has been communicated up the
chain some of the challenges that we face, the

longer that it takes to get the funding out the
 door. Want to be really clear about your
 reference to carry over.

I'm talking about in the Federal
Government, our ability to carry over
unobligated funds from one fiscal year to the
next. That would not impact you all, directly.

8 And I'm trying not to get too in the 9 weeds and confuse things further. The bottom 10 line is, once we provide funds to you all on 11 our grant, once the funds are obligated off the 12 Federal books, you will have the duration of 13 your grant to execute those funds because our 14 legal requirement is to obligate the funds to 15 you.

16 You are absolutely correct that FY26 17 is a hard stop. There is no carry over. We 18 have to have spent, meaning we have to have 19 obligated all of these funds by the end of 20 Hopefully that helped clarify. FY26. 21 (Off-microphone comments.) 22 MS. DENIT: Right. You have the

> Neal R. Gross and Co., Inc. Washington DC

www.nealrgross.com

1	duration of your grants. So again, if you
2	I'm making it up, you get another million
3	dollars, you only end up, you have what is
4	it, the four years to spend that million
5	dollars.
6	Because it's off of our books, we are
7	in compliance with the requirement of IRA.
8	MR. ANSON: Dave?
9	MR. WITHERELL: Kelly, thanks. I
10	think what Bill was getting at is a no-cost
11	carry over a possibility from 2026 to 2027 of
12	that funding?
13	MS. DENIT: Okay, that's a no-cost
14	extension. Sorry, I got
15	MR. WITHERELL: No, he said.
16	MS. DENIT: Oh, sorry. I got
17	confused what the reference to carry over. So
18	we would have the ability to analyze based on
19	whatever information you provided to us whether
20	a no-cost extension would be appropriate or
21	not, so yes that is a possibility.
22	MR. WITHERELL: And following up,
	Neal R. Gross and Co., Inc.

Washington DC

1 just for clarification, following up on the 2 question that Kitty has, I think if I'm 3 understanding correctly that the proposal that we release as in our umbrella that were to get 4 the initial \$375 actually is the proposal for 5 the whole thing. 6 7 You would lay out that you wanted \$3 8 million for the whole plan. Is that correct? 9 PARTICIPANT: Yes. 10 MR. WITHERELL: And I think you've 11 heard from us, I mean the Council's concern 12 about competing for these funds is really I 13 liken it to an, setting up an open access 14 fishery where everybody is going to be 15 competing and capital stuffing to get the most 16 they can from each other as opposed to some 17 kind of a rationalized fishery where there's a, 18 you know the amount going in. 19 And then you're just, you can pick 20 away at that and make the best use of those 21 funds. So I think that's the way I interpret 22 the difference between trying to compete for

1 those funds versus allocating them semi-evenly 2 among the Councils or through our formula or 3 through an even allocation. MR. ANSON: Carrie? 4 5 DR. SIMMONS: Yes. Thank you, Mr. Chair. Thank you for the presentation, Kelly. 6 7 So just I think you've answered this question, 8 but just in my mind to be crystal clear, the 9 earliest, I like to call to it, I like how we called it Phase 1 and Phase 2. 10 11 I don't really like the umbrella 12 personally, but maybe I need to re-watch the 13 Mary Poppins. So Phase 1, the earliest we 14 could expect that funding would be January 15 2024, the \$375. 16 For Phase 2 if our proposals are 17 approved and it's a multi-year proposal and 18 it's a 90-day review, the earliest we could 19 expect that funding would be May of 2024. 20 And would we be receiving all the 21 funding for a multi-year award or just 2024 22 funding?

1	MS. DENIT: So first part, yes, we
2	would be targeting Phase 1 by the end of the
3	calendar year given holidays, et cetera. Yes,
4	you might not actually see it in your bank
5	accounts until January of 2024.
6	Phase 2, I think your estimate of
7	April/May timeframe is a realistic one. We
8	would be trying, that would be where we would
9	be targeting to that slug of money to you all.
10	And then when we provide those funds,
11	how much we're able to provide will depend on
12	the project proposals that we get in and which
13	ones we're able to fund. So as I noted, we
14	will have approximately \$10 million.
15	If we get proposals that are multi-
16	year proposals that exceed \$10 million, then
17	there will be some Councils who will not get
18	the full amount in that first year.
19	But we would indicate this is funded.
20	You just will get the money in FY25. Was that
21	clear, Carrie?
22	DR. SIMMONS: Yes. Thank you, but
	Neal R. Gross and Co., Inc.

1 also, if we -- so if we hire somebody with the 2 \$375, but we don't get the future funding, I 3 just I feel like in order for this to work, we 4 really need to understand when we submit our 5 proposal for a multi-year award, how much we're going to have. 6 7 Because it just makes the planning so 8 difficult. I mean, I know there has to be some 9 back and forth in that 90 days, but I just don't see this working out very well if we 10 11 don't have a clear understanding of that from 12 the onset. 13 I mean, especially since we're not 14 going to get the money until May of 2024 at the earliest. So I, I mean that would be my 15 16 concern right now. 17 MR. ANSON: Any -- Miguel. 18 You know, I got a simple MR. ROLON: 19 mind. And I don't understand umbrellas or 20 Phase 1 or Phase 2. But in my case, I will 21 hire somebody to monitor those proposals for 22 three years.

1	And by the way, if we get to receive
2	the money by May 2024, that's a de facto
3	agreement to have an extension to see if you
4	want to have the three years in 2027.
5	So we end up, if we have the three
6	years, otherwise, we are going to be robbing
7	four or five months out of those three years if
8	we end up December 31 of 2026.
9	So I hire this person, a contract for
10	three years, from what I'm getting I have to
11	have a big clause there. If we don't get any
12	more money, you're fired in the middle of it.
13	So I would try to see if we can find
14	somebody who agrees to do that. So that person
15	is hired, let's say that out of the \$3 million,
16	we don't get a penny.
17	That person would be looking at the
18	ceiling for three years unless we got some
19	money that we can put together. Right now, I
20	have a committee that have the priorities and I
21	can put it together with this artificial signed
22	and sent to the local office and the local

governments.

2	So by this year, I will submit a
3	proposal for \$375 that mostly have hiring a
4	person at a level GS-13 level and maybe some
5	money for whatever else we can figure out.
6	No guarantees that we are going to
7	receive any money after that. If that person
8	receive, if we receive let's say \$300,000, I
9	can manage that on myself. I don't have to
10	hire a person to do it.
11	So I would have to fire that person
12	or do something else with it. I'm just saying
13	all of this because it looks simple, but it's
14	difficult.
15	I don't envy your shoes because you
16	are in the middle of the sandwich here. You
17	have the RSVQ asking you to do this and that
18	and they don't really understand the Council
19	system of even fisheries.
20	So anyway, that is my comment. It's
21	another question, I guess my question has been
22	answered by the round of discussion here, but I

1 will see if we can submit it, can I do this. 2 Submit a memo to you with this is 3 what we're going to do, this is more or less our proposal and see if you, if you tell us, 4 5 yes, you're on the right direction then we can submit it, the whole thing. 6 7 And then I will have to rely on the 8 Chair by Chair because everything we do we can 9 give that decision to the Executive Director 10 and the Chair to submit these proposals. 11 If we have to use a Council, then I 12 won't have their blessing until December. And 13 everything will go backwards, so. Anyway, just 14 to let you know, you know, I appreciate your 15 situation and the way you are and for also it 16 would be simple just to divide everything as we 17 have done before. 18 But it's not that easy I believe for 19 you and to do so. So thank you, anyway. 20 MR. ANSON: Dave Whaley? 21 MR. WHALEY: So, Kelly, can I get a 22 little bigger picture with you? It seems to me

1	that the Councils are at different places right
2	now on this issue on climate scenario planning.
3	So I'm looking at the priorities.
4	I'm not clear whether your intention is to
5	bring everybody up to the same level or reward
6	those that have done more work already.
7	MS. DENIT: Thanks, Dave. So great
8	transition. I went ahead and pulled the
9	priorities up for the next slide. I would say
10	the intent is to acknowledge that all of the
11	Councils are in very different places with
12	respect to climate change and I mean that
13	multi-faceted. Right?
14	Like how climate is impacting their
15	particular fisheries, the data that they have
16	available or not with respect to their
17	fisheries.
18	So the intent of these priorities was
19	to be broad to allow each Council to move
20	forward the climate-related projects that they
21	think are the most important within the bounds
22	of these five priorities which again were

1 written very broadly and thanks very much to 2 the Councils who provided inline edits and 3 direct feedback on these priorities. We made changes to reflect that input 4 5 and you'll see here that it ranges from we're not quite sure what climate impacts might look 6 7 like and so we want to proceed more on a 8 planning path to the we kind of do already know 9 what some of the impacts are and how we want to 10 incorporate it into our management system. 11 And there's a range of different ways that might be incorporated into the management 12 13 system. Did that answer your question, Dave? 14 So debating or deciding MR. WHALEY: 15 how reviewers weight these, one or two Councils 16 could get all of the \$17 million? 17 The priorities all MS. DENIT: No. 18 have equal weight. When the proposals are 19 being reviewed, what the reviewers will be 20 looking at is the alignment with these 21 priorities. 22 Not that any particular priority is

1 2 weighted heavier than another.

MR. ANSON: Kitty?

MS. SIMONDS: So with all of this discussion and all of the discussions we've had before, I have to be honest to say that I have no confidence that you all will actually be treating us fairly in terms of the competition.

Because I don't think you all really 9 understand what is important to each of the 10 Councils. I can speak from history and that's 11 where I'm coming from so I agree with everybody 12 else that it would be a lot.

13 It would be better for all of us if 14 the money were distributed evenly because then 15 you would know from each of the Councils what's 16 important to them, what the priorities are and 17 we wouldn't be competing with each other about 18 our priorities.

We'd probably lose out, you know, because you would think that whatever you would think. We probably wouldn't agree with and so this is really tough.

1	I mean, you're making it really tough
2	on all of us and so I needed to say that I
3	don't have confidence that this will work out
4	fairly in the way we are approaching things.
5	MR. ANSON: Ms. Coit?
6	MS. COIT: Thank you. I just wanted
7	to say a couple of quick things. One,
8	reiterate that getting that \$375 out as soon as
9	we can is the priority. I just want to
10	emphasize what Kelly said.
11	There's a lot of factors that all of
12	you have mentioned including a potential shut
13	down. And so we will do our best. We have
14	requirements in terms of providing grant money
15	that we have to follow.
16	We will do our best and work closely
17	with you. I just wanted to reiterate that.
18	Secondly, I appreciate the comments. I fought
19	very hard for this funding.
20	The IRA funding is very sought after
21	and is meant to be used strategically to try to
22	advance, you know, this nation's goals in

regard to resilience to climate change. So I agree with Kelly.

I don't think there's any scenario that two Councils get the \$17 million, but I do want to be clear that as we work with you on your priorities, the strategic nature of the use of these funds towards meeting these goals and the weighting of these elements are going to govern the process.

10 So it's not divide by eight. It will 11 be we'll work with you and want to help you 12 meet the needs in your region, but it will be, 13 you know, a process with these criteria.

14 And I think it's a fantastic 15 opportunity, you know, as we talk about the 16 concerns and the processes and the ways things 17 can bog down. Let's not lose sight of the fact 18 that we have this additional \$20 million. It's 19 significant resources and we hope to work with 20 each of you to make sure it's used in a way 21 that has a tangible benefit in meeting your 22 goals and our goals around climate change.

> Neal R. Gross and Co., Inc. Washington DC

1

Thank you.

1

	<u> </u>
2	MR. ANSON: Merrick?
3	MR. BURDEN: Yes, thank you, Kelly.
4	I guess we've moved on to this slide so I've
5	got a few questions about how to interpret
6	these priorities. So I think of this in a
7	couple of ways. And I could interpret these
8	priorities in a few ways. One is very broad
9	and I could nest almost everything we do under
10	one priority. Another one is very narrow. And
11	I could say like bullet one and two. I can
12	interpret them as being very, very narrow and
13	that it would be hard for us to line up with
14	those priorities. So one example, if we look
15	at the first bullet.
16	So we do ecosystem status reports.
17	We do integrated ecosystem assessments and so
18	my first question is, essentially what do you
19	mean by operationalization? Can you help us
20	understand what that might look like and what
21	you'd you be looking for if we were to take
22	that another step further in some way?

1	The second bullet, you know,
2	operationalizing recommendations from climate
3	scenario planning efforts and as you know,
4	we've done that. But we also do other things.
5	And you know, we have a couple of
6	advisory groups that have recommended to the
7	Council, our Council, some priorities for
8	advancing climate-readiness of our fisheries.
9	Those didn't come out of scenario planning.
10	That came out of the expertise within those
11	bodies looking at what we do and what we need
12	to advance.
13	And so would those be excluded
14	because they're not from a climate scenario
15	planning effort or is this to be interpreted
16	relatively broadly?
17	MS. DENIT: Great, thanks Merrick.
18	In response to your first question, a
19	hypothetical example of how you might use or
20	operationalize one of those scientific
21	processes was actually one that was discussed
22	that the East Coast Scenario Planning Final

Workshop which was to think about your harvest control rules and is there a place to use where a particular stock falls on the climate vulnerability assessment as part of the factors that you consider in your harvest control rules.

1

2

3

4

5

6

7 So for example, the stock is in need 8 of, I mean not we're building, but let's say 9 the stock is doing really well and it's also 10 green under climate vulnerability then maybe 11 the Council chooses to take an approach that's 12 a little bit more liberal.

Whereas if a stock is doing well, but it's on the red, maybe you choose to take a slightly more conservative approach with respect to your harvest control rule.

17 So that would be an example of that. 18 On your second point, from my perspective, what 19 you described would fit perfectly under Bullet 20 No. 3.

21 If you have an AP or your SSC or 22 others within the Council process that was

1 separate from your climate scenario planning 2 efforts, who have identified either changes to 3 your processes, or to particular stock measures, those would fit under that bullet to 4 5 me as if it ties to improving the climate resiliency of the respective fishery. 6 7 MR. ANSON: Bill? 8 MR. TWEIT: Thanks, Mr. Chair. Just 9 as quickly from the North Pacific Council 10 perspective to the thoughts that Janet was 11 offering. 12 Really appreciate the work that NMFS 13 put in to making sure there is money set aside. 14 We believe we're absolutely the right parties 15 to be able to operationalize these in a way 16 that's just really going to speak to these 17 priorities. 18 We think these are the right 19 priorities and I know it can sound like we're 20 just sort of picking apart a process, but it's 21 done out of we really want to make this work. 22 And so please hear the questions that

1 we're asking about this in the sense of we're 2 all just really struggling to operationalize this. We understand that the collision between 3 4 the timeframe and the amount of money, those 5 aren't your doing. And -- but we're just trying to work 6 7 with you to make this work and again appreciate that \$20 million is a lot of money. 8 It's also 9 a small amount of the total amount of money. 10 We think in the end, at least from 11 the North Pacific Council and I think every 12 Council thinks that it's going to look like 13 some of the best spent \$20 million out of the 14 whole package so. 15 MR. ANSON: Is there any other 16 discussion? Merrick? MR. BURDEN: Yes, thank you. 17 Maybe 18 just some other remarks. Not necessarily 19 looking for some feedback, but I want to put some remarks out there in the interest of 20 21 transparency because we are under a very tight 22 timeline.

1 And I think maybe some of these 2 thoughts will help us make sure we're on the 3 same page. So when I think about how we would 4 operationalize climate resilience in our 5 fisheries, you know, we run the risk of 6 engaging in an expansion of what the Councils 7 do. 8 It's my impression that that's not 9 what we have in mind. That what we are doing is saying, here's what the Councils do, this is 10 11 what we're responsible for. How do we make that, those activities 12 13 and do those activities in a way that is more 14 responsive to climate change and helps to 15 foster more climate resilience? 16 And so, I've been going about things 17 in a way where I look at the Council's yearly 18 agenda and I say we've got a whole bunch of 19 things on there. Some are very routine, some 20 Let's add a dimension to those. are new. 21 Let's look at those in a way that 22 will help foster climate resilience. I'm not

1	necessarily looking to add things to the
2	Council's plate.
3	If that's not what we're supposed to
4	be doing, I think I'd love to hear it or if
5	that's the wrong way to go about it, I'd love
6	to hear it.
7	My strong opinion is that that's how
8	we ultimately operationalize things is that we
9	take the Council's docket and we say, let's do
10	this better and we'll call that climate
11	resilience.
12	So if that's out of alignment with
13	what you all are thinking, I'd love to, I'd
14	love some feedback, but that's where we are at.
15	MR. ANSON: Anyone want to comment?
16	MS. DENIT: Sure, I mean I would
17	offer that yes, I think that's consistent with
18	what we're looking for and again, this comes
19	down to all the Councils are in different
20	places and in some cases you're in different
21	places even within fisheries that are in your
22	same jurisdiction.

1	And so in some places, Merrick, yes,
2	I think what you just described is correct. It
3	might be that you're adding some additional
4	facets to the work that you are already doing.
5	And it might be that in other places
б	it's much more of a fundamental shift in either
7	the management or in, again, embarking on a
8	planning process to help the Council and its
9	stakeholders think through what climate change
10	means with respect to the fisheries in your
11	particular region.
12	MR. ANSON: Any other discussion on
13	the presentation thus far? Kelly, do you have
14	additional slides for this?
15	MS. DENIT: I think I may have made a
16	boo-boo unless Morgan and Sean (phonetic) saved
17	my tooshie which is possible, but did you by
18	any chance turn the template into a PowerPoint
19	slide or do we have a way that we can share
20	that up on the screen?
21	Do I just click to the next slide?
22	That's why my team is awesome. So while

1 they're helping me get that up, I'd again would 2 just like to reiterate my thanks to the 3 feedback we got with respect to the priorities. We did make changes in response to 4 the comments specifically adding in the 5 reference to processes and not just to 6 management changes because there was a great 7 8 clarification that in some cases it might be 9 processes that you want to change within the 10 operational aspects of the Council. 11 And also the 'for examples' and the parentheticals that we added to try to provide 12 13 some additional clarity on what we meant with 14 the different priorities. So again, my thanks 15 to the Councils who provided that feedback. 16 MR. ANSON: While we're waiting, 17 Cate? 18 DR. O'KEEFE: Thank you and thanks 19 for that follow up, Kelly. I quess I would 20 just sort of like to plug a little bit of what 21 Chris said in the previous agenda item under 22 304(f) procedural directive.

1 To me, that's really Priority No. 4 2 that the Councils are being asked to consider 3 through IRA funding developing measures of 4 processes and increased responsiveness of 5 allocations and other management measures to climate impacts. 6 7 And I think, you know, I'm bringing this up now because I think that the Councils 8 9 have talked about the IRA funding in 304(f) as 10 being on similar paths, not the exact same 11 thing. So there has been, I think, some 12 13 confusion across the Councils about NOAA's 14 policy directive on 304(f), but then asking us 15 to, you know, partake in this \$20 million of do 16 that. 17 So just kind of coming back to 18 Chris's comments about, you know, I think the 19 Councils, the CCC really does want to engage in 20 that 304(f) policy directive. 21 And hopefully, you know, NOAA would 22 engage with us and potentially be able to

1 utilize some of these IRA funds to develop 2 those metrics, those thresholds, in a more 3 thoughtful planned way. Thanks. MR. ANSON: Kelly, is this where you 4 5 want to go? Okay. Great, yes, thank you for 6 MS. DENIT: 7 that comment, Cate. And I think, you know, 8 appreciate the comments on 304(f) and we 9 certainly will go back and review that based on 10 the feedback that you all have provided. 11 And I think that there's a lot of 12 synergies so as I think about the 304(f) 13 process, there's two different places where the 14 Councils are engaged as in that process as 15 currently proposed. 16 And in both of those places, there's 17 the opportunity for the Council that's involved 18 or the Councils that are involved to articulate 19 how they're addressing some of the questions 20 that we've posed or the factors that we've 21 highlighted in that 304(f) policy. 22 So to the extent that Councils apply

1	to use some of these IRA funds to put in place
2	some of those mechanisms that you've already
3	identified and that you believe will help, I
4	think that fits together.
5	Thank you so much, Morgan and Sean.
б	We have touched on the priorities already so I
7	will, can you go ahead and scroll down a little
8	bit?
9	So again, this is specific to the
10	project proposals that you all will provide.
11	As I noted when I shared the template with you
12	all, there is some level of detail that I will
13	own.
14	I missed in removing from this
15	template so in particular, around No. 8 which I
16	emailed you all about in terms of the level of
17	detail you can stay right there. That's
18	good. I'm just previewing a little bit.
19	And I'll step through that. So first
20	couple are really straight forward. Your name,
21	titles go ahead and stay on that slide.
22	Great, thank you.

1 So then we are asking you to identify 2 which priority or priorities you see the 3 proposal aligns with, describe your objectives. I'd like to note that we have set a page limit 4 5 of five pages excluding budget tables. And again, we were trying to find the 6 7 That's not to say that five pages sweet spot. 8 is the sweet spot and we welcome your feedback 9 on that of providing us with enough detail to be able to make, to conduct an informed review 10 11 while also not making the proposals with 30-12 page process that's incredibly burdensome for 13 you to provide. 14 So welcome your feedback on the 15 length. So objectives, what are the key? 16 Proposals and actions that you want to take a 17 summary of those activities including any 18 specific partners that you have in mind. 19 And then the list of key folks. 20 We've included this because as we've noted for 21 you all previously, in particular all of your 22 staff currently are paid out of your

1

administrative grants.

2	So to the extent that you are going
3	to redirect existing staff to support specific
4	IRA projects, we would want to note that so
5	that we can make sure and keep everything very
6	crystal clear when it comes to the audits that
7	we are inevitably going to have as part of
8	executing these funds.
9	Okay, go ahead and scroll down a
10	little bit more. So the milestone schedule,
11	again, just trying to lay out, this can be,
12	take variety of formats. Right?
13	What your main goals are, you're
14	going to hold three workshops, you're going to
15	hold one each quarter, whatever it might be to
16	try and lay some of those out for us.
17	And then we get down to eight which
18	is the budget. We've asked you to please
19	bundle projects so that there is a minimum of
20	\$300k per proposal. And then this lists out
21	the key categories.
22	As I noted in particular under

1	travel, some of the supplies and materials, the
2	contracting and consulting services for your
3	initial project proposal, we do not need the
4	identity of those specific travelers.
5	I'm sorry, we had deleted that and I
6	missed it in my review when we shared this with
7	you all. And so you can be more general when
8	it comes to the budget.
9	I think as I alluded to in the email
10	that I shared with you all, for example, you
11	intend to conduct three to four workshops, you
12	anticipate X number of participants, you know,
13	a rough ball park of what that budget would
14	look like, you don't need to say. It's going
15	to be \$143,212. Right?
16	Go ahead and keep scrolling down.
17	Keep going. So then in our conversation in
18	July, a couple of you all asked for some
19	transparency in what would be used to evaluate
20	the project proposals.
21	And so we have provided this list of
22	the key criteria that we will use to assess the

proposals and tried to articulate as clearly as we could what would be encompassed under each of those four criteria.

So the first is the funding priorities, how much does the proposal tie to the specific priority or priorities that we've identified, the technical merit is it reasonable, et cetera? You all are familiar with that one.

10 Budget justification, are they 11 allowable, reasonable, and then regional collaboration which is again a nod towards 12 13 making sure that we are having that synergy 14 between our regional offices, you all and the 15 science centers on what you are proposing so 16 that we can carry it forward through to 17 implementation.

And we have the weightings there. You'll see that the alignment with the priorities and the technical merit are the most heavily weighted criteria.

And we would welcome your feedback on

Neal R. Gross and Co., Inc. Washington DC

22

1

2

1	the criteria as well as the weighting. And
2	then the go ahead and scroll to the last
3	page for me please. Yes, just that paragraph
4	right oh.
5	There should be one more paragraph at
6	the, yes, it's like a tricky game there.
7	Anyway, while they're getting that up, I
8	mentioned this earlier.
9	This last paragraph just notes for
10	you that it would be the three reviewers and
11	that there are factors that we will take into
12	account after that technical review including
13	the geographical distribution of the funds.
14	And that our high priority will be
15	those proposals that leverage existing tools,
16	the actions that will be completed within three
17	years and the cross-Council projects where
18	that's relevant.
19	You'll not be penalized if you don't
20	have a cross-Council project. But we will be
21	looking to prioritize those. So that is a
22	super quick skim through.

1	I know that there is a lot of
2	discussion around this template and we are very
3	much looking forward to the feedback that you
4	all have on it.
5	And again, trying to find that sweet
6	spot between not administratively burdensome,
7	but also allows us to make some informed
8	choices with respect to the project proposals
9	so I'll stop there and happy to answer any
10	questions. Sure.
11	MR. ANSON: I see Dave Witherell with
12	a question.
13	MR. WITHERELL: Thank you, Mr.
14	Chairman. Kelly, before we get into a lot of
15	questions about the template specifically, you
16	mentioned that this is, this template is for
17	the project-specific actions that would be due
18	the proposal would be due in the end of
19	January.
20	But we don't have any template or
21	guidance for actual umbrella proposal that we
22	would put in for \$3 million say, that we don't

1	have any guidance. So should we just kind of
2	use this as guidance?
3	MR. NAMUR: Yes, thanks. So yes, I
4	would, my recommendation would be to follow the
5	process you typically use for your
б	administrative award.
7	Which you know, so you're going to
8	have your standard Federal forms which is going
9	to cover a lot of the information in here like
10	your key personnel and budget categories and
11	such.
12	Your budget narrative will again
13	follow those same categories on the SF424A just
14	like you do for your administrative process.
15	And then when you're doing your detailed budget
16	narrative, you have the initial application
17	process will really only be highlighting the
18	initial \$375 because those are the dollars that
19	you know you're getting and what you'll be
20	using them for.
21	And as I mentioned earlier, you will
22	outline the fact that you will be submitting

additional information for additional releases of funds in the future.

3 MR. WITHERELL: That is helpful. 4 Second question, in thinking about the project 5 specific proposals I would imagine that rather than having ten \$300,000 proposals from a 6 7 Council come in, you would really prefer one 8 proposal that covers the different projects 9 that might be included. Does that make any 10 sense?

MS. DENIT: Yes, absolutely. And we're leaving that to your discretion on how you want to slice and dice that. It might be that there are certain projects that even cut across different FMPs that are more easily bundled and others that might warrant being something separate.

18 MR. WITHERELL: Chairman, thank you.
19 MR. ANSON: Merrick?
20 MR. BURDEN: Yes, thank you, Mr.
21 Chairman. So Kelly, we have a -- we've huddled
22 here and thought through and talked through the

Neal R. Gross and Co., Inc. Washington DC

1

funding template.

2	We have some feedback for you and so
3	I'll try to tee some comments up and I'm sure
4	my colleagues will add some additional detail.
5	But just saying overall, our overarching
6	comments, so the template appears to require a
7	level of detail and certain information that
8	doesn't seem necessary.
9	And if we were to adhere to it, it
10	could actually restrict the work of Councils
11	particularly when you're considering the public
12	process and iterative nature of Council work
13	and function.
14	We think a focus should be made on
15	outcomes and how those outcomes align with IRA
16	priorities and then strike an appropriate
17	balance of detail, an appropriate balance
18	between the detail and the proposal and some
19	flexibility and how Councils attain those
20	proposal outcomes.
21	And that balance, when considering
22	it, that proposal detail, of course, would be

1 necessary to make sure that the methodologies 2 and timelines that are employed can work to achieve the outcomes of the proposal. 3 But the flexibility would need to 4 exist to ensure that the work that we're doing 5 as part of IRA funding can nest underneath 6 7 broader Council function and process which is, 8 again, iterative and as a public process 9 component. And some of that we can't hardwire 10 11 very well ahead of time. So some major comments then on the template itself so just 12 structurally, we think it makes sense to start 13 14 big picture at the start of the proposal. 15 So recommend off the bat that the 16 proposals include a description of the plan for 17 addressing funding priorities, sort of an 18 overarching umbrella, not sure what size. 19 And then thinking about the 20 components of the proposal, which is really the 21 meat of this template, so thinking of 22 Components 3 and 4, we'd suggest focusing on

(202) 234-4433

Neal R. Gross and Co., Inc. Washington DC

www.nealrgross.com

2	Focusing on Component 5, we don't
3	think it's appropriate to have detail on the
4	who, what, how, why and instead focusing more
5	on the tasks that will be done.
6	And also on Component 5, it's not
7	clear the degree to which it would be
8	appropriate or realistic even to list the
9	contractors that would be employed. We'll have
10	to go out to bid on some of these presumably.
11	Component 6, that concerns the, we
12	have some concerns about the listing of
13	detailed activities by staff. I can't speak
14	for the other Council directors, but often in
15	our Council, we will move things around and fit
16	things to purpose based on how the year is
17	unfolding.
18	And hardwiring in staff ahead of time
19	is sometimes not realistic although we do try
20	to do that admittedly. Component 7, I think
21	all together it makes sense to strike the
22	quarterly milestone requirement.

objectives and outcomes to be met.

1

1	That's just seemingly unrealistic
2	given the issues that arise and pop up and
3	we'll have a conservation emergency. For
4	instance, it will have to tackle and that might
5	push back and make these milestones on a
6	quarterly basis unrealistic.
7	And then a question about joint
8	proposals between Councils, it wasn't clear to
9	us that is realistic or that could even be
10	done. And so we had a question about that.
11	I will maybe turn to my Vice Chairman
12	here who took a big lead in thinking through
13	some of our responses and see if you wanted to
14	add anything.
15	MR. HASSEMER: Thank you, Merrick.
16	No, I think you covered it well. The intent is
17	some simplification and just to capture the
18	work that the Councils do and need to do in the
19	future to meet some of those goals or
20	priorities that are identified so I'll leave it
21	there. Thank you.
22	MR. BURDEN: And then before I guess
	Neal R. Gross and Co., Inc.

1 turn it over to my respected colleagues here. Since we are under a timeline and we are 2 3 starting to think through this already, if we can get a revised template within about a two-4 5 week time period, that would allow us to keep making headway and set realistic expectations 6 7 for getting information to you all that you'll 8 need. 9 So just look to my colleagues to see 10 if they want to add some detail. 11 MR. ANSON: Anyone else want to add 12 to that? Kelly? 13 Thanks, Chair. MS. DENIT: Thank you 14 for those comments, Merrick and Pete. And 15 certainly look forward to seeing any more 16 detailed feedback that you choose to provide. 17 That's really helpful. 18 And I think we're on the same page of 19 trying to find that right balance. And I want 20 to be clear that there is some flexibility. We 21 understand that sometimes things change. 22 Right?

1 A hurricane comes and you can't 2 conduct a workshop that you intended to do or 3 whatever it might be and so there is flexibility within the grant to allow some 4 5 pivoting as needed to adapt as real time situations are occurring. 6 And that will be within the same 7 8 rules of procedure for lack of a better 9 descriptor that you would follow when you need 10 to make such changes in your administrative 11 grant. So there is some flexibility there 12

13 and Dan will kick me under the table if I got 14 that wrong. Agreed about the level of detail 15 and again, with respect to contractors 16 understand that you probably at this point 17 aren't going to know who that's going to be. 18 We're just looking for, we would be looking for 19 someone to facilitate X, Y, or Z or what it is 20 the tasks that you would be asking them to do. And an estimate of what you think 21 22 that's going to cost and then that can be

1	
1	refined as we move forward and you actually,
2	you know, get someone on board.
3	And then with respect to the
4	milestones, yes, certainly we're just looking
5	for general input on when you think you will
б	achieve certain tasks or actions that you have
7	described.
8	And with the grant process you'll
9	already be required to report on that every six
10	months so we don't necessarily need to have the
11	duplication there, so point taken.
12	Your request for a revised template
13	in two weeks, we will do our best, I will be
14	super candid that my daycare is closed for the
15	next two weeks and so my time is a little bit
16	cray, cray.
17	So it might be a little closer to
18	three weeks, but I certainly appreciate, again,
19	the timing conundrum that we're all in and we
20	will try to get the template turned around to
21	you all as quickly as we can.
22	And so the sooner you have any inline

1 edits that you want to provide, that's super 2 helpful for us. And then, did you have 3 anything else you want to add? On key personnel. 4 MR. NAMUR: 5 MS. DENTT: Yes. Yes, thank you. 6 MR. NAMUR: Ι 7 believe you made a point about key personnel on 8 your concerns about needing to list that and the fact that Councils want to be able to have 9 10 the strategic ability to move people as needed. 11 And I know that is something that you 12 guys typically do because you're working 13 underneath one single award and everybody's got 14 100 percent of their time associated with that 15 particular award from NOAA. 16 With this, unfortunately, because IRA funds do have to be in 100 percent separate 17 18 awards, that co-mingling of funds is a Federal 19 offense, we have to be able to track people one 20 to one to awards. 21 So each activity needs to be to a 22 specific person for a certain amount of time

1 for a certain amount of money. And that's 2 something that we need to be sure of upfront 3 because as Kelly alluded to, we fully anticipate these awards being audited in the 4 5 future. And that will be a finding with this 6 7 allowed cost if there's co-mingling. 8 MR. BURDEN: Yes, thank you on that 9 latter question. There's the, you mentioned that we have to track the funds which is one 10 11 vehicle and there's plenty ahead of time about how we'll use the funds. 12 13 If we do have to plan ahead of time 14 and specify how these funds will go to specific 15 staff are we going to be held to that real 16 tightly? 17 In other words, does it have to align 18 really closely with the eventual outcome that 19 we've tracked ourselves to? Or can there be 20 some flexibility there? 21 MR. NAMUR: So the answer is yes, but 22 I'll caveat that by saying that you always have

(202) 234-4433

1

Neal R. Gross and Co., Inc. Washington DC

www.nealrgross.com

2 3 awards. That if somebody is 100 percent on 4 your administrative award right now and you say 5 they're going to work 20 percent on your IRA 6 award, you now need to reprogram your 7 8 administrative award to bring that down to 80 percent because you can't have someone working 9 10 120 percent of the time. 11 So you'll have to have actions on 12 your administrative award as well as on your 13 IRA award. 14 MR. ANSON: Miguel? 15 For other grants that we MR. ROLON: 16 have that we don't have it and everything, we 17 have a 10 percent for administrative purposes. 18 And we don't have to be that strict tracing 19 that 10 percent. 20 I mean for administrative purposes, 21 because we have the computers that we use, the 22 use of this and everything and we do this for

the ability to reprograming and re-budget. And I'll add to that this is not unique to these

this grant too.

1

2	So I would say 10 percent would be
3	allocated to the Council for three years for
4	administration purposes. But I will have a
5	person that will be responsible, a coordinator
6	I will call it for the entire period.
7	And that person will be accountable
8	using this fund. We need to track that person
9	movement, work and everything. Is that okay?
10	That's fair way of presenting it?
11	MR. NAMUR: So I'll answer that in
12	two parts. If they are under your indirect
13	rate, then that is a true statement. You can
14	use it the same as you do underneath other
15	awards.
16	If they are direct costs personnel,
17	then you have to track them one to one.
18	MR. ANSON: Carrie?
19	DR. SIMMONS: Yes, thank you, Mr.
20	Chair. So Dan, if we have to reprogram or
21	repurpose, what is the process and timeline for
22	that? Because my understanding, this does not

www.nealrgross.com

1

go to our regional grant coordinator.

2	MR. NAMUR: That is correct that it
3	doesn't go to your regional grant coordinator.
4	It will be organized and run out of the Office
5	of Management and Budget which where I sit.
6	Mr. Derek Orner sitting behind me
7	right now, he will be the lead on this for the
8	processing of awards and his staff. It's the
9	same process as any award action request which
10	means that you'll come in and actually request
11	of the Agency.
12	It will come to your Federal program
13	officer. It will not be a regional Federal
14	program officer, it will be Derek or somebody
15	he assigns.
16	It will go through the NMFS review
17	like any other award action request and then go
18	to the grants management division at NOAA for
19	final approval. And timeline, I apologize, I
20	believe you asked about a timeline.
21	We typically try to process those in
22	less than 30 days.

1	DR. SIMMONS: And just a quick follow
2	up. So would the regional coordinators be
3	involved at all? Or copied on these changes?
4	Because they're monitoring our admin award. It
5	seems like there's a disconnect there.
б	MR. NAMUR: Yes, and I apologize.
7	Every answer, everything I just said on that
8	last answer was regarding your IRA award.
9	For administrative changes to your
10	administrative award, you will still be going
11	through your regional FPO, Federal Program
12	Officer. But in the system, you don't need to
13	choose. You just submit to Agency and it will
14	route accordingly.
15	MR. ANSON: Merrick?
16	MR. BURDEN: Yes, just quick
17	question. This is all, I'm still going to pull
18	a new guy card although thankfully I'm not the
19	newest Executive Director anymore. Is this all
20	written down somewhere?
21	Because this is coming out real fast
22	and it seems like details will have to track

1 someplace so if there's some place you could 2 direct us to where we outline this process 3 you're just outlining, that would be really helpful. 4 5 MR. NAMUR: Yes, we can provide something along the lines of a Frequently Asked 6 7 Questions for you guys. 8 MR. BURDEN: Great. 9 MR. ANSON: Is there any other 10 discussion or questions for Kelly? Kelly, do 11 you have anything else to provide? 12 (Off-microphone comments.) 13 MR. ANSON: All right. No. Well 14 that concludes the IRA Climate Ready Fisheries 15 Funding Priorities. We are ahead of schedule 16 quite a bit. We made some significant changes 17 to the agenda, albeit, it's after lunch break. 18 Yes, we'll go ahead and we'll take a 19 break. Let's come back at what, at 11 o'clock 20 and we'll try, we'll come back at 11 o'clock 21 and we will conclude with the agenda as it is 22 listed, the CCC subcommittee updates with the

1	climate work group. Thank you.
2	(Whereupon, the above-entitled matter
3	went off the record at 10:42 a.m. and resumed
4	at 11:04 a.m.)
5	MR. ANSON: Okay. We'll start the
6	meeting back again, and we'll move into the CCC
7	subcommittee updates that the first one will
8	be the Climate Workgroup. And that discussion
9	is going to be led by Ryan Rindone from the
10	Gulf Council. I think Ryan's online. Ryan,
11	are you there?
12	MR. RINDONE: Yes. Can you hear me?
13	MR. ANSON: We can. If you can come
14	a little closer, or go a little closer to the
15	microphone.
16	MR. RINDONE: I'm wearing it around
17	my head, so I'll just speak louder. Is that
18	better?
19	MR. ANSON: That'll work. Thank
20	you.
21	MR. RINDONE: All right. Good
22	morning, everyone. As Mr. Anson said, I'm Ryan

1 I'm the lead fishery biologist for Rindone. 2 the Gulf Council. So the Climate Change 3 Workgroup has put this handout together for you to solicit feedback on draft questions for 4 5 review and input across all the scientific and statistical committees and the councils. 6 7 Back in May, the CCC created this 8 workgroup to develop a common understanding and 9 voice among the councils on current capacity, 10 future needs, and fishery management designs 11 that can respond to climate change while 12 assisting in the regional council -- while 13 assisting the regional councils and 14 coordinating with NOAA on a response to the 15 Ocean Climate Action Plan. And specifically, 16 for our climate ready fisheries. 17 And so some of the points from that 18 Ocean Climate Action Plan include things like 19 counting for fish stocks shifting into cooler 20 waters, response to extreme events like marine 21 heatwaves. And the administration's plan to 22 try to provide marine resource decision makers

1 and other ocean users with the information that 2 they need to assess risks and take action to 3 adapt to changing ocean conditions. The administration recognized that 4 5 investment in science seems to go hand-in-hand with updated management of fisheries for 6 7 everything to truly be effective. 8 So the Climate Change Workgroup has 9 met twice since May to begin addressing the 10 CCC's requests. The first step was to provide 11 an overview and common understanding of climate 12 capacity and needs across all the councils. 13 And so here we ask for your feedback 14 on the survey questions that are listed in the 15 handout to better prepare for directly querying 16 the councils.

17 There's three main categories to 18 these questions. And the first one is the 19 effect on or response to climate change in the 20 fishery management process.

21 The second one, if you scroll down a22 little bit, is information needs, simply

science information needs to support adaptation to climate change. And then the third one is an institutional or council capacity and needs.

And so as the -- after the counsels and SSC's are queried, our next steps are going to be to provide an opportunity for information exchange and collaboration across regions, like which techniques work and don't work, and how other region -- how other councils can learn from each other.

And then to assist the CCC in communicating with NMFS on development of goals, guidance, and operational approaches to enable the councils to incorporate some of these climate-ready approaches into their decision-making.

And then lastly, to work with the legislative working group to build out a working paper, an existing policy statement on climate change to help address the councils' needs for investing and data collection, and other climate ready tools.

> Neal R. Gross and Co., Inc. Washington DC

1

2

1	So Mr. Anson, we're just we're
2	looking for feedback. Any feedback that we can
3	get from the CCC at this stage, specific to the
4	questions we are proposing, and our general
5	approach.
6	MR. ANSON: All right. So the
7	workgroup committee is asking for feedback.
8	Any comments to what they've proposed? Any
9	problems Bill.
10	MR. TWEIT: Thanks, Mr. Chair. And
11	thanks to the workgroup for pulling this
12	together. This the work that they've done
13	so far seems really consistent with, at least
14	how I interpreted the CCC's instructions to
15	them.
16	And I think getting this
17	information, pulling this information together
18	across council will really help inform the
19	councils. I'm thinking a little bit about the
20	timeframe that we laid out.
21	When we laid that timeframe out,
22	that was sort of pre-understanding both the

resources but also the timelines associated 1 2 with the IRA funding. And it seems to me, at 3 least for North Pacific Council, probably our most important thing we can be doing right now 4 5 is making sure that we're lining up correctly for the -- for smart use of the IRA funding to 6 7 really address the -- use the tools that we've 8 been thinking of using to address climate 9 change. 10 And take advantage of, you know, we 11 had big plans, we weren't sure that we had the 12 Now it looks like we could have the resources. 13 resources. And so that -- that's job one for 14 us. And I think that'll, as we work our 15 16 way through that, that'll probably help us 17 contribute to the task, ultimately, of the

18 Climate Change Workgroup.

19 So I'm wondering if we should, just 20 as the CCC, think about maybe relaxing a little 21 bit on the timeframe that we suggested for the 22 workgroup to allow the councils to at least get

1	I'm going to screw up the terminology here,
2	but the first proposal into NMFS.
3	And then maybe the climate change
4	group could be of some assistance, but ask the
5	ED's to essentially determine whether the
б	Climate Change Workgroup could be of some
7	assistance to the councils as they pull
8	together their second stage proposals.
9	And so maybe just suggest that we
10	back off on pulling the summary together until
11	we're further along, and leave it to the
12	discretion of the ED's to maybe suggest some
13	ultimately what some new timelines might be for
14	the original tasks, as well as see if there's
15	anything in the councils' work, in the
16	individual councils' work, to put together,
17	particularly the second stage proposals.
18	If there's anything the Climate
19	Change Workgroup could do, I would again
20	propose that we just leave it to the discretion
21	of the ED's to task the Climate Change
22	Workgroup if that would be useful, just in

1	order to help the councils with that second
2	stage, if they think it's necessary.
3	If they don't, fine. Keep the
4	Climate Change Workgroup on task but change the
5	timeline to reflect this sort of immediate need
6	for the councils.
7	I hope that's clear but at least
8	that's what makes some sense to me as I think
9	about our member, the Climate Change Workgroup,
10	and what she's going to need to be going to
11	really contributing to over the next few
12	months.
13	MR. ANSON: Carrie.
14	DR. SIMMONS: Yes. Thank you, Mr.
15	Chair. Yes, thank you for the presentation,
16	Ryan. I really like, you know, your thoughts
17	on that, Mr. Tweit. I think that when we voted
18	on this, I believe in May, we didn't really
19	have that much information at all, really, on
20	the IRA climate resilience funding and what
21	that looked like, and what that process was
22	going to entail.

1	So it would have been great if we
2	could have moved forward with this prior to all
3	that effort to really try to hone in on those
4	priorities and then provide them, you know,
5	provide that feedback to the agency.
6	But at this point, I would agree it
7	would be nice to take a step back on this
8	effort and maybe we could get a revised
9	proposal in May or some other appropriate time.
10	I did have a very kind of specific
11	weedy question that I don't know if the group
12	would want to pull out of the proposal. And
13	this goes back to the other, I guess, pots of
14	money for the IRA effort and the data
15	acquisition and technologies piece of it.
16	There's a section B, Morgan or
17	Shawn, if you could please go to that section.
18	It's about information needs, science to
19	support adaptation. And so yes. Yes. I
20	think it's page 2.
21	Yes, so I don't would it be
22	helpful to pull that out and maybe still move

1	forward with that survey in some capacity at
2	the various regions to inform regional spend
3	plans and data needs? Or is that too high
4	level?
5	So very specific weedy question.
б	MR. ANSON: Yes.
7	DR. SIMMONS: I think to Dr. Werner,
8	probably.
9	DR. WERNER: All right. Thank you.
10	I was thinking about an answer, and I didn't
11	realize it was directed at me. My apologies.
12	In terms of the forecast and
13	planning period, is that what you're asking
14	about? You know, the scenario planning. Is
15	that the question?
16	DR. SIMMONS: Well, I mean just in
17	general if this group were to move forward with
18	the survey and, you know, as proposed here
19	exactly or some form or fashion for the
20	regional councils, could that information be
21	useful to you all as you develop the regional
22	spend plans for the IRA climate-ready

fisheries? Specifically for the data
 acquisition needs.

3 DR. WERNER: There's, let's see, I'm -- I was thinking in particular about the -- so 4 5 the answer is yes. But in terms of the forecasting, which is what I was thinking 6 7 about, you know, we're thinking on a two to five year horizon if you will, in terms of what 8 9 we're thinking, in terms of the -- what kind of 10 products we would be looking at and what kind 11 of, as I said, time horizons we would be 12 anticipating. 13 The data collection, of course, is a

14 bit shorter term. It's within that two year 15 time period. But I think, you know, having 16 thinking through the conversation this morning, 17 having that -- having all of these discussions 18 happen jointly between sort of the science side 19 and what the councils are thinking, would 20 certainly help us refine our needs. Yes. 21 DR. SIMMONS: All right. Thank you. 22 MR. ANSON: Cate, did you have your

hand up?

2	DR. O'KEEFE: Yes. Thank you. I
3	appreciate those comments. I think is some
4	ways this the questions that have been
5	compiled are very useful at this stage as maybe
6	an introduction to the proposals we write for
7	the IRA funding, but more on an individual
8	council basis because the answers will be
9	different across the different councils.
10	And to Carrie's point, related to
11	how we approach the IRA funding and what our
12	what information our council might need.
13	Should we be coordinating with the regions in
14	terms of identifying their level of resources
15	and support towards our planning for IRA
16	proposals. And then they review those submitted
17	proposals on a technical basis.
18	MR. ANSON: Kelly.
19	MS. DENIT: Thank you, Chair. So
20	yes, Cate, that would be great and as part of
21	the project proposal process for the councils
22	to be engaging with the regional offices as

part of the formulation for your respective IRA
 project proposals.

Because we will be looking at what are our resources to be able to execute, you know, our parts of what it is that you articulate you want to achieve within the council process.

And if I could add onto Cisco's response to Carrie, I think that would be great to pull out that part B, and I honestly also under task 1A, number three, some of the last questions there under C, D, E, and F, I think would also be very beneficial for the agency to get some feedback from you all on.

And I would make just a slight twist on them, which is not just what have you done historically, but what are you anticipating you need, what are the kinds of decisions or products that you think would be helpful for your decision making.

21 So it's not just what's been 22 available to you in the past, but what might

1	you anticipate you would need. I think that
2	that would be very informative and timely. We
3	are in the process of trying to articulate for
4	ourselves across all of our program areas.
5	So sustainable fisheries, Magnuson,
6	our protected resources, aquaculture and
7	habitat, what are the key information products
8	that we need, CEFI, the Climate Ecosystems
9	Fisheries Initiative, to produce for us.
10	And so I think this would really
11	dovetail very nicely to the planning that Cisco
12	has already described. I don't know that the -
13	- whether the CCC is interested in, you know,
14	essentially might end up conducting two
15	different surveys.
16	But to the extent that you might
17	want to move forward with some of these
18	questions in a shorter term, I think that would
19	be great and those would be the ones that I
20	would highlight to help us as we're finalizing
21	those spend plans with respect to CEFI and data
22	acquisition. Thank you.

1	DR. O'KEEFE: Thank you. That was
2	very helpful. So based on that, I sort of
3	support Carrie and Bill's comments that maybe
4	putting a pause on the workgroup right now is a
5	CCC effort.
6	I think I would like to take these
7	questions back to our region, our council, and
8	go through kind of on an individual basis
9	before moving forward on next steps for what
10	the workgroup would do.
11	I think I need to kind of chew on
12	exactly where we were going to go on a more
13	national level once we understand the answers
14	to these questions in our own region and how we
15	would apply them towards IRA funding and future
16	planning towards all of the data and
17	information that Kellie just laid out. Thanks.
18	MR. ANSON: Any other discussion or
19	comments? Chris.
20	MR. MOORE: Thank you, Mr. Chair. I
21	would echo Kate's comments. Certainly putting
22	the workgroup on the shelf for a little while I

Neal R. Gross and Co., Inc. Washington DC

think is probably appropriate, as I understand your proposal, Bill, and tell me if I'm, if I'm not getting it.

But certainly given what we're going to be dealing with over the next couple months as it relates to IRA funding, the person that I have on this particular workgroup is going to be doing that or helping me with that.

9 So they're not going to have time to 10 be involved in a survey effort. What I'm 11 interested in is when do we revisit this? 12 Specifically, do we wait until May to think 13 about what this workgroup is going to do? Or 14 is it something that we're going to be talking 15 about prior to that May meeting, would be one 16 question.

17 The other thing is that I think that 18 we should consider the other possibilities for 19 this workgroup. So one possibility might be if 20 we get a favorable response to the motion I 21 made earlier, to have that group get involved 22 with that particular project. The procedural

3

4

5

6

7

1 directive related to, you know, 304F. 2 That may be a bust, but I think 3 those questions, those taskings would have to wait, obviously, until we get more information 4 5 and feedback from NMFS. But again, I would support waiting 6 7 and not moving forward at this time. The question is, when do we reconsider it. 8 9 MR. ANSON: Bill. 10 MR. TWEIT: Thanks. The headline 11 can read, yes, Chris Moore gets it. No. If I 12 could ever appear in one of those headlines, 13 we'd really be -- I -- because we're not slated 14 to meet again until May, I really think we're 15 just going to have to rely on our ED's, and 16 their monthly call to suggest if they see a 17 great opportunity sooner. 18 But then otherwise, let's ask the 19 ED's and others to help us be prepared for 20 putting out a new timeline, cognizant now of 21 the additional IRA resources, as at least we're 22 hoping they'll play out.

1 And what that'll be able to do, and 2 maybe also reshaping a little bit of what their 3 tasking is, given all that too. So I'm hopeful that the ED's can keep an eye on that in 4 5 between. I don't know of another way to take 6 7 advantage of the kinds of opportunities that 8 you're talking about. And there may be a 9 couple of these opportunities. I just don't 10 know of a way for us at the CCC to take 11 advantage of those other than requesting that the ED's in their monthly call think about it. 12 13 And so I'm proposing that we sort of 14 actually, explicitly delegate that kind of 15 discussion about taking advantage of 16 opportunities for the workgroup to the ED's in 17 their monthly call. 18 MR. ANSON: Thanks. 19 MR. ANSON: So I'm just wondering 20 does this require a motion? Do you all just 21 feel comfortable going around the table and 22 agreeing, nodding the heads. And so what -- I

1	just want to get clarification for myself and
2	there was a couple of things addressed.
3	There was the timeliness of it, and
4	whether or not there should be discussion, and
5	the survey should be postponed, and then there
6	was also the specific comment relative to
7	removing the questions from section B, I guess.
8	And so are those both moving
9	forward, or is it just some part of that that's
10	moving forward? I mean, I guess that's what I
11	need clarification on since we're just nodding
12	the heads.
13	Is it all of the above, what I just
14	said, yes. Okay. All right. I see more
15	nodding of heads, so all right. Very good.
16	Any other discussion for this topic?
17	All right. So that will conclude
18	Ryan, thank you for the presentation. That
19	will conclude that agenda item. And so again,
20	we're still very early, or very much ahead in
21	our agenda.
22	So it is nearly 11:30, and since we
	Neal R. Gross and Co., Inc.

1	do have quite a few folks, although it's just
2	the one agenda item, but quite a few folks that
3	are teed up to go potentially after the ESA
4	discussion, which will start at 1:30.
5	Let's just go ahead and take an
6	extended lunch break. And we'll reconvene here
7	at 1:30. Thank you.
8	(Whereupon, the above-entitled
9	matter went off the record at 11:24 a.m. and
10	resumed at 1:31 p.m.)
11	MR. ANSON: Okay. So hope everyone
12	had a great lunch. We're going to start off
13	the afternoon session with the ESA integration
14	policy update, and CCC ESA MSA workgroup
15	discussion. That's going to take the place of
16	the 1:30 to 3:00, essentially, time slot.
17	Immediately after that, it was
18	requested that the process for establishing
19	fishing regulations in sanctuaries, that topic,
20	because of some unexpected phone calls that
21	need to be tended to that those folks start
22	their presentation right after the ESA

discussion.

2	So we'll then just kind of push the
3	workgroup, the subcommittee updates after that
4	sanctuaries discussion. So we'll go ahead and
5	start with the integration policy update. Sam.
6	MR. RAUCH: Thank you, Mr. Chair. I
7	am going to give an overview of where we are in
8	the process, and just for those of you who are
9	new, we have an existing policy on integrating
10	the ESA consultation section seven process with
11	the Magnuson process.
12	It's been around for some time.
13	This the CCC was integral in providing input
14	into that process when we first adopted it. We
15	also had MAFAC, our Marine Fifth Marine
16	Advisory Committee, our FACA committee, provide
17	inputs into that as well.
18	We've been implementing that for a
19	number of years and about two years ago or so,
20	the councils looked over that implementation,
21	had a number of suggestions for how it could be
22	improved.

And we have been working through
that process, and we've provided periodic
updates. One of the things that we told you
that we were doing at the last few CCC meetings
is we have had our headquarters office work
with the various regional NMFS' offices and the
councils, to work through how is this working
in practice in the various regions.
Because we've got the input from the
councils, and we wanted to do that. And we
also, we used that both to get input from the
group, but also to share some best practices
for those areas where it was working well in
one council, maybe we can share with others.
And I will provide a report we have.
The last CCC meeting, we were in the middle of
those. We've now concluded those. I will do a
report. The CCC also gave us a series of line
edits to our existing policy, which we've been
thinking about in the context of those regional
meetings.
We didn't want to I've given you

some preliminary thoughts on that, and those preliminary thoughts largely haven't changed. But we'll go through that in detail with the advantage of having worked through that regional process.

We will talk about how we responded 6 7 to those, and then the next steps. We do not 8 have a draft policy to share today. But we're 9 trying to take our time and be iterative. But 10 I am going to tell you some of the things that 11 I think that we're going to do in that draft 12 policy.

13 And before I go any further into 14 that, I do want to introduce somebody. You may 15 recall, when we started this, we had Cathy 16 Tortorici come talk with you all.

17 She was the head of our endangered 18 species interagency cooperative division. She 19 has since retired and Tanya Dobrzynski, who's 20 behind me, Tanya, has just started there this 21 summer over that division. And she is --22 that's a long time, she is basically -- she's a

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

section seven guru in D.C.

1

2 So she is the one that is in charge 3 of deep thoughts and trying to work with everybody to make sure that section seven works 4 well together. She's taken over Cathy's role 5 in that, so this is one of her priorities. 6 7 And so she's here today. She may, I 8 may call her up here, but if not, take an 9 opportunity after the fact and go introduce 10 yourself to her because she's a key part in 11 finalizing this product. 12 All right. With that, some 13 takeaways from the regional meetings, as I 14 said, we -- our first task, we know that the 15 CCC, the councils sort of did their own review 16 of what was working well and what was working 17 not. 18 And we wanted to try to bring 19 together the councils and the regional offices, 20 and our headquarters folks, just so we can get 21 a good clear picture, and to try to share these 22 lessons learned.

		1.
1	These are some of the takeaways that	
2	we gathered from that process. One, which is	
3	what the council said, that early coordination	
4	is very important. It is happening in all	
5	regions, but the level varies.	
б	And there is greater interest across	
7	the work from the councils for greater	
8	involvement in that. And so we're going to	
9	talk about how that can be accomplished, and	
10	what are the limitations of that.	
11	There is still a workload issue in	
12	every region. Early coordination is great, but	
13	that means people taking time out of their busy	
14	day already and going to meetings, and these	
15	kinds of things.	
16	And we want to be proactive. So you	
17	have to balance the commitment to early	
18	coordination of workload with the, you know,	
19	that's the cost of being involved early in the	
20	process.	
21	How we can do that, how we can	
22	communicate, it is working well in some	

1 regions, and some regions, it can be improved. 2 We do want to send updates to the policy 3 director, that's the PD, about clear expectations. 4 5 The PD does send out a strong statement that NOAA intends to engage with the 6 7 councils. We believe the councils are a 8 partner in this consultation process, and there are -- we would like to involve them as we can, 9 10 you know. 11 There are limits to that in the 12 current PD, and we'll talk about some of that, 13 but that is our clear statement. To the extent 14 that we can and you can, we would like to 15 involve the councils and work through these 16 issues together. 17 Some regions have used liaisons, and that's fostered improved communication and work 18 19 products, developing the BA's, looking at 20 threat of one's mitigation measures well before 21 you get to the consultation process. 22 I did define fishery impacts. In

general, the councils often proactively want to
do things to try to head off any protected
species issues before they become an issue.
And that is a good partnership we can have.
And those areas lead to the most success.
Developing integration agreements,
not every council has those. But where we do
that, it has improved coordination, set
expectations for how NMFS and the councils
engage.
And then clarify the processes,
which we'll talk about in a minute with the
PD's. That there is we believe that there
is some advantage that can be undertaken with
that.
So let me get to some of the
specifics here. So this is just the overview,
the edits, I'm telling you what you basically
already know because these are things that you
told us.
Encourage more early coordination
and communication. Get more council

involvement, and pre-consultation assistance. The -- one of the issues that has been a particular sticking block is if a biological opinion, or consultation results in a need for council action.

And that creates tension if it is unplanned for and is not good communication. If we are asking you to do something, how do we make sure that you are involved in that process. So we'll talk about that more in a minute.

There are schedule issues. 12 13 Sometimes we have the luxury of looking at 14 section seven well in advance of when it would 15 actually be required, and preparing for a 16 consultation and doing these kinds of things in 17 time to match council's schedules, which are 18 not as flexible as may be needed to be. 19 Sometimes we can't do that. 20 Sometimes we have to, we are told to consult on 21 a set schedule, and we cannot involve the

22

1

2

3

4

5

Neal R. Gross and Co., Inc. Washington DC

councils in that process. So where we can, we

like to reach agreement, recognizing that we should not just be dictating to you that you have to do things on this date, but it's a partnership, and we need to discuss what's available.

6 The other side of that is if we 7 can't reach agreement, we may have to do the 8 consultation anyway. You had wanted a dispute 9 resolution process. That is really difficult 10 for us, given that the decision making 11 dynamics.

We talked about that before, we're going to talk about that a little bit again. And then sharing drafts. And there are things that we can do and things that we can't do, and we'll talk to a little bit of that, about where we think -- what we think we can do with that.

All right. So a little bit more details of what you proposed to us. One is just work in close coordination throughout the process to address the impacts, rather than relying on sort of after the facts RPM and

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

1

2

3

4

5

6

7

RPA's resulting from the consultation.

So this gets back to many councils, maybe all councils, you know, have a very proactive view that they try to -- and I'm not telling you guys anything you don't know, but try to look at protected resources issues ahead of time.

8 Try to craft the regulations to 9 avoid these impacts to begin with and try to be 10 very proactive. It's, to some extent, it is 11 really disruptive when despite all the best 12 efforts to try to preplan and to put in 13 regulations, we find out more needs to be done 14 late in the game, after the consultations.

15 So we then are relying on RPM's and 16 RPA's, and so we want to try to work with you 17 on those actions ahead of time, that might 18 avoid the need for pay more prescriptive RPM or 19 RPA process at the end game, where we are 20 telling the councils what needs to happen, as 21 opposed to working with the councils on a 22 proactive, constructive set of measures ahead

of time.

1

2	And so we will talk about that, but
3	I think we'll talk a little bit more in a few
4	slides when we get to the RPM's, RPA's, about
5	what we mean by that.
б	So let me move on there. Because
7	there is some details about the ways I want to
8	think about these things, and I've talked to
9	you before, and we just want to be clear on
10	that.
11	The underlying stuff, and this is
12	the council's proposal, so it's a little bit
13	awkward when the entire slide is underlined.
14	But this is the terms and conditions that when
15	we, when we are when we do a biological
16	opinion as a term and condition, if that term
17	and condition from the incidental take
18	statement.
19	So the terms and conditions only a
20	part of incidental take statement. If it
21	requires the council to act, the council would
22	like to be involved in developing that term and

condition and make sure it's reasonable and it is within their timeframe.

Our answer to that, as we'll talk about in just a minute, is there never should be a term and condition that requires the council to act. That we might have a reason for an alternative.

8 And for those of you who are not 9 steeped in the ESA, we're going to get to what 10 the difference is in a minute. But a term and 11 condition is a lesser standard, and we should 12 not be requiring council actions through terms 13 and conditions.

So that will solve that one problem, but we still need to address what happens when we're doing a reasonable alternative. But so this is, this is an issue that we need to talk through and we're going to talk through that in just, I think next slide. Oh, no. One more. So let me just get to the point

here. So when we consult with -- on a council action, there's two kinds of consultations we

Neal R. Gross and Co., Inc. Washington DC

21

22

1

1 do. The first one is you all propose a measure 2 which has never been through section seven 3 before. It's a brand new measure. We all 4 understand that for a brand new measure, we're 5 going to do a section seven consultation. And if as the result of that 6 7 consultation, we think the measure needs to be 8 changed, we're working through the council 9 because there's nothing in place. Right. This is still something to be done and the section 10 seven process does really well in that 11 12 situation, and there's time to work through the council with that. 13 14 Because the answer then is going 15 back to the council and saying your action needs to be modified. We wait for the council 16 17 to modify it. There's not a time constraint in 18 that kind of work. 19 And my impression is that works 20 reasonably well in practice. The more 21 difficult one is where there's an ongoing 22 action. So the council has, you know, the

1 council management program's been in place for 2 decades. We get some new information, or we 3 have -- or the fishery has exceeded its take 4 limit on certain species. 5 And we have to initiate consultation to update the biological opinion. If we do 6 7 that and find no jeopardy to the status quo, there's no need for the council to act. 8 That 9 works out fairly well. If we do that and find that the 10 11 status quo measures need to be changed, that's 12 where we have the -- we have two choices at 13 that point. One is we can just do them as a 14 secretarial action under our authority under 15 the Magnuson Act, or the Endangered Species 16 Act. 17 But what we prefer to do is go back 18 to the council, work with the council on how 19 that can be changed. We may or may not have 20 the time to do that. So that's -- that second scenario 21 22 where it's an ongoing action, where we think

that the status quo needs to be changed, is a scenario where we might have the status quo is causing jeopardy, and so we have to have a reasonable and prudent alternative.

5 Those can be significant changes to 6 the action. That's where we should be coming 7 back to the Council. It could in theory be 8 something less. And in the past, we have done 9 something less for an incidental take 10 statement, which is something less.

An incidental take, when we get to that slide right here, incidental take statements, we give out to authorize the take for a non-jeopardizing actions. So the authorization of fisheries, every fishery that we operate in the country is currently status quo, non-jeopardy. Right.

We wouldn't allow it to happen.
Every federal fishery. But that doesn't mean
that you don't occasionally take an endangered
species in that process. And so we -- that's
not illegal because we issue ourselves an

Neal R. Gross and Co., Inc. Washington DC

1

2

3

1 incidental take statement that says in the 2 course of this non-jeopardizing fishery, you 3 can take a certain number of species. It doesn't jeopardize the whole 4 status of the species. When we do that, we 5 issue reasonable and prudent measures, and the 6 7 reasonable and prudent measures can't alter the 8 basic design, location, scope, duration, and 9 timing of the action. 10 Occasionally in the past, we have 11 included as a reasonable and prudent measure, a 12 statement that the council has to do something 13 different. The council has to undertake this -14 - change the management. 15 Well, that's really not a reasonable 16 and prudent measure. Maybe it's requiring some 17 things as substantive as requiring the council 18 to go back and act. It shouldn't -- that's 19 more than a minor change. And so we're going 20 to take these out. We're going to say, we're 21 going to stop doing that as reasonable and 22 prudent measures.

So that scenario where for minor changes, we are requiring the councils to act, we are going to -- and this is going to be part of our policy is that anything that would require the councils to act will not -- will be more than a minor change.

7 So I think that that will eliminate 8 that situation. Now, that does not mean though 9 that we couldn't decide that the fishery 10 overhaul is having such a significant 11 unanticipated impact that it may be causing 12 jeopardy as is, and we do need to change the 13 management.

And in so, if we have time, we are going to be approaching the councils about that change. But that would be through a reasonable and prudent alternative, which is a more substantial change than through this minor change, reasonable and prudent measures.

20 So if you have questions about the 21 details, I realize it's a little bit confusing 22 if you're steeped into this, but this

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

5

particular one was the source of some contention with some of the councils, where we were under the guise of a minor change, asking the councils to undertake a major plan amendment.

So we're not going to do that 6 7 anymore. We still need to talk, though, about 8 how we go about dealing with the situation 9 where in the status quo -- we'll get to the 10 graphs in a minute, in the status quo, when we 11 do a consultation with you on the status quo 12 fishery management measures, there will be 13 occasions where we will look at that and 14 conclude they need to change to avoid jeopardy 15 to the species.

16 If that happens, then we all 17 collectively have a few choices. The councils 18 can undertake a F&P amendment on their own to 19 change those management plans.

And then there's a back-and-forth between -- with us about how you might do that to get to no jeopardy. Right. So that -- we

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

would do that.

2	Or we could finalize that biological
3	opinion and say here is our reasonable and
4	prudent alternative. And we will tell you how
5	what we require to get to no jeopardy.
6	Either one of those requires some
7	sort of discussion with you all, if we are
8	requiring you all to undertake some actions and
9	changes to the fishery management plan. And so
10	that is an issue we're still that is going
11	to be an inevitable source of engagement where
12	we will be asking you to change the F&P, you
13	will be responding to us about having
14	whether to do that or not.
15	We need to be mindful on both ends
16	that there is when we ask you to do that,
17	that's a time commitment and a process
18	commitment on your end that you can't guarantee
19	the end result, because it's a transparent,
20	public process.
21	And it's going to take time. On our
22	end, given what we believe is the status of the

stock and the impact to the fisheries, we might not have that time. So we might be taking secretarial action in the short term to fill in the gaps or do to things pending some later actions by the councils.

6 Because the ESA is such that we 7 don't necessarily have the time to defer to the 8 councils. So what you'll see in here is a lot 9 of statements about how we would like to 10 incorporate the councils in those processes, 11 and include them, but we might not be able to 12 if the timing doesn't work correctly.

Okay. We can talk about that more in a minute. But that is -- that's what we want to sort of spell out in the policy directive. In response to some of your comments and our review of that.

A slightly different issue is drafts. So you ask us to share drafts of the opinions with -- first it was with the council as a whole, and then it was with a subset of council staff.

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

1	And let me just be clear. We have
2	never indicated that there was problems sharing
3	the opinion, a draft of the opinion, but the
4	draft the full draft opinion, which is the
5	full analytical document, if we do that, we
б	feel that we need to go through our internal
7	clearance, and we can't share it with you in
8	confidence, that document is available to the
9	broader public.
10	Happy to share it with you at that
11	time. Happy to work on ways that we can take
12	public comment on that document and council
13	comment on that document, but that's what that
14	is.
15	There is, though, a way to look at
16	things like the description of the proposed
17	action. The councils have a great deal of
18	expertise on what the proposed action is, and
19	there is a lot to be said for sharing that
20	portion of the opinion, which is not the
21	opinion, but is just our understanding of the
22	proposed action, working with council staff, as

part of the deliberative process, which is
 something that we do now to make sure that we
 get that correct.

Similarly, if we are talking about an RPA which involves council action, there is a lot to be said for working with the council staff and we're, you know, when can the councils respond to this. What is the timeline.

We are asking for an F&P amendment. Is that one year, is that two years, is it three years? You know, what needs to happen in order to do that.

There's a dialogue between us and the council staff that does happen now and can happen in the context of looking at the RPA and is it reasonable, and from the council's perspective, at a minimum that reasonable would be, you know, can the council actually do what we are asking the council to do.

21 It's not a given that the council 22 can do that. So those kind of things we can

do. But if we're talking about sharing the whole opinion, that is something that we are not prepared to do without it having gone through the release and treating it like a public document.

6 So we're trying to sort of meet you 7 at partway between what you are, but we can 8 always share -- let me just sort of summarize. 9 We can always share the draft. That draft is 10 available to the public if we share it with 11 you.

12 We can share parts of the opinion 13 with your staff in a nonpublic manner, as we 14 would with an applicant, to clarify or actually 15 to clarify is this really the proposed action. 16 Did we say it right. Or look at things like 17 the RPA. Did we -- is it reasonable to ask for 18 this kind of thing because it -- because you 19 can do it.

20 Or is that unreasonable because it's 21 completely impossible. We'd ask you to do an 22 F&P amendment in a month, you'd probably tell

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

1 us that that's impossible. Right. So that's 2 the kind of thing that we can do there. 3 All right. Another thing that you asked us to look at is the role of NMFS offices 4 5 and one of the things that we've talked about through this process is that within the fishery 6 7 service, we have our -- there's various ways to 8 formulate the -- our sustainable fisheries 9 branch, and in our mind, that is the action 10 agency for the purposes of ESA consultation. 11 They're the ones that propose the action to us. And then you got the protected 12 13 species offices, and they're the consulting 14 agency. And so really what happens in a 15 consultation is our SF offices are consulting 16 with our protected resources offices on that. 17 So they need to coordinate with you 18 on how all that happens. And the revision here 19 is talking about a coordinated timeframe. But 20 I just wanted to be clear, because in the role of NMFS' offices, we do have those two 21 22 functions that we do.

1 When you are talking with SF it is 2 like they're the project proponent. They are 3 the ones that are taking what you want to do 4 and giving it to the PR side. The PR side is 5 the consulting agency. So we look at that. You asked for a 6 7 coordinated timeframe, and we are very interested in that in the normal course of 8 9 things. The one thing that we cannot do, 10 though, is -- well, let me rephrase it this 11 way. 12 At the outset, I said that an ideal 13 world, we would be doing a lot of things to 14 prepare for a consultation before a 15 consultation is required. We would do things like collect scientific information. 16 17 We would talk with the council about what is viable. The council might have a 18 19 protected species amendment in the works before 20 consultation is required. In that situation, we absolutely 21 22 should be talking with you about the timeframe

1 and about when it makes sense to add the 2 consultation, because the consultation is still 3 discretionary. There could come a point in time 4 when consultation is no longer discretionary. 5 That happens when we say -- when we give the 6 7 fishing industry a cap on the number of species 8 that they can take. 9 So you can only take 50 turtles. 10 They take 51, then we have to reinitiate 11 consultation. So we've gone from discretionary 12 to mandatory at that time. 13 There are certain triggers for new 14 information, that the information has changed 15 so significantly that we have to reinitiate it. 16 It goes from discretionary to mandatory. 17 So while we want to work on coordinated timeframes, if we are in that 18 19 situation where it is now a mandatory 20 consultation, the ESA statute sets up the 21 timeframe for those consultations and sometimes 22 we have court orders.

1	And we don't have the time to just
2	defer consultation for more data collection, or
3	for more council process, or for other things.
4	So in those situations, we are not going to be
5	working with you we won't be able to grant
6	every, potentially every timeframe
7	consideration you wanted to undertake.
8	And it may be that we are under such
9	constraints that the council cannot act, and we
10	have to consult anyway. That is not our
11	desire, but we have to reflect that the statute
12	still sets out the endangered species
13	consultation process and we can't set it aside
14	for the Magnuson process.
15	We can try to integrate them. But
16	ultimately for section seven, we're going to
17	have to meet those section seven deadlines.
18	Yes. This is basically the same
19	thing. It's phrased a little bit more harshly
20	than I began, but the reason that we can't do
21	this is that we can't make this stuff
22	mandatory. We will involve the council as we

can. But there are times when we won't be able to.

3 So we can't do this in every 4 instance. All right. So okay. So that was a lot of detail. Happy to discuss that in more 5 depth as we need to. But going forward, we are 6 7 going to be taking all this input and whatever 8 we get from the council discussion today, and 9 we are going to be amending the policy 10 directive to include -- the RPM is not going to 11 -- it is not a viable RPM and requires council action. 12

We are going to be clarifying some of the things we've talked about here in that. We are going to have recommendations in general for ongoing council engagement ahead of time.

We're going to start thinking about -- the PD right now is written in that first scenario, which is the easy one, in it envisions -- there is a new council action that we've never consulted on, and here's how this is going to operate in that scenario.

> Neal R. Gross and Co., Inc. Washington DC

1

1 It doesn't really address the idea 2 of consultation for an ongoing action, where 3 we're going back and looking at the status quo, or the status quo needs to be changed. 4 So we 5 want to clear the PD in those two things, and clearly articulate in that second scenario how 6 7 all of this works. 8 And it can work most of the time, but there will be times when it won't be able 9 10 to work, and then we're going to talk about 11 training both for us and you all, that we can 12 operate under. 13 And where am I, did I skip one. 14 Hold on. All right. So we're going to have a 15 glossary, we're going to talk about the 16 importance, as I said at the very beginning, a 17 pre-consultation and working ahead of time to -18 - just to avoid situations where we might have 19 JAM, that's jeopardy adverse modification. 20 So avoid jeopardy, things well 21 before the consultation starts. We're going to 22 clarify what we can and can't share and under

what conditions we can share. We're going to clarify, like I said, we're going to -- those two things are basically the same. The last two bullets are basically the same.

1

2

3

4

5 So we are working on those 6 revisions. The ESA working group, we intend to 7 meet with you guys directly. And that's a 8 subgroup of CCC. To talk through that and to 9 bring back, my hope is a robust draft policy in 10 the spring for you to look at the whole thing 11 together.

We will take comment from either the CCC or the individual councils on that draft policy before we finalize it. But my hope is that we have one before the CCC meeting, so that at the next CCC, rather than talking about these as separate concepts, we can talk about the whole thing.

19 The other thing I will add is an 20 overlay that -- that we've talked to you all 21 before but is not part of this presentation, is 22 we're in the process of revising the section

145

seven programmatic regulations that we share with fish and wildlife service, that talk about how section seven consultation is -- works in general.

5 We showed a proposed rule of that 6 last spring. We are working on a final rule. 7 To the extent that that final rule changes 8 anything that we do, we're going to offer to 9 come talk with you about that. Or just in 10 general how that gets implemented.

11 So and then we're going to talk more 12 about development of integration and agreements 13 where they don't exist, and about key points of 14 contact because that's been very useful.

And that, sir, is my presentation. I'm sure it was very clear to everybody. It certainly was clear in my mind, but I don't know that everybody -- so I'm happy to take questions.

20 MR. ANSON: Well, I think we'll find 21 out here momentarily.

MR. RAUCH: I think I --

Neal R. Gross and Co., Inc. Washington DC

22

1

2

3

1	(Simultaneous speaking.)
2	MR. ANSON: So
3	MR. RAUCH: know the answer to
4	that question.
5	MR. ANSON: Do we have any questions
6	for Sam and his presentation? Looks like it
7	was pretty clear then.
8	MR. RAUCH: All right.
9	MR. ANSON: So we have the second
10	part of this agenda item, the workgroup, the
11	ESA MSA workgroup. Kitty, are you prepared to
12	go into that?
13	MS. SIMONDS: Yes. Thank you, Sam,
14	for your presentation. I want to make a
15	comment that so every this is just coming
16	from this council. So everything that's
17	happened in the past will no longer happen
18	again.
19	What you just described is the way
20	life is going to be in the future.
21	MR. RAUCH: What I described is the
22	way that we would like life to be in the

future.

1

2	MS. SIMONDS: Well, you know, I
3	didn't want to bring up all the bad things, but
4	so some of it sounds great, and some of it
5	well, let me just say this. Is that first of
6	all, two of the working group members are here,
7	Carrie and Merrick.
8	So they may have things to add. And
9	really, what I was going to go through, I
10	should go through it but the point is that we
11	got your, you know, your PowerPoint, I guess it
12	was Wednesday.
13	And the working group met on Friday,
14	and they, you know, they weren't able to go too
15	far in their discussions and really, our bottom
16	line is that we want headquarters and the
17	working group to meet as soon as possible to
18	talk about all these things that you just
19	described.
20	Because I don't think that we can
21	actually respond to all of this right now in
22	this meeting. We might have some comments, the

members might have some comments.

2	Because we still have these
3	differences on how we both have characterized
4	what the CCC group discussed, and so I was
5	thinking that really if we zip through our
б	slides, it really is reminding everybody that
7	this is what the CCC described.
8	This is what the CCC asked. And
9	we're not there yet. And we hear you, you
10	know, suggestions or recommendations. I know I
11	would have a difficult time discussing and
12	responding at this time. But others may.
13	So I can go through this because
14	what it is, it just documents our relationship
15	on the directive. So maybe I can do that very
16	quickly, Mr. Chair.
17	Okay. So let's see, next slide.
18	Okay. So this is our group that have been
19	working since '21, 2021. So all the councils
20	are represented. Next slide.
21	Then this oh, what is that.
22	Kitty is not used to all this. Okay. So

1	you'll recall that the October meeting last
2	year, we you all, I'm talking about our
3	committee, reviewed the redline version and
4	that's when the working group was developed.
5	So we recommended that NMFS review
б	the version and implement the changes drafted
7	by the working group as soon as possible. So
8	then NMFS said well, we can't be changing the
9	policy until region specific discussions are
10	completed and proceeded to coordinate the
11	regional meetings.
12	So that process has been completed.
13	And Sam just reported in his discussion about
14	that. So then the next slide, so the working
15	group, this is from the working group.
16	And there the overview of the
17	redline changes that you presented to him, they
18	believe is different from how the CCC
19	characterized it. So we thought we'd just
20	recap the characterization of the key changes.
21	So for the number one there, this
21 22	So for the number one there, this would be an extension of the recognition of the

1	council's unique role already included in the
2	policy directive. And addresses the issue that
3	prescriptive RPMs, RPAs, do not provide the
4	councils with the opportunity to develop
5	measures through the normal council process.
6	Then the next square, this addresses
7	the issue of lack of communication and
8	coordination from NMFS, which we've talked
9	about.
10	The next square says this addresses
11	the issue that councils have been told that
12	NMFS did not need to coordinate because there
13	were no RPA's in the buy up.
14	The existing policy directive
15	focuses on working with councils on RPAs and
16	jeopardy situations. So the next square, this
17	was included in there because in the event that
18	disagreements arise on the councils role and
19	involvement, and you talked about that in your
20	discussion.
21	So at the core of these redline
22	changes, was again the recognition that early

1 council involvement and coordination for 2 developing mitigation measures will ensure 3 development of practical and effective measures 4 through a transparent stakeholder base process. 5 That takes into account MSA national standards. So and as you know, I mean, we 6 7 councils have been successful in developing 8 management measures because of the council 9 process that ensures the voice of those who 10 will be at the receiving end of those 11 management measures, be built into the decision 12 making process. 13 And so the intent of our redline 14 changes is to build upon those successes. Next 15 slide, please. 16 And so since the May CCC meeting, 17 the remaining four councils had their regional 18 meetings and highlights from each meeting are 19 compiled in the working groups' report that you 20 have. 21 The regional meetings continue to 22 highlight the importance of working through the

council process to address our issues. And again, the importance of early coordination on section seven.

As -- and we've discussed this, have been at the root of the challenges councils have experienced in recent consultations. And so those issues were addressed in the committee's proposed redline changes to the directive. Next slide, please.

10 So overall, the working group did 11 not see any new significant issues identified 12 through the regional meetings and reiterates 13 the importance of addressing changes to the 14 policy directive.

The working group met last Friday to review NMFS' presentation, which was made available last Wednesday. And they feel that without a companion document, it's difficult -it was difficult for them to evaluate whether your proposed changes were consistent with the intent of the CCC's redline version.

> Neal R. Gross and Co., Inc. Washington DC

And as you showed us earlier, you're

22

1

2

proposing to add new sections to the policy directive, including guidance for coordinating development of RPA's and terms and conditions. But for them, again, no details were provided on what we included. And no timeline.

6 So the next -- so for them, the lack 7 of timeline was disappointing because the CCC 8 has been discussing these priority issues since 9 May 2021. And it has been two and a half years 10 since we first recommended updating the policy 11 directive to improve the process.

12 Next, so the working group suggests 13 -- all right. That the CCC work with NMFS to 14 develop a clear timeline for next steps, as we 15 started this process, as I said, in 2021. And 16 the next square, the working group finds that a discussion with NMFS headquarters staff is 17 18 warranted before further revisions are 19 developed.

20 So that the direction for the policy 21 directive changes are aligned with the intent 22 of the -- of our committee's redline version.

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

1 So then the working groups suggest that such 2 training should occur after changes to the 3 policy directive.

And that's my report form the 4 5 working group. So if, Carrie, if you or Merrick have anything to add to that, you're 6 7 welcome to proceed.

8 MR. ANSON: Any other questions or 9 comments by CCC members about Kitty's report? 10 I don't see any more questions. Do you want to 11 respond?

12 MR. RAUCH: So I'll just say, as I 13 ended the presentation, my desire, my goal is 14 to have a draft of the policy directive for review of this body and the individual councils 15 16 by the next CCC meeting.

17 That -- and we do -- we would like 18 to have our group work with the ESA working 19 group soon, you know, I think we can arrange 20 Tanya is here. You know, she is a key that. 21 work on that. And so she can talk with you 22 about scheduling that discussion.

ĺ	
1	I do recognize that it is difficult
2	to just react to PowerPoints, so I think we've
3	got a lot of good concepts in there. I want to
4	be clear, we are going to try to go as far as
5	we can.
б	We will not adopt everything that
7	the CCC redline wanted us to do. Some of it,
8	we do not think we can do. And we want to be
9	clear about what we can do I mean, our
10	intent is to do as much as we can.
11	But we should work that out and, you
12	know, we're trying to do this in collaboration.
13	So we do want to meet. Now that we've gone
14	through our internal process, it had those
15	reasons which we think were very valuable and
16	did sort of separate out what things need to be
17	a national level process versus what things
18	needed to be a regional-specific issue.
19	There are some things, naturally,
20	that we thought were useful, which is what the
21	policy should be. And so we so these
22	things, I think, largely we can agree to those

that we do want to work with the working group
 on next steps.

3 And the timeline that I just laid out, is the timeline that we want to work on, 4 5 which I think will largely -- I realize that you wish we had gotten to this point sooner, 6 7 but from here, I think that that is a 8 reasonable place for us to go forward. So that's my response to the --9 10 MS. SIMONDS: Right. So this is 11 your first, well, real, not all detailed, but 12 kind of detailed response to the committee's 13 redline version. So we want to thank you about 14 that. 15 And so our request is that your 16 group, your headquarters group meet with our 17 working group as soon as possible so they can 18 understand fully and they'll probably -- you'll 19 probably describe it even more than what you've 20 done here. 21 So that's our request and that is --22 going to be a committee recommendation. Thank

1 you very much, Sam. 2 MO STOPPED 2:13:25 3 MR. ANSON: All right. Any other 4 discussion on this? Kitty, do you have something else? Do you want to go ahead and 5 6 read it? 7 MS. SIMONDS: Okay. So the CCC 8 requests that NMFS meet with the working group 9 as soon as possible to discuss the current 10 draft change to the policy directive, prior to 11 NMFS completing the revisions with regions and 12 general counsel. 13 The CCC further requests that NMFS 14 work with the working group to develop a draft 15 revised policy directive with CCC's 16 endorsement, at the May 2024 meeting. Thank 17 you, Mr. Chair. 18 Is there -- well, MR. ANSON: Okay. 19 I quess we can remove the draft at the head, 20 the first word there. Yes. Remove. Is there a second to this motion? 21 22 MR. REID: Second.

1	MR. ANSON: Is there a second?
2	Eric? All right. Thank you. Is there any
3	discussion on this motion? Oh, if you can just
4	I guess remove the whole the header there.
5	That might be the easiest thing. Yes. It'll
6	just say motion. Yes.
7	So no discussion on the motion? Is
8	there any opposition to the motion? Seeing no
9	opposition, the motion carries.
10	Is there any other discussion or
11	business for this agenda item? All right.
12	Seeing none, we will then move into the process
13	for establishing fishing regulations and
14	sanctuaries. Mr. John Armor. John, are you
15	ready?
16	MR. ARMOR: I am.
17	MR. ANSON: Okay. Great. Do you
18	want to go ahead.
19	MR. ARMOR: Yes, thanks. All right.
20	Well, good afternoon, everybody. I really
21	appreciate the opportunity to talk with you
22	all. For those of you I have not had the

1 pleasure of meeting over the years, my name is John Armor. I'm the director for NOAA's office 2 3 of national marine sanctuaries. I'm a 23 year veteran of NOAA. 4 I've 5 been around for a while, and director of sanctuaries since the last seven years or so. 6 7 And I was invited back in May to talk with you 8 all about the process for issuing fishing 9 regulations in national marine sanctuaries at 10 your meeting in QS. 11 Unfortunately, I had a back issue 12 and could not attend, so I really appreciate 13 your flexibility in having me on the agenda 14 today. 15 So the process in general, I'm going 16 to walk through, but I do want to just 17 acknowledge a couple things before I get 18 started. 19 I know we don't have a ton of time 20 on your agenda, and there's probably going to 21 be questions that you have that maybe you don't 22 want to ask right now, or maybe you want to

1	follow up. I just want to offer for myself and
2	anyone on my team to come and speak with you,
3	either at a council meeting or one-on-one
4	meeting with council staff in the future.
5	So please just consider that an open
6	offer, an invitation to follow up on some of
7	the details and things like that later.
8	I also want to acknowledge some of
9	the sanctuary system team that are here. In
10	the back, we have Matt Brookhart is the
11	regional director for the eastern region, so
12	that is everything east of the Mississippi,
13	basically. Right, Matt? Pretty much?
14	Leanne Hogan sitting right next to
15	him, works on Matt's team in the regional
16	office. And then our director of policy is
17	Jessica Condell back there as well.
18	So we're all available to answer
19	follow up questions and anything that doesn't
20	get addressed today. The other thing I wanted
21	to mention is that, so there's the process in
22	the statute that has not changed for quite some

1 time, you know, 30, 40 years or so. 2 And then we also have guidelines 3 that the agency has issued, and I'm going to 4 talk a little bit about those, but I do want to 5 just acknowledge up front that those guidelines do need to be updated. I'm going to talk about 6 7 that a little bit later. 8 I just wanted, you know, Kelly and I 9 have been -- and our teams have been working on 10 that and part of the benefit of having this 11 discussion today is to get your juices flowing, 12 if you have ideas, if you have thoughts, if you 13 have recommendations that you want to -- want 14 us to take into account as we go to update 15 those guidelines, now is a fantastic time for 16 that. 17 So it's perfect. So I'm sorry, I'm 18 a bit nearsighted. So even -- so this is the 19 national marine sanctuary system for folks that 20 aren't familiar with it. It is currently 15 21 national marine sanctuaries. It's 620,000 22 square miles of ocean and Great Lakes.

1	You can see there also that we are
2	in a time of growth, admittedly, in the
3	sanctuary system, and we have we are working
4	on the designation for six new national marine
5	sanctuaries, and those are indicated on the map
6	there as yellow squares. I won't go into them
7	but that's so that's the sanctuary system as
8	it exists right now.
9	Our mandates are multifaceted. We
10	do have a regulatory mandate, but frankly, that
11	is not really what we lead with. Our program
12	is heavily reliant on our ability to conduct
13	public outreach and education within the
14	communities that we serve.
15	So we don't have a philosophy we
16	don't have a regulate first kind of philosophy
17	in sanctuaries. It really is first and
18	foremost about educating the public and
19	increasing public awareness about the
20	importance of ocean and Great Lakes
21	conservation.
22	We work a lot with schools, K
	Neal R. Gross and Co., Inc.

through 12 education programs, et cetera. Research and monitoring is also a key mandate of the sanctuaries. So once a sanctuary is designated, we work very closely with our partners inside and outside of NOAA to conduct the research and the monitoring that's needed to make management decisions in the sanctuaries.

9 And much of that is done in
10 collaboration with the regional fishery science
11 centers. But also with other parts of NOAA,
12 the National Centers for Coastal and Ocean
13 Science, or NCOS, does a lot of the science
14 work, as well as partnerships with
15 universities.

And then we do also under resource protection. Those would include things like putting mooring buoys out and you know, those kinds of things to help reduce impacts to sensitive resources, like coral reefs you see there in the upper left-hand corner. And then filtering on all of that is

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

5

6

7

community engagement. So all of this is done through the lens, we have sanctuary -- national marine sanctuary advisory councils for each of the advisory councils and some of the proposed advisory councils.

And all told, there's probably over 5, 600 people that volunteer their time to provide regular ongoing advice to the sanctuary superintendents. And they form their connections liaisons to the communities.

And by the way, include some council staff at many of the sanctuary advisory councils.

So we also have over the years engaged with the fishery and management councils in a number of different ways that is, you know, beyond just the, you know, fishing regulations.

So we've worked with them on education programs as I said. We have fishery and management council representatives sit on sanctuary advisory councils. And then we have

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

also worked with them and supported broader efforts that are out -- that don't really have to do with sanctuaries, per se, but like this example, this first bullet up here, the Pacific Fishery Management Council, this was years ago. I'm blanking on the year.

1

2

3

4

5

6

7 I want to say maybe 2007, '08, or 8 something like that. Had a commercial krill 9 harvest ban and that was something that we 10 worked very closely with them on.

11 Okay. So with that out of the way, 12 now we can kind of dig into I think what you 13 asked me to come here and speak about, which is 14 section 304(a)(5) of the National Marine 15 Sanctuaries Act. You can read the words there 16 on the screen.

But in a nutshell, this -- at least the way I read this, is if the -- if NOAA feels that to implement a national marine sanctuary, either it's a new designation, or an existing sanctuary, we -- there's a process for that. And that process is to work with you

all through the regional fishery management councils to first explain what it is we're trying to achieve with the sanctuary designation.

And have the sanctuary -- sorry, the regional fishery management councils take that first opportunity to draft regulations. And by the way, that also applies to amendments, so that, you know, so if there's -- if something changes in the future, that same process, you know, falls into place.

12 So those are the words that the sanctuaries have, of course, I can come back to 13 14 this if there's any questions. But I just 15 wanted to have -- the words are up there. And 16 I don't -- you guys have materials, I assume, 17 so you can all see this in front of you. 18 So now I'm kind of getting into a 19 little bit of the interpretation and 20 operationalization of 304(a)(5) in practice. 21 And this flow diagram is our attempt to sort of 22 illustrate that. This flow diagram is coming

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

www.nealrgross.com

1	from a 2008 guidance document that the agency
2	put out years ago to try to, for lack of a
3	better word, sort of interpret 304(a)(5).
4	And so basically, the way the
5	process works is it started at the it
6	started with NOAA. NOAA submits a package to
7	the appropriate regional fishery management
8	council. Fisher management that package
9	would include goals and objectives that we're
10	trying to achieve and any other, you know,
11	documentation that would, you know, support
12	that.
13	Then the regional fishery management
14	council would then consider that request, and
15	ostensibly, there's three potential responses.
16	One is to do nothing, which you can see there
17	on the right. One would be to another
18	option would be to affirmatively respond that
19	in fact, that the fishery management council
20	does not think fishery additional fishing
21	regulations are needed.
22	And then the third option is to go

1 ahead and draft those regulations. NOAA then 2 is to take that response, ask any questions, 3 you know, of course, in the mix there, we're, you know, attending fishery management council 4 meetings, answering any questions, having 5 meetings on the side, those kinds of things. 6 7 And then we either feel that the 8 action -- the response meets the goals and 9 objectives, or we don't. 10 So the guidance I mentioned a couple 11 of times is a little bit out of date and it's out of date, you know, so as you can see there, 12 13 it was I think signed and put in in 2008. And 14 at the time, the sanctuary system and NOAA was 15 really focused on making what I would call sort 16 of tweaks or adjustments to existing sanctuary, 17 some of which had been at the time, had been 18 around for 30 or more years. 19 And the guidance kind of -- and we 20 were not designating new sanctuaries in 2008. 21 And so the quidance sort of reflects that 22 mentality of really just focusing on that. And

1	frankly, we did not focus on sanctuary
2	designation.
3	So obviously, that's more timely
4	today. So I think that's something that we
5	need to work on. I think the and in that,
б	there are other things that have come up, come
7	into question that we hadn't thought of in
8	2008.
9	Some of the things like around the
10	timing, and some of it is has to do with how
11	the sanctuaries act is written, especially with
12	the goals and objectives, and the timing of
13	when those goals and objectives become final,
14	officially.
15	And so now is a good time to update
16	this guidance. So as I said, so Kelly and my
17	team are working on an update to this 2008
18	guidance that addresses these and any other
19	issues that you all might have.
20	So now's a good time. If you have
21	questions or concerns, or things that we can
22	think of to make that guidance better, more

effective, more efficient, clearer, more
 transparent, et cetera, this is the perfect
 time to do that.

4 And these are just resources. So 5 I'm going to stop there and then maybe look in 6 the back and see if Matt and Jessica have 7 anything you want to add to that before -- or 8 then -- okay. Then I think we can open it up 9 for questions, and I can take these glasses off. 10 11 MR. ANSON: All right, thank you,

John. I see we do have some questions.Angela.

MS. DROBNICA: Thank you. Thank you, Mr. Armor. So wondering if you could expand a little bit on your thinking on timeframe for the updated guidance changes, and indication of how best to incorporate input from regional councils.

I'm sure some will be very interested in reviewing and whether or not you're going to highlight specific areas that

1 you're thinking of updating, as well as maybe some discussion around the table about how to 2 3 get CCC input. 4 MR. ARMOR: Sure. 5 I think that's how MS. DROBNICA: 6 you started off here, your presentation. 7 Thanks. 8 MR. JAMES: Yes. I'm happy to. Ι 9 mean, I would, honestly, I hate to boomerang 10 questions, but on the first one, I would really 11 defer to you all in terms of how you want to 12 provide input. 13 I mean, we can certainly take it 14 today here and now, or you know, you could hear 15 it, go back, and then provide, you know, input, 16 you know, through the local folks if you want 17 to do it that way. 18 It's really up to you. I think 19 either is fine with us. 20 MS. DROBNICA: I don't want to speak 21 for everyone. This is my first meeting, but I 22 feel like we would need some more time.

1	MR. ARMOR: Yes, of course.
2	MS. DROBNICA: Before we review the
3	guidance. We just want to make sure that
4	that's aligned with whatever time in your
5	you're thinking about here.
б	MR. ARMOR: We really don't have a
7	specific time driver here. Right? Yes, we
8	don't. So we're happy to take our time. We
9	don't, I mean, so we don't this isn't
10	something that needs to take, you know, happen
11	this year. I mean, this calendar year.
12	I mean I think ideally, I think for
13	all of our sake, it would be, you know, I think
14	something that we would want to have done at
15	least next fiscal year. But we don't need to
16	rush this, so I would say I think our
17	preference is let's take our time on this.
18	You take your time to sort of digest
19	it. Give us an opportunity, go back to your
20	councils, have conversations there. Have
21	conversations with our folks in the regions.
22	Answer any questions and then you can we

can, you know, get input that way.

1

2	So but to your second question, in
3	terms of specific areas that we're updating. I
4	mentioned the one about the timing of the goals
5	and objectives. And vis a vis, sanctuary
6	designation versus existing sanctuaries.
7	Because that is a significant difference.
8	I acknowledge, you know, with an
9	existing sanctuary, there's a body of work.
10	There's already an advisory council in place.
11	There's always relationships and there's
12	established and more importantly, for this
13	discussion, there's established goals and
14	objectives.
15	With a sanctuary designation,
16	technically, sanctuary the goals and
17	objectives for that sanctuary aren't final
18	until the final rule is published. So I
19	acknowledge that does create a little bit of an
20	awkwardness, and I think that's something that
21	we would be seeking to clarify and make more
22	effective in the guidance.

1	In addition to that, we also in 2008
2	did not have a sanctuary nomination process.
3	You know, we've had some conversations about
4	that over the last couple of years or so. And
5	the sanctuary nomination process is I didn't
б	cover in this presentation. It's totally
7	different.
8	It's not there's no fishing
9	there's no regulations at all, let alone
10	fishing regulations associated with a sanctuary
11	nomination. And so the there isn't a
12	304(a)(5) process with a sanctuary nomination.
13	There only would be if the agency decides to
14	take that forward in a sanctuary designation.
15	So I think we would seek to clarify
16	that in this process as well. That was kind of
17	the main things, weren't they? Yes. Those are
18	really kind of the main things, at least that
19	we thought of. But obviously, you know, there
20	may be other things that you all and your
21	councils have other concerns or questions that
22	may be appropriately addressed to these

guidelines.

1

2	MR. ANSON: Eric.
3	MR. REID: Thank you, Mr. Chair, and
4	thank you, Mr. Armor. So I do have some
5	concerns, and I have two questions. Maybe you
6	can help me to alleviate my concerns. So on
7	the East Coast, we have the Hudson Canyon
8	sanctuary, which is now in process.
9	And that advisory council met
10	yesterday, and the results of that meeting were
11	a little bit concerning. It sounds like to me
12	that that timeline is extremely compressed,
13	which means outreach is going to be compressed
14	as well.
15	So my first question is what's going
16	on in the Hudson Canyon, and then the reason
17	that I have additional concerns is, it was
18	mentioned earlier that I got to testify in
19	front of a subcommittee on the 19th of
20	September, but there was also some testimony by
21	Assistant Secretary Bavishi about the PRIA
22	sanctuary.

1 And she said, basically what she 2 said after she was guestioned about the PRIA, 3 was I want to state for the record today that we have not made any decisions regarding the 4 5 proposed sanctuary. Where we are in the process is 6 7 developing alternatives that are available for 8 public comment within the DEIS. And that we 9 plan to release that in the spring of next 10 year. 11 Those alternatives will consider 12 both regulatory actions but also different 13 options for boundaries of the sanctuary and no 14 decision has been made right now about 15 prohibition of commercial fishing. 16 Well, what is concerning to me is 17 there was a letter sent from NOAA to the 18 chairman of the Western Pacific council back in 19 June, June 23rd. And that letter states that 20 NOAA believes the current regulations for the 21 Pacific Remote Islands Marine National 22 Monument, that's 50 C.F.R. 665, subparts (e)

1	and (h), which are a complete prohibition on
2	commercial fishing.
3	If applied to the full extent of the
4	proposed sanctuary, it would be consistent with
5	the goals and objectives of the proposed
6	sanctuary.
7	Now, Ms. Bavishi's comment addressed
8	step four. But the letter three months prior
9	addressed step six. So that's why I'm
10	concerned. I'm concerned about that so I'd
11	like to know which one is true as far as the
12	PRIA's go.
13	But I'd like to know why is the
14	Hudson Canyon timeline so compressed, because
15	I'm concerned that you're two steps up and one
16	step back, which I don't care for. So maybe
17	you could help me with that. Thank you.
18	MR. ARMOR: Yes. I'm happy to.
19	Yes. Yes, thanks for the question, Eric. And
20	I'll invite Matt to come up and answer the
21	Hudson Canyon question, if that's okay.
22	But the PRI question is, you know,

so the initial letter that we sent to the Western Pacific Fishery Management Council, you're right. You quoted it accurately. But and I think, admittedly, what was confusing was what was omitted. It wasn't an assumption that's the only way you can be consistent. I think we were giving guidance that that would be a way to be consistent. And I think subsequent to that letter, you know, we've had a number of conversations with council staff, as well as we had a oh, hey. We had a workshop in American Samoa where I think we got additional clarity on you know, on that question. Sand I think that's what fed into Ms. Bavishi's response on The Hill, is that in fact, that's right. We haven't made a decision. The process is playing out. If I'm being honest with you, the PRI process is expedited. I'm not sure I would agree that the Hudson Canyon is, at least not intended to be,		
<ul> <li>you're right. You quoted it accurately.</li> <li>But and I think, admittedly, what</li> <li>was confusing was what was omitted. American Samoa where I think we got additional clarity on you know, on that question. And I think that's what fed into Ms. Bavishi's response on The Hill, is that in fact, that's right. We haven't made a decision. The process is playing out. If I'm being honest with you, the PRI process is expedited. I'm not sure I would agree that the	11	conversations with council staff, as well as we
<ul> <li>14 clarity on you know, on that question.</li> <li>15 And I think that's what fed into Ms.</li> <li>16 Bavishi's response on The Hill, is that in</li> <li>17 fact, that's right. We haven't made a</li> <li>18 decision. The process is playing out. If I'm</li> <li>19 being honest with you, the PRI process is</li> <li>20 expedited.</li> <li>21 I'm not sure I would agree that the</li> </ul>	12	had a oh, hey. We had a workshop in
And I think that's what fed into Ms. Bavishi's response on The Hill, is that in fact, that's right. We haven't made a decision. The process is playing out. If I'm being honest with you, the PRI process is expedited. I'm not sure I would agree that the	13	American Samoa where I think we got additional
Bavishi's response on The Hill, is that in fact, that's right. We haven't made a decision. The process is playing out. If I'm being honest with you, the PRI process is expedited. I'm not sure I would agree that the	14	clarity on you know, on that question.
<pre>17 fact, that's right. We haven't made a 18 decision. The process is playing out. If I'm 19 being honest with you, the PRI process is 20 expedited. 21 I'm not sure I would agree that the</pre>	15	And I think that's what fed into Ms.
18 decision. The process is playing out. If I'm 19 being honest with you, the PRI process is 20 expedited. 21 I'm not sure I would agree that the	16	Bavishi's response on The Hill, is that in
<pre>19 being honest with you, the PRI process is 20 expedited. 21 I'm not sure I would agree that the</pre>	17	fact, that's right. We haven't made a
<pre>20 expedited. 21 I'm not sure I would agree that the</pre>	18	decision. The process is playing out. If I'm
21 I'm not sure I would agree that the	19	being honest with you, the PRI process is
	20	expedited.
22 Hudson Canyon is, at least not intended to be,	21	I'm not sure I would agree that the
	22	Hudson Canyon is, at least not intended to be,

compressed or expedited. So you know, so I think what we're -- where we are right now with the PRI designation, is you know, we're still -- we just, I think last week, or two weeks ago, we got a sort of preliminary read from the Western Pacific Fishery Management Council as to our request.

8 That NIC -- I think Will's down 9 there. Yes. He'll correct me if I'm wrong 10 here, was that you know, the initial read was 11 we feel like we, the Fishery Management Council 12 feel like the existing fishing regulations are 13 sufficient to meet your goals and objectives.

14 So that letter has been received, 15 and now we're continuing to engage staff to 16 staff with them on that as well as where the 17 main issue, at least from a fishery standpoint, 18 was in American Samoa, where we are concerned 19 about potential impacts on, you know, 20 processing and related jobs impacted there in 21 American Samoa.

22

So I know I'm not answering your

1 question directly. It's -- we're in the process, so we're open to hearing not just from 2 3 the Western Pacific Fishery Management Council formally, but also informally through members 4 and through the, you know, from the American 5 Samoan government and others on that one. 6 7 And I hate to throw you under the 8 bus, but I don't know if you wanted to respond 9 to Eric's comment on Hudson. 10 MR. BROOKHART: Yes. Again, my name 11 is Matt Brookhart, I'm the Eastern Regional Director for Office of National Marine 12 13 Sanctuaries. So I guess I'm confused a little 14 bit about what the comment -- comments were 15 meant by expedited process for Hudson Canyon. 16 Where we are right now is a 17 projected date of release of draft 18 environmental impact statement, proposed 19 rulemaking, draft management plan, in summer of 20 2024. 21 I think if we've heard any comments 22 on that timeline, that -- from some of our

1 stakeholders, that that's taking too long for 2 draft documents. So I have not heard any 3 comments about that process being moved too quickly or we certainly have not taken a 4 5 position of expediting it formally. MR. REID: Yes, no. I just was 6 7 getting feedback from the people that we have 8 on that -- that we know, we meaning some 9 councils. They just thought that it -- it seemed like it was a little bit accelerated and 10 11 you know, so I just, I wanted to get clarity on that. 12 13 So and one more thing before I let 14 go of the mic. Yes, go on. Well, actually, 15 it's up to the chair. 16 MR. MOORE: Sorry to interrupt. 17 Just to add clarity maybe to help with this 18 concern that Eric is expressing. I was on that 19 -- in that meeting the other day and there's 20 some question about the steps. I don't have the document in front of me. 21 22 At some point in the process, you

1 asked the councils about fishing regulations. 2 And that request, the way that it's listed, 3 suggests that documents were produced that 4 indicate what you might want to, you know, what 5 you're proposing before -- oh, I'm sorry. Before you know, you asked for the 6 7 councils to respond relative to fishing 8 regulations. But we've already had that 9 request, you know. 10 MR. BROOKHART: Correct. 11 MR. MOORE: In the Mid-Atlantic council and New England council have already 12 13 provided responses. 14 MR. BROOKHART: Correct. 15 MR. MOORE: So I think that's where 16 the concern is, is that somehow things are 17 expedited and things are different for Hudson 18 Canyon. 19 MR. BROOKHART: Oh, I see. Okay. 20 So and thanks, Eric. I appreciate that Yes. 21 question. So and thank you for that 22 clarification.

1	So yes, because this is a new
2	designation, we did choose to go forward to the
3	Mid-Atlantic, New England council and South
4	Atlantic councils as well, and HMS, the HMS
5	panel to request per 304(a)(5), as John has
6	just laid out, input on the question of whether
7	or not the councils believed new fishing
8	regulations were warranted per the goals and
9	objectives.
10	We have received responses from all
11	of those councils, and across the board, as you
12	might guess, all the councils felt that, no,
13	new fishing regulations were not warranted.
14	The reason we did that early on in
15	this new designation is so that we have that
16	information from the councils as we develop our
17	environmental impact statement and proposed
18	rulemaking.
19	It's fundamentally informative for
20	us to have that information now. I will also
21	add that that, the consensus of the four
22	councils comports with the original nomination,

1 which felt that and argued to NOAA, that no new 2 fishing regulations were warranted for Hudson 3 Canyon because the FMC's and the National 4 Marine Fishery Service, the regulations that 5 were currently in place were in fact meeting the goals and objectives. 6 So we wanted that information to 7 8 inform the draft documents that will go out for 9 public review. 10 MR. REID: And I think signed one of 11 those letters. MR. BROOKHART: You did. You did. 12 13 MR. REID: As it turns out. Okay. 14 I appreciate it. 15 MR. BROOKHART: And thank you for 16 getting that back to us quickly, which you did 17 as well.

MR. REID: Yes, no sweat, I just -my one small request and I've asked it before is in your three step process, it says councils will develop, will develop, as opposed, yes. Determines fishing regulations are not

necessary.

1

2 I don't really care for that. Ιt 3 should say that fishing regulations that are already in place are good enough. 4 5 MR. BROOKHART: Yes. 6 MR. REID: Because that -- they say 7 two very different things to --8 MR. BROOKHART: Fair enough. 9 MR. REID: -- in my mind. So okay. 10 Well, thank you. I'm done, Mr. Chair. Thank 11 you, and thank you gentlemen. I appreciate it. MR. ARMOR: 12 Thank you. 13 MR. BROOKHART: There's one other 14 thing I would just like to add that John 15 mentioned a few minutes ago, and that's about 16 this question of goals and objectives. And in 17 the case of this new designation, goals and 18 objectives are part of the requirements that we 19 have to put together, which we not only sent to 20 you all, but we put out for public consumption. 21 What are the goals and objectives 22 for this new designation. In the case where

goals and objectives might change, and in our 20 years, plus years of being here, that has never occurred. But in the case where goals and objectives would change, we believe that that would trigger then a requirement to go back out with 304(a)(5).

7 MR. ARMOR: And that's also
8 something that could be, that's also something
9 that could be clarified in updated guidelines.
10 MR. ANSON: Merrick.

MR. BURDEN: Yes. Thank you. Just to consider -- continuing along this line of thought, I'll start off by saying we all really appreciate the relationship we have with Bill Duros and the Pacific Coast office, and it functions pretty well.

17 In the process of designating the 18 Chumash Sanctuary, I think we tripped up a 19 little bit in the same way that our colleagues 20 on the Atlantic have done. You all probably 21 saw the letters, the correspondence that we 22 received from the Pacific Coast Sanctuary

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

5

6

saying, you know, we're looking for council input at this early stage in the designation process.

And our response was something like 4 5 didn't expect this request at this time. In hindsight, I think we appreciate that 6 7 opportunity to weigh in early. What I think 8 would be beneficial is that as we go through 9 the designation process, if we get to a point 10 where the sanctuaries disagree with the 11 council, so in our case, we said we have, you 12 know, a lot of fishing regulations at the 13 moment that appear more than adequate to help 14 meet sanctuary objectives.

15 If there's a disagreement, 16 presumably it would come back to the council 17 with more specificity about that purpose and 18 need. And we didn't -- I don't think that will 19 be necessary here, but in the future, if it is, 20 I think that would be helpful to bake into this 21 flow diagram.

MR. ARMOR: I really appreciate

Neal R. Gross and Co., Inc. Washington DC

22

1

2

3

1	that. And totally agree with your
2	characterization. It's related to, you know,
3	Matt's response as well a minute ago. I mean,
4	I think, you know, the Sanctuaries Act, if you
5	read that language, I think what in the past,
6	the way we had interpreted it, was if NOAA felt
7	like there was a need for sanctuary
8	regulations, then we would start the or kick
9	off the 304(a)(5) process.
10	However, the way the language of the
11	Act actually doesn't really read that way.
12	It's no matter what. If you're in a
13	designation, you need to get you need to
14	consult with the Fishery Management Council.
15	So to your point, and I, you know,
16	we have to no matter even if we don't
17	think fishery new additional fishing
18	regulations to implement the sanctuary
19	designation are needed, we still have to ask.
20	And so that's the ask that, you
21	know, that you got from Bill and that, you
22	know, that Matt, you know, did to the councils

on the east side.

1

2	So it does create that timing
3	awkwardness. Though with because the
4	sanctuary could evolve, but to match point, I
5	think what we would do is if the goals and
6	objectives were to change after that initial
7	ask, you know, we would go back, you know, go
8	back to the beginning and start over again and
9	reengage.
10	But also to Matt's point, you know,
11	in our history, at least with sanctuaries, you
12	know, over the last several years, sanctuary
13	designations. The goals and objectives haven't
14	changed. But certainly, they could. So that's
15	a it's a good question. So we'll be sure to
16	address it in the guidelines.
17	MR. ANSON: Ms. Drobnica.
18	MS. DROBNICA: Thank you. Yes. I
19	completely agree with Mr. Merrick as well. In
20	the case, and if I interpreted them correctly,
21	so he was kind of he was speaking in
22	addition to what John was referencing in the

1 case that regulations are rejected under the 2 existing goals and objectives. 3 That there's some type of feedback with going back to the council. And another 4 5 opportunity to have that discussion and revisit. 6 7 I also -- I just want to clarify and 8 this is -- this might -- may be obvious, but 9 you know, if we reach the right hand corner 10 section where our -- where regulations are 11 declined or rejected, that there's more public clarity that the Sanctuary Act would indeed 12 13 take precedent over MSA at that point. 14 And that the -- I think that that 15 would clarify a common concern and question 16 amongst the public about how -- what happens at 17 that point that the Sanctuary Act does actually 18 trump MSA and the councils authority if those regulations are deemed in conflict with the 19 20 goals and objectives of the Act. 21 MR. ARMOR: I'm really sorry. Is 22 there -- was --

MS. DROBNICA: I guess
MR. ARMOR: Is there a question?
MS. DROBNICA: You can correct me if
I'm wrong on that, but I don't know if that's
explicit in the existing guidelines or Act
right now.
MR. ARMOR: It isn't. And so that
you know, I think some clarification and
transparency there is warranted. So I think
that's something that we could tackle. Yes.
MR. ANSON: Dave.
MR. WITHERELL: Thank you, Mr.
Chairman. Thanks, John. I appreciate you
coming here again explaining this to the
councils. I'm trying to think about having a
process where the councils can weigh in on your
draft, whether it's some ideas you want to
float by the councils on how you plan to
address all these concerns we just talked
about.
Of if we need something a little
more formal through a workgroup or a scheduled

1 meeting with the executive directives, which 2 could just be an interagency call to discuss that openly, or what the plans are. 3 Or would you rather have -- send us 4 5 the draft that you're thinking and have us formally comment as a council. How would it 6 7 work best for the NOS? 8 MR. ARMOR: That's a great question, 9 I -- honest, I mean, we're pretty Dave. 10 flexible. I mean, I think -- I know the 11 councils have very full agendas and you all 12 have very busy schedules. So I think we're, 13 you know, willing to meet you where it's 14 easiest for you to comment on these things. 15 And like I said, we're not in a huge 16 rush to do this. Well, I don't know if you 17 have any preference, but -- yes. I mean, I 18 guess again, I hate to boomerang questions, but 19 I -- you know, I mean, is there a preference, 20 do you think, you know, in terms of how you 21 would like to engage in this and then provide, 22 you know, feedback on it.

I		T
1	MR. WITHERELL: I think the	
2	Executive Directors are really your best point	
3	of contact. And so I would suggest that when	
4	you get to the point where you're considering	
5	some changes in the guidelines that you let us	
6	know by email and then we will discuss and	
7	figure, probably, the best way to communicate	
8	back to you, either through a virtual meeting	
9	or have something in writing for you.	
10	MR. ARMOR: Got you. Sounds good.	
11	MR. ANSON: Peter.	
12	MR. HASSEMER: Thank you, Mr. Chair.	
13	And thank you, Mr. Armor for the presentation.	
14	First, I want to also express my compliments to	
15	the West Coast staff, Bill Duros, we went	
16	through, I think as you know, the PRI and	
17	Chumash National Heritage Sanctuary	
18	designation.	
19	It wasn't a perfect, you know,	
20	experience, but our council has a pretty good	
21	collaborative working relationship with	
22	sanctuary staff. And in that particular	

1	example, what I highlight is that you know, at
2	the start of the process, we didn't I'm glad
3	you're updating or looking at the guidelines,
4	because we didn't get much to look at when the
5	letter came, and to respond to in that process.
б	But in looking at the what the
7	applicants for the sanctuary had submitted,
8	part of that sanctuary, what they identified,
9	was the maritime heritage commercial fishing as
10	being part of that. And wanted to capture that
11	and continue it.
12	And as they went through the
13	sanctuary process, at least the proposed rule
14	that I read in the EIS captured that very well.
15	And signifies that commercial fishing as part
16	of the maritime heritage, the subsistence
17	fishing as a cultural heritage, are very
18	important components, and it does offer
19	mechanisms to protect that, to keep it ongoing.
20	But in the process of doing that,
21	maybe a trivial point, appreciate Mr. Reid's
22	comment about the language there, you know. We

1 didn't have much to go on. We reviewed it and 2 in our council process in the area the heritage 3 was looking at, or the sanctuary was looking at, we have 100 plus or minus managed species. 4 5 There's EFH, there's conservation There's prohibitions in some areas on 6 areas. 7 deep water trawling. And a whole host of 8 things. So we got to that point, if commercial 9 fishing was going to be a part of the 10 sanctuary, they didn't, at that time, we didn't 11 need any further regulations. 12 So we didn't need to propose 13 anything. When I read the EIS, the EIS notes 14 that through two public meetings, the council 15 decided not to do it, not to recommend any 16 regulations, and NOAA accepted that. 17 So that put us in that left bottom 18 corner, which I think is pretty accepted. And 19 the language in EIS says NOAA accepts the council's determination. 20 21 When you get to the proposed rule, 22 it says the council declined to recommend any

1 regulations, which, you know, I think puts us 2 over on the other side, and a little trivial 3 thing, but it's a misuse of the word decline as it's used in the Act, that we went through a 4 5 pretty deliberative process, and maybe we didn't express that very clearly to the 6 7 sanctuary, that there wasn't a need for additional regulations. 8

And it, you know, I looked at this 9 10 thing, well, it's just a schematic, but the 11 language carries through in the EIS and the 12 proposed rule, and these federal documents. 13 And so there's some connotations in the future 14 that, you know, how do people interpret that. 15 And so, you know, to be frank, I 16 thought it was a little disrespectful to our 17 process to NMFS and what they do under the MSA. 18 So it's good to hear you're looking at revising 19 those regulations, or excuse me, the

20 quidelines.

21 As I hear you talk about it, it's on 22 the front end for a proposed designation in

1 that process, but I guess I think you should 2 also think about application of that. After a 3 designation occurs for a sanctuary, your first slide showed up there that amendments to any 4 regulations, and I assume that applies to that. 5 But as I look through other 6 7 documents that are available and in our 8 materials, there was a handout that frequently 9 asked questions. I think it's a sanctuary 10 document that was posted in May, and there's 11 two uses of the same statement in there. 12 It says, and it's about developing 13 regulations in the proposed process and once a 14 sanctuary is established. The same sentence, 15 but in one area it says outside of the 16 304(a)(5) process, the council may continue to 17 manage fishing. 18 And the other place, it says the 19 council will manage to -- will continue to 20 manage fishing. Big difference between will 21 and may. So I went back to the Sanctuary Act 22 to see what that says, and I looked in the

Chumash and it's a little bit across the map. 1 2 And I think it gets back to what 3 you're trying to do with updating the current quidelines, is what is the process afterwards, 4 5 and we haven't discussed this with our council and with my colleagues, you know, we'll 6 7 certainly get some comments. 8 But I think you should think about 9 the same thing that if the intent is as stated 10 in the Act, that post-designation, the same 11 process is followed, which is the 304(a)(5). The first landing spot is with the councils, 12 13 that it comes to the council for consideration 14 about the need and not leaving it vague that 15 there are other processes that may or may not 16 occur out there. 17 So you know, the wording has 18 impacts. And the process and how it occurs, 19 and the clarity of that, and applying once the 20 quidelines are set, making sure they're 21 followed and implemented, helps the process. 22 And it helps across -- equity across all the

1 councils. So thank you for that. 2 MR. ARMOR: Yes. Thanks for the 3 question and the recommendation. Yes. And apologize if we were, you know, not as precise 4 5 with our wording. But just to be clear, so there's no 6 7 ambiguity at all, with regard to Chumash 8 Heritage, we did accept, so we're in that lower 9 left-hand corner. We did accept the council's 10 recommendation for that designation. 11 And yes, apologies for using maybe 12 using the word decline incorrectly in that 13 So my apologies. We'll need to -- we'll case. 14 clean up when we make our way to the final 15 designation materials. Absolutely. 16 And appreciate your recommendation 17 on the guidelines as well, with regard to post-18 designation changes to the sanctuary. And that 19 is, you know, at least in my mind, and I know 20 Matt, we all feel the same way. I think it's 21 pretty clear in the Act that that was what was 22 intended, and that's how we've always done it

is that post-designation, if there's a new need 1 2 that comes up, we start with 304(a)(5), start with, you know, the reach to the Regional 3 Fishery Management councils. 4 5 But I think clarifying that in the guidelines is a good suggestion. So I 6 7 appreciate that. Is there anything you wanted 8 to add? 9 MR. BROOKHART: I would just add 10 that your comment is fascinating, actually. 11 Because I think what we're talking about is 12 semantics here. But this is very helpful. And 13 I know I can speak for Bill to say that the 14 intent in using the word decline was not to 15 suggest that you took -- you didn't do 16 anything. 17 But in fact, the council took action 18 to suggest no new regulations were needed. So 19 that's very helpful. I think that'll be very 20 helpful for new sanctuaries on the East Coast 21 as well. But I just wanted to underscore what 22 John said and agree strongly that any new

1	proposals for fishing regulations post-
2	designation, would require us to go through
3	304(a)(5).
4	And that's how we all view it.
5	MR. ANSON: Andy other yes, sir,
6	will.
7	MR. SWORD: Oh, sorry, Janet.
8	MR. ANSON: Janet.
9	MR. COIT: You go first, Will. I'll
10	go after. Oh, I just wanted to this is
11	truly a question because of my relative short
12	tenure. To what extent when since Will just
13	had his hand up, you know, something like the
14	Pacific Remote Islands, that happened suddenly.
15	I can say that many of us weren't
16	expecting it. How much exchange is there and
17	are you willing to have with council staff,
18	certainly NOAA fisheries has ready access to
19	the ocean service.
20	But you know, as they try to sort
21	out some of this, or for instance, you know,
22	moving forward, wanting to know whether

1 regulations or a decision, that new regulations 2 are not needed, you know, how that comports, or 3 what type of reaction they'll get from the 4 ocean service. 5 So I guess I'm asking the degree of interaction and accessibility at different 6 7 stages of the process. 8 MR. ARMOR: Yes, Janet. Great 9 question. I mean, I'll just start off by 10 saying, you know, I think the PRI thing was a 11 surprise to me too. I think Will heard me, you 12 know, at the workshop in American Samoa, you 13 know, start off my closing with it wasn't on my 14 to-do list when we started the year. 15 And you know, frankly, at the time 16 when we heard about it in March or April --17 March. You know, we were so -- we were in the 18 process of designating five sanctuaries. So it 19 wasn't on our short list, but -- and it did 20 come rather suddenly and unexpected for us as 21 well. 22 So I'll just, you know, agree with

Neal R. Gross and Co., Inc. Washington DC

www.nealrgross.com

1 you on that one. But to your question, 2 absolutely. I mean, I think we're -- and I 3 would primarily lean on the regional folks in sanctuaries to, you know, as you know, as Eric 4 and Peter were just talking about the 5 relationship with Bill Duros. That's Matt's 6 7 counterpart on the West Coast. 8 My expectation is that Matt and Bill 9 and Christina as their counterpart in the 10 Western Pacific, is that they are engaging with 11 the councils either -- and however, I don't 12 need to -- I don't necessarily need to, you 13 know, determine exactly how that interaction 14 takes place. 15 I think that, you know, is going to 16 vary from council to council and from site to 17 Whatever works best. But I think site. 18 building those relationships, building that 19 trust, and having that interaction so that each 20 is aware of what's going on in this regions 21 before these things, to the extent that's 22 possible.

1	Obviously, with PRI, that wasn't
2	because we didn't know. But you know,
3	absolutely. I think that we're available, you
4	know, just as you all are. With the National
5	Marine Fishery Service, I think we also lean on
б	our colleagues in the in your, you know, in
7	the National Marine Fishery Service in the
8	regional offices, and at headquarters as well
9	to make sure that we have a as complete as
10	possible understanding of what's going on,
11	what's on the fishery management councils
12	plates.
13	And you know, what kinds of things
14	would need to be, you know, discussed
15	beforehand, that kind of thing. So, yes.
16	MS. SIMONDS: I should just respond
17	to him. Christina and I actually have a
18	longstanding relationship. She used to work
19	for Senator Inouye a long time ago.
20	So we have tried to keep each other
21	informed, but normally, I'm asking like you
22	know, can we meet, can we talk, what's

happening. And I frankly learned more from the regional office because the regional office and the sanctuary office have been working closely together.

5 So I do have to ask for information, and that's when I learned what you said 6 7 earlier, John, about -- that you conveyed, that 8 you all conveyed to us that the -- there are 9 interpretations, we could look at what your 10 goals and objectives have said, which is, let 11 me just say this, uphold and complement the 12 existing management of the Pacific Remote Islands Marine National Monument as outlined in 13 14 Presidential Proclamation whatever.

So you know what that means. That means total closure, no fishing, nothing. So then we heard when I asked what's going on, well, you know, we could interpret it as not being total closure, no commercial fishing.

20 So you know, we learn these things 21 as we're going along, but we're looking at the 22 document that you sent us, that we are

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

206

responding to by December 20th, and that's what it says. And as far as I'm concerned, that's what it means, and that's what our lawyers say it means.

5 Exactly like the monument, which is 6 no fishing. Okay. So you know, learning these 7 things along the way, those -- that wasn't an 8 official discussion or whatever, so when we 9 respond, we're going to respond to what you 10 have -- what you sent us.

11 And well, as you know, and as you 12 said, this is a really, you know, a difficult 13 situation that we are in. I will let Will 14 discuss the situation, but I did want to bring 15 that up, is all of a sudden, things change, but 16 people are talking, and you know, you could 17 look at it this way, or you could look at it 18 that way.

But that's the way to -- that's not the way to operate anyway, with us. And with that kind of situation. So I just wanted to bring that up.

3

4

1	MR. ARMOR: I appreciate that,
2	Kitty. Thanks.
3	MR. ANSON: Will.
4	MR. SWORD: Thank you, Mr. Chair.
5	(Foreign language spoken). I wanted to say a
6	few words today regarding the sanctuary and the
7	proposed closures, because we're the most
8	affected.
9	American Samoa has been part of the
10	U.S. since 1900. We signed a deed of cession
11	with the United States. We weren't conquered.
12	The United States came to us to sign the deed
13	to say so that they can have a coaling
14	station for the boats that fly between the West
15	Coast and Australia and New Zealand.
16	We were the place where the First
17	Marine Division jumped off to Guadalcanal and
18	to win that first battle in World War II in the
19	Pacific.
20	In 1952, the Navy left our islands.
21	They were the administrator since 1900. The
22	DOI came in in 1954. The first cannery

1	appeared in American Samoa, the Chicken of the
2	Sea cannery, 1961. The second one was built.
3	We were very happy. We had a lot of
4	jobs and things were going really great.
5	Today, we only have one surviving full cannery
6	in the United States. Remember, it started in
7	San Diego, Puerto Rico, and then we're the only
8	ones left.
9	We have been, and have been we
10	are and have been the third largest fishery in
11	the United States in terms of value. Only
12	behind Massachusetts and Alaska. So our
13	cannery ensures us the ability for our
14	government to provide good water, build roads,
15	harbors, and basic utilities to help the
16	people.
17	We didn't have that before. Our
18	fisheries allow highly paid federal workers,
19	like some of you in the audience, to perform
20	and negotiate in the Pacific international
21	fisheries arena using the path we provided by
22	our Pacific indigenous people and our

canneries.

1

2	In the U.S. wars and conflicts, our
3	Samoan people have led the charge. Have had
4	the highest percentage of per capital of deaths
5	followed by Guam and the Pacific Territories,
б	and Puerto Rico, and the other territories.
7	In every war since the Korean War,
8	we are patriotic and loyal the U.S., and always
9	at the front lines defending our adopted
10	country.
11	It's my country, it's your country.
12	But I feel that DOC and NOAA's Orwellian
13	mentality and strategies are killing us with
14	MPA's. Marine protected areas in the Pacific.
15	We thought our cannery would become useless to
16	this great country, and our underserved fishing
17	community suffers.
18	Fishing is our culture. It's the
19	land, farming, and fishing. So this has
20	administration's executive orders on equity and
21	social economic justice and goals, are really
22	rubbish if this sanctuary proposal goes

through.

1

2	It becomes a reality for there'll be
3	no commercial fishing, and our canneries will
4	not be there. We will have no ways to work for
5	a livelihood.
6	This top down approach to regulating
7	fisheries is wrong. This happened when they
8	started the sanctuary process and, Papul
9	Levasa, you'll find it true the first time they
10	came down, we had protests.
11	The last CCC meeting you saw
12	evidence of that in video. We protested
13	because it we didn't know this was coming,
14	just like Papul Levasa says.
15	You know, we're horrified that our
16	government is following the mentality of the
17	PRI coalition and the PU foundation. This is
18	top down management in fisheries.
19	These organizations really have not
20	helped us maintain our position in providing
21	fishing product fish products for the
22	country. This approach is contrary to the

1 Magnuson Stevens Act, where the bottom up 2 approach is mandatory. 3 The people decide. So many of us in 4 Samoa wonder what happened to the government of 5 the people, by the people, for the people. Where is it. It's a sanctuary process, it 6 7 seems. 8 But I want to show just up here on the wall, just bear with me please, a few 9 10 minutes. This shows the sanctuary, so the 11 polka dot areas that are in white there, it's a 12 Panera and -- blow it up a little bit, and 13 Holland Baker. That's where they plan to 14 close. 15 Now, Jarvis is where most of our 16 fishing was done. That was close. We didn't 17 hear too much about it. There were no 18 hearings. But that's where our purse seiners 19 But the two light ones there with polka fish. 20 dots, that's where we're talking about, 21 sanctuaries currently in the Pacific. 22 Keep -- the thing I wanted to point

out there as well, is that 51 percent of the Pacific EEZ is already closed due to Presidential orders. A few months ago, three governors, all three governors of all three territories signed a letter against the expansion of this marine protected areas, sanctuaries.

8 We have to this date, not gotten a 9 These governors. Well, let's show response. 10 the next one, please. The tuna industry to 11 American Samoa, so this slide presentation is a very short one, I mean, you've seen it before 12 13 because this was at the sanctuary, but a very 14 short version of it. Next one, please.

So the elapse closure, they started closing the -- this is the effort limit area for purse seiners without asking us. This is what NOAA did. So now we're stuck. And the result of all this will show up here a little later. Next slide.

21 So what happened was in 2022, when 22 they wanted to close all the international

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

5

6

7

1 fisheries to our purse seiners, our governor filed a notice of intent to sue against them. 2 3 Nothing has happened. Then we'll see in the Rarotonga commission meetings in December. 4 Next, please. 5 This actually shows NOAA's 6 7 statistics on where American Samoa is. We're number four because the other three are -- the 8 9 other two are New Bedford, Massachusetts, and We're number three when it comes to 10 Alaska. 11 total value of fisheries produced, well, 12 actually, because the other three are Alaska. 13 Okay. 14 So Alaska really is number one in 15 everything. And American Samoa is number 16 three. Anything goes wrong with this because 17 something was omitted in the Presidential 18 Orders, we're dead. Next please. 19 So who was in the Pacific, who 20 benefits from spatial closures. Japan, as 21 Kitty said earlier, gives a lot of their guota 22 to China. So China is the big, the big winner

in all of this. Forget Taipei, they're really pretty much our allies.

3 But China is the big winner in all 4 of these closures that's in the Pacific. Tf --5 I didn't show the slide, but all around the EEZ's in the Pacific, Chinese fishing vessels 6 7 are congregated, waiting for the pelagic fish 8 to come out and catch it, while our boats have 9 to compete with them. Where's the justice in 10 this? Next, please.

11 Impacts on shipping costs to 12 American Samoa. So we expect to have increase 13 because ships and boats visits to American 14 Samoa for fishing have declined. So basically, 15 what happens for us is that we get fairly --16 even in the middle Pacific, we get fairly cheap 17 cargo rates coming into American Samoa because 18 the containers are empty.

When they leave, it's all packed canned fish. So that really helps us. Now, the reduction in fisheries, closing of the canneries, is detrimental to this for us.

> Neal R. Gross and Co., Inc. Washington DC

1

2

1 Because 95 percent of the goods are imported in 2 American Samoa. Next, please. 3 The inflation, of course, is spiking more than anyplace else. And you know what, 4 5 the property rate in American Samoa is 50.7 percent. You're going to actually hurt them 6 7 Next, please. more. This is the birth rate on American 8 9 You can see that, you know, we leveled Samoa. 10 off in 2007, 2012, and then 2013, NOAA actually 11 had a delegation. The commission actually gave 12 away quotas and closed some of the fishing 13 areas. 14 You know what, this is a decline 15 that won't end for American Samoa. You don't 16 have people, you lose your culture, you lose 17 anything. We become irrelevant in that -- when 18 it comes to, especially to helping our national 19 security. Next, please. This basically is -- reflects also 20 the vessel visitation. This is all fishing 21 22 vessel, marine fishing vessel sales. You can

1 see in 2003, we were in the stars there, 28, 25 2 million gallons. 3 It was -- and in 2003, the first 4 monument started. Look where we're at now. 5 We're down at, right now from 28,000 gallons in 2004, we're down to 6 million -- I'm sorry. 6 7 From 28 million to 6 million gallons now. 8 That's a huge drop of revenue to the 9 government. 10 And the other thing is when it comes 11 to national security, we won't have any fuel. If we don't have any fishing, we won't have any 12 13 fuel for our military vessels that come in that 14 area to thwart China. 15 That's the way it looks. Next, 16 please. This is our ASPA slide that was at the 17 workshop. It basically shows that ASPA would 18 have to raise rates to customers. This is 19 people that are pretty poor already. To pay 20 their bills simply because one cannery closed in 2009 to the tsunami, and here's the thing. 21 22 When another -- that was Chicken of the Sea.

1 And then in 2004, another company 2 tried to take over. This is Tri Marine, that same cannery, but they couldn't make it work 3 4 because these damn closures in the Pacific were 5 killing the ability to provide fish for that 6 cannery. 7 You know, it's about production. 8 It's about catching fish for us. Anyway, ASPA 9 had to raise rates. Right now, we're paying 10 about 50 cents a kilowatt hour for our 11 electricity. It's probably worse in Alaska, 12 I'm sure. 13 All right. Next, please. So this 14 is an equation. Papul Levasa understands this 15 one, prepared by Taotasi, our former chairman. 16 It basically shows that when you have elapse 17 closures, you're closing off our purse seiners. 18 you're closing off the international waters 19 because of BBNJ. 20 The ocean monument's being done, the 21 sanctuary has being done. The 30 by 30 22 initiative, and increased cost because the

1 boats have to go further away to fish. This is 2 what happens. A U.S. purse seiner fleet fell 3 from about 40 plus in 2003 and they're 4 reflagged to our country, they're down to 11 5 now. U.S. purse seiners. Vessels fishing further east, they 6 7 don't return. 70 percent of lost fishing 8 vessel on U.S. caught fish is not being caught 9 anymore. Basically the policies of NOAA have 10 chased them away. 11 And we're finding no fish for the 12 cannery. When you see we're down to 6 million 13 gallons, that means no fishing boats coming in, 14 they have to import fish to keep the production 15 going. 16 And that cannery supplies really the 17 only place that the military, the U.S. military 18 gets it's protein from, it's fish. Canned 19 fish. 20 So this is what happens. Impacts to 21 our community are negative, and cannery shut 22 down is negative. Next, please.

1 Can you go back to the fuel, please, 2 go back just one more. Yes, yes. Right there. 3 You know, it's this curve, I'm an engineer. Ι like to see curves. I like to see positive 4 5 slopes and things. You know, I like to see it. This is a negative slope. 6 7 The policies that have been, and my 8 point is the policies that have been proposed 9 by NOAA and all of these stuff, has been 10 negative to our territory. And it's still 11 down. I think it's really important to note 12 that this is a key performance indicator for 13 how well our fisheries are being managed. 14 And I hate to show this, but this is 15 what makes it tough to do sanctuaries. It's 16 because the past management all the way from 17 2004 has been crazy. Crazy stupid. I'm sorry. 18 It's just that way. 19 You know, it's either we call 20 (foreign language spoken). Idiotic policies. 21 You know, the only people that benefit is 22 China. China benefits. When you close off any

1	commercial fishing, and therefore our
2	canneries.
3	I showed you that chart. You know,
4	so all I can say is nothing you're doing since
5	2004 is in the best interest of the U.S., or
6	the U.S. Pacific Islanders. You know, NOAA,
7	unfortunately, is the laughingstock of all the
8	SID's, the small island developing countries in
9	the area in the Pacific.
10	Hard to talk to them. They don't
11	want to talk to NOAA anymore. They should be
12	talking they want to talk to our fisheries
13	people in American Samoa because they want to
14	help.
15	It's us that are standing in the
16	way. They're taking our money. Well, that's
17	good. I'm helping them. You know, so the
18	policies, you know, by fisheries, NMFS does not
19	represent U.S. interest.
20	You know, I the last council
21	meeting, we swore in a couple of new council
22	members. And it reminded me of my oath to the

Neal R. Gross and Co., Inc. Washington DC

I

1 MSA, the fisheries. Need to speak up and talk 2 about this because if we don't correct it, most 3 of you sitting at the room, we're going to be in trouble. 4 5 I want to talk about the recent workshop in American Samoa and I want to thank 6 7 those that attended. We had the high chief, 8 Papul Levasa, John Armor, sanctuary Mariam 9 Goldstein of CQ, and Sarah Malloy, our acting 10 RA, among others. 11 And I got to admit that the people 12 were very kind as compared to the first 13 hearing, actually, they're very social. You 14 know, if this workshop were held in the 15 Northeast Coast, you would have had, probably 16 had riots. 17 But our people were pretty 18 controlled. I think it was very good. Don't 19 you think so? Yes. And I believe the 20 information we presented shocked our visitors 21 because they didn't see these charts. 22 Unfortunately, a lot of people --

some people before them contributed to this negative slope. But there is something that we came away from on this and I know Papul Levasa mentioned this to the governor in our after workshop meeting.

6 Number one, the cannery is important 7 to the U.S. and to the local population, being 8 the third largest of fishery value in the U.S. 9 Number two, the cannery relies on tuna from 10 Pacific Remote Islands. It's important that 11 fishing continues, commercial fishing 22 continues.

Number three, additional constraints like the elapse, it screws up the ability of the canneries to survive. Whether or not NOAA can rectify that, we'll see.

And number four, uncertainty abounds. We discussed that earlier. You know, when you omit things from saying the sanctuary and you're allowing it, you know what, that's uncertainty. That builds up a lot of consternation and concern amongst the people

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

who are affected.

1

2	And the other thing that's really
3	important is that, you know, the WCPFC, and I
4	think you mentioned that, it can give some
5	messed up results and I'll tell you, I've been
6	there. I've seen in 2013 at the commission
7	meeting, I've watched Russel Smith, the head of
8	delegation, go into the 11th hour on the final
9	day and give away our quotas, and give away,
10	you know, elapse, closures on there without
11	consulting the delegation.
12	You know, the head of delegation at
13	this commission meetings are all powerful. But
14	who's going to control them. And this is
15	something that's really bad. And I hope NOAA,
16	again, rectifies that. Because it's not fair
17	to us, especially to us that are affected in
18	this community.
19	He alone decided this, to give away
20	our quotas. And we were shocked. And we felt
21	betrayed.
22	Number five, what John said, which I

1 agree, there's a desire to diversify our local 2 economy. We -- fishery is our -- 85 percent of 3 our economy. That goes, we're dead. And then number six, everyone 4 5 desires a win/win scenario. So what is it. Τn my opinion, it's very tough because a lot of 6 7 the policymakers, and NOAA, I hate to say it, 8 is our PU employees. They have a different 9 approach to things. 10 But the community, you got to keep 11 in mind, is a community that should be deciding 12 things. Under MSA, it should be bottom up. We 13 got to remember that. 14 So what's the solution. For us, I 15 keep saying, and I know we had a meeting 16 recently with Belasi, with Janie. And I said, 17 you know, let our marine resources group, our 18 local guys who can talk to the other local 19 countries, to help us keep our cannery going. 20 Build an alliance with our neighbors so we can 21 rebuild what we -- what you can see here is a 22 dying, it's a dying fishery.

I	2
1	Then, maybe then, our fisheries will
2	stop being a laughingstock in the south in
3	the Pacific. You know, I believe in
4	statistics. That gauges I'm from the private
5	sector. I used to work government.
6	But it gauges how well you're doing.
7	Negative slopes indicate bad performance. We'd
8	like to see positive slopes. We'd like to see
9	fishing thriving and total tonnage doing
10	better.
11	Is it possible? Yes. I think so.
12	NOAA is part of Department of the U.S.
13	Department of Commerce. That can be done.
14	Especially for our small fishing community.
15	We should follow the national
16	seafood strategy and think twice before doing
17	things to ruin our economy, and especially the
18	canneries.
19	This is key in addition to
20	continuing our commercial fishing in the
21	Pacific Remote Islands. The bottom line is
22	NOAA, USDOC, must find a more robust economic

1 alternative for American Samoa before you shut 2 down our fishing and create more MPA 3 sanctuaries, closed areas. You know, we're already protected 4 under MSA and you know, but we don't need this 5 uncertainty. And I hope that, Papul Levasa, 6 7 that you will get rid of that soon because I 8 think that our government and our people cannot 9 accept no commercial fishing. 10 Thank you very much for indulging 11 me, Mr. Chair. MR. ANSON: Thank you, Will. Sobering 12 13 information there and a passionate plea for 14 your voice to be heard. You want to take say 15 something? 16 MS. COIT: I just want to thank you, 17 too, Will. Will, thank you. I think you're the 18 right person to be the Chair right now, and I 19 know I speak for John, too. We're really eager 20 to work with you to try to move things, move 21 the slope upward. Thank you. That was sobering 22 information and I appreciate you bringing it to us.

1

2	MR. ARMOR: Can I just, Will (foreign
3	language spoken), I really appreciate you
4	reiterating that information and you're right.
5	I just want to say in hearing that firsthand in
6	American Samoa from you and folks in the
7	community was incredibly impactful for all of
8	us that were in attendance. So I really
9	appreciated that and hearing it again here was
10	equally as powerful, so (foreign language
11	spoken).
12	MR. ANSON: Is there any other
13	discussion or questions for John? I don't see
14	any more. Thank you, sir, for coming and staff
15	for coming, appreciate it.
16	MR. ARMOR: Roger that. Thanks for
17	having us and look forward to hearing your
18	input on the guidance. Thanks, everybody.
19	MR. ANSON: You will, yes, thank you.
20	Getting back onto the agenda here, again things
21	have shuffled around quite dramatically, but
22	where we are as I see it is that we're in the

CCC Subcommittee Updates, which was scheduled for 1:30-3:00 p.m. time block as the original agenda had indicated. Next up we will have Dr. Lisa Hollensead from Gulf Council Staff with the Habitat Work Group.

Then we're going to skip over 6 7 because we previously coordinated for the Area Base Management and Scientific Coordination 8 9 Subcommittee Meeting, those reports to be 10 provided later on around the 4:30 to 5:15 block 11 later today. After Dr. Hollensead will be Ms. 12 Muehlstein, and then David Witherell and Bill 13 Tweit's CMOD workgroup, and then Miguel Rolon's 14 EEJ workgroup after that. Dr. Hollensead, are 15 you on? 16 DR. HOLLENSEAD: Hi Mr. Chair, can 17 you hear me? 18 MR. ANSON: We can hear you well, 19 thank you. 20 DR. HOLLENSEAD: Thank you. The 21 report that I have from the Habitat Working 22 Group is just an informative report. If you'll

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

recall, back in May I went over a draft agenda that the workgroup was going to be working on for their in-person meeting. That will be January 17-18, 2024 in La Jolla, California. We've already reserved some meeting space and have gotten some folks to begin booking reservations for that, so that is all moving forward.

9 The group met in mid-September to 10 discuss the agenda a bit further and to get 11 consensus from the group on what we'd like to 12 speak about at the meeting, and certainly 13 addressing the CCC's directive for the meeting. 14 Day 1 will include a meeting topic for habitat 15 science discussions similar to the meeting that we had back in Portland in 2019. 16

We decided to delegate out within the group topic leaders that will help lead the discussions, prepare any of the background materials, and then organize the presentations for the group and the discussion outlines. This is all outlined here, and this is coming back

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

5

6

7

again from our meeting in September. These topic leaders have met, they've discussed the agenda a bit more and then reported back out to the larger group to get consensus on the agenda.

The second meeting topic will be 6 7 climate challenges in EFH designations meeting 8 up there with the topic leaders, as well, with 9 some of those sessions objectives. That will be 10 Day 1 of our workshop. Continue scrolling down 11 for Day 2, we will be having discussions on 12 climate change and EFH consultations, as well 13 as habitat and climate scenario planning, as 14 well. So we've got some session objectives and 15 some highlights there for each of those topics for the CCC's review. 16

At this time, if any CCC members have any questions or comments that they would like me to pass along with the group, our next meeting will be November 20th, excuse me, 30th. During that meeting, we'll also finalize anything for the agenda, but largely that has

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

1	been done. In case there is a government
2	shutdown, we will have mostly all of our agenda
3	handled and ready for the meeting in January.
4	Certainly I would open the floor to
5	any comments or questions from any members of
б	the CCC at this time. Thank you, Mr. Chair.
7	MR. ANSON: Thank you. Are there any
8	comments or suggestions as Dr. Hollensead had
9	suggested that she would be happy to hear from
10	any of the CCC members? I'm not seeing any, so
11	in that case, Dr. Hollensead, thank you very
12	much for the report. We appreciate you staying
13	on.
14	DR. HOLLENSEAD: Thank you, Mr.
15	Chair.
16	MR. ANSON: Next that will take us to
17	Ms. Muehlstein with the Communications
18	workgroup report.
19	MS. MUEHLSTEIN: Thank you, Mr.
20	Chair. I think we're going to pull upI made a
21	quick presentation to complement the background
22	document that you guys all have. It's thinking

1 about it. Okay, here we go. I don't totally 2 need a clicker. You'll figure it out. I have 3 faith in you. I am here to represent the 4 Communications group and if you want to go 5 ahead and move to the first slide.

We are proposing a two or three-day 6 7 in-person meeting in the Caribbean region for 8 next year. Just a little bit of a reminder as 9 to why we're here. Our group did actually meet 10 early this year. We don't typically meet this 11 many times in a row. We usually take a couple 12 of years in between. I presented a report of 13 our meeting during the spring CCC meeting, and 14 the CCC at that point directed our group to 15 plan for a meeting and seek approval during 16 this meeting, so here we are.

I am going to present to you today some proposed meeting topics, and I'll weave in the rationale for why we think next year is an appropriate time to meet, even though it's in quick succession. Next slide. These meeting topics that we're hoping to start working on

233

were both suggested by the CCC itself at the last meeting and also by the Communications group. The first big thing that we're hoping to tackle is the 50th Anniversary of the Regional Fisheries Management Councils.

As you guys know, that's happening 6 7 in 2026, so it's a couple of years away. But 8 depending on the scope of that celebration, 9 we're probably going to need quite a bit of 10 lead time in order to accomplish something. 11 We've had some internal discussions, and I 12 myself have had some thoughts about what this 13 50th anniversary might look like. I think the 14 Council process and our accomplishments on a 15 national scale are something we should be 16 really proud of.

I think this could potentially be a really great opportunity for us to display to the nation why the Council system is really important and also to tell the narrative of some of our successes. That can look like a number of different things. We can do that in

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

publications, we can do that in some combination of video-type things. We could also do it by hosting an event, maybe during the CCC meeting in the appropriate year in DC so that we are hosting the proper people in the proper venues to display the things that we are proud of that we have done in the Council system.

8 We'd like to get that started, 9 because as you know, hosting something like 10 this, whether it be an event or some sort of 11 large publication, is probably going to take a 12 little bit of time, especially since this is 13 what I would consider an extracurricular 14 activity on top of our normal operating stuff. 15 That's why we're looking at maybe tackling this 16 next year.

We would also probably as a part of this do some scoping with you all, with our CCC members, to try and figure out what it is that you guys envision as a proper 50th anniversary celebration. Next slide please. So we're also thinking about developing CCC hosting guidance

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

5

6

materials. We do this once every eight years. When the Gulf Council was called upon to host this year, we definitely had to do a little bit of groupthink about last time we did this, how did we handle this? We relied very heavily on some of the previous Councils and asked them for materials and things to make it easy.

8 What we're hoping to do is come up 9 with a repository of information, as well as a 10 guidance document. We've talked about having a 11 process calendar that will talk about if you're 12 the host Council in January, you start thinking 13 about the agenda. It wouldn't be like a 14 prescriptive document, but it would just be 15 some guidance so that when you are handed the 16 torch, you are also handed a set of potential 17 instructions or guidance for how to do it every 18 eight years.

With staff turnover and, I don't know about you guys, but my memory does not last eight years on a good day. With those things in mind, we're just hoping to make it

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

5

6

1	easier. I do know that the admin staff for the
2	Councils, the AOs, had talked about this at
3	some point. I think the idea here is that it's
4	time for us to maybe actually operationalize
5	something like this. Next slide please.
6	The next thing that we discussed
7	and this is a want, not a need, I will be
8	clear on thatis having some sort of
9	professional development training for all of
10	your comms folks. There's a lot of niche
11	trainings that can happen in communicating
12	science, maybe communicating directly with the
13	news media. I know myself, I am the public
14	information officer for the Council but I have
15	very little direct media training.
16	The idea that maybe rather than all
17	of us participating in a la carte professional
18	development opportunities, getting us all
19	together and having that professional
20	development happen at one time might be a
21	pretty appropriate way and efficient way to do
22	this. I will note here that if we do engage in

some sort of communicating science, you're about to hear, and I'm sorry to be a spoiler, from the CMOD folks that there might be a skills session that's part of the CMOD, but that would be focused on Council members and training Council members about communicating science rather than your actual science communicators.

9 But we might be able to get some 10 sort of BOGO deal from somebody who might be 11 appropriate to come in and do it on a level for 12 the Communications staff and then maybe do it 13 on a secondary level for the CMOD if you guys 14 find that appropriate. Next slide. The final thing that we had to pitch to you guys is the 15 16 idea of what we want to do with our CMOD and 17 our fishery forum materials. We had heard some 18 desire and some conversation about maybe 19 turning the Council motion session from CMOD 20 last year into an infographic that would then 21 be sharable throughout all the Councils and be 22 helpful for all Council members as a Council

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

5

6

7

1

member training.

2	We also heard that there might be
3	some need for developing an infographic that we
4	can all use that details the Council process
5	and how an issue might move through Council
6	management. Then we've also heard some chatter
7	about wanting to archive fishery forum
8	materials on fisheryCouncils.org. Since
9	Fisheries Forum has gone away, there's all
10	these great resources and just this idea that
11	maybe we should be the ones that are archiving
12	that rather than just letting them disappear
13	into the ether.
14	With that, I think that's my final
15	slide. I do have some questions that I'm hoping
16	to get clarified from you guys today. First and
17	foremost, can we begin to plan this meeting for
18	next year? Second, which meeting topics would
19	you like us to prioritize? Are there any extra
20	things that I didn't pitch that you would like
21	to be addressed if we do indeed move forward

22 and have this meeting.

1	Then finally, this budgetary
2	question of if we end up doing the professional
3	development as a group, it might be helpful for
4	us, if that's something that you do support,
5	for us to have a conversation about how that
б	would be funded, because those two things come
7	hand-in-hand. That would not be free, I think,
8	if we had a consultant come in. That's all I
9	have for you.
10	MR. ANSON: Thank you, Emily. Emily
11	has posed several questions to the committee.
12	Anyone want to address any of those questions
13	or provide some guidance? Miguel?
14	MR. ROLON: Yes. Question of the
15	question. I believe that we agreed to have the
16	Communication Group meeting, we sort of agreed,
17	but we need to confirm at this meeting because
18	we are going to beour Council is pro having
19	this Communication Group meeting in 2024. We
20	wanted to hear from the group whether do you
21	agree with that or not. Then the other thing
22	that we can do, not at this time today, but we

1	are going to communicate, Emily and Deanna,
2	with the group to see what topics you would
3	like to see addressed for the communications.
4	On a side note, the first time I met
5	Chris was several years ago, two decades ago.
6	That meeting was to train people working in
7	communication. At that time, we didn't have the
8	social network or anything. It proved to be a
9	very good meeting to introduce the topics. We
10	had people from Time Magazine and others
11	hearing those topics. That's the idea that
12	Emily is trying to convey to the group here.
13	The first question is do you as a group believe
14	that yes, we can confirm that the
15	Communications Group should meet in 2024?
16	MR. ANSON: So Eric?
17	MR. REID: Yeah, I would agree we
18	should move it forward. Part of EE&J is
19	communication, so it's a perfect time to move
20	it along, absolutely. My only question is how
21	many languages can you do it in?
22	MR. ROLON: Funny that you mention

Neal R. Gross and Co., Inc. Washington DC

www.nealrgross.com

1 that, because the other day we had a meeting in 2 the service region (phonetic) and it was well 3 received by everybody, the EEJ. It was Spanish, English and Vietnamese. It surprised me to have 4 5 the Vietnamese, but we have a large component in the Gulf area. The Communication Committee, 6 7 one topic that we would like to address is what 8 is it that we can do to move forward with EEJ 9 concerns or the EEJ goals and objectives? That 10 would be one topic that the Communication Group 11 would like to have there, and certainly one of 12 them is the best way to communicate. How many 13 languages, et cetera? 14 MR. ANSON: Go ahead, Dave. 15 MR. WITHERELL: Thanks, Mr. Chairman. 16 I just get from my perspective, the 17 Communication Group has provided a lot of very 18 important materials for the CCC and individual 19 Councils over the years. I support them 20 meeting. Every in-person meeting the group has, 21 we're always amazed by what comes out of that, 22 so I certainly would support that. Meeting

topics prioritized, I think all of them are important that you've laid out, and I would suggest that you touch on all of them on your agenda.

5 Extra items, I don't have anything to suggest. In terms of professional 6 7 development, I think all the Councils could 8 commit to providing the extra funding for their 9 person to attend a how to communicate and use 10 the media, however you put that wording. I 11 think the Councils would be all supportive. At least I know I would. Thank you. 12 13 MR. ANSON: Chris? 14 MR. MOORE: Thank you, Mr. Chair. I 15 agree with Dave on all points. Thank you. MR. ANSON: Anyone else have any 16 17 additional comments to what's been provided? 18 John? 19 MR. CARMICHAEL: Yeah, I support what 20 the others said, and I think good list of 21 topics. It's a lot, but you guys did an amazing 22 job getting through the topics that you had for

1

2

3

1 your last meeting. I remember being a little 2 skeptical, are you going to be able to get 3 through all this? But the group did a lot of advance work, it looked like. Emily, you really 4 facilitated that well, so I think you guys can 5 pretty much bite off whatever you need to. 6 7 MR. ANSON: Yes, go ahead, Trisha. MS. MURPHEY: Yeah, I was just going 8 9 to say the 50th anniversary celebration there, 10 I think that's really good. North Carolina, our 11 DMF just finished a 200-year anniversary, which 12 we did yearlong and had all sorts of --we ended 13 up with this jamboree where everybody came. My 14 point was, it really did give our division a 15 lot of recognition of all the things we do. I 16 think this will be a very good way to give 17 recognition to all the Councils. Thanks. 18 MR. ANSON: Dr. O'Keefe? 19 DR. O'KEEFE: Thank you. Just one 20 question. What would be the potential timing of 21 the meeting? 22 MS. MUEHLSTEIN: I think we've

discussed it happening sometime in the spring of next year, but I'm going to defer to Miguel because he will be the host Council for next year.

5 MR. ROLON: Yeah, we discussed that and we were thinking about spring. However, 6 7 when you look around the schedule of all the 8 Councils, it all depends how many people you 9 will have there. We only found June, from all 10 the Councils, June is the only one sort of open 11 for certain meetings. This is still an ongoing conversation, but we are shooting for spring. 12

Emily and Deanna will coordinate and certainly will communicate with every Council to make sure that we have the right time and date for the meeting. One thing for sure is the meeting would be Puerto Rico.

DR. O'KEEFE: Thank you, that's helpful. Somewhat selfishly, the document on how to host a CCC meeting would be really useful for us in 2025, so appreciate if the timing of the meeting had a document by the end

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

1 of 2024. Thank you. 2 MR. ANSON: Miquel? MR. ROLON: One last thing, Mr. 3 Chairman. Last year somebody was telling me 4 5 that we are going to have the 50th anniversary, and he asked me whether we would like to move 6 7 forward -- or not forward, but present the idea 8 of -- do you remember at the national 9 conference we had one or two, I remember? The 10 first conference--three, three conferences. I 11 don't know if the group would like to consider 12 that for the 50th anniversary. 13 Those conferences were really good. 14 We had a very good turnout of people who came. 15 We had -- we had lawyers, we had everybody and 16 his brother wanted to come. We still used the 17 books. In fact, I have some of them in my 18 office. That's something for the group, not 19 today, but to consider and Emily and I will 20 communicate with you in due time to see if 21 there is an opportunity for that. That's a lot 22 of work, so I don't think that anybody will

step up and offer to do that, but it would be really a collaboration if we decide to do something like that.

MR. ANSON: I was thinking the same 4 thing. It would be a lot of work and 5 potentially a significant cost, too, for the 6 7 Council or partnership, at least, with the 8 Agency. If there are any additional thoughts, 9 yeah, that might be something to inquire about 10 and get in touch with the staff and the Agency 11 to do. Emily? Any other comments to what's been 12 provided to address the questions? Emily, are 13 you satisfied with the information that's been 14 provided? Do you think it covers all the 15 questions that you had?

MS. MUEHLSTEIN: I'm absolutely satisfied, and I don't know what your guys' threshold for needing a motion is. I do have a motion that says that you guys say that it's okay, but we're going to double-check at this meeting. That would be my only leftover. My next question to you is do we need a motion, or

> Neal R. Gross and Co., Inc. Washington DC

1

2

1 does this conversation suffice as approval? 2 MR. ANSON: That was actually going to be my question to the group. I'm not sure. 3 Do the members feel comfortable going forward 4 with just the discussion, or do we need to have 5 a motion? I don't see anybody clamoring for 6 7 anything, so maybe we can just leave it as is. 8 I'm getting some thumbs up, and the record will 9 reflect that everybody was in agreement. Thank 10 you, Emily. 11 That will then take us, moving down 12 the list, the Council Members Ongoing 13 Development, CMOD, Subcommittee update. Dave or 14 Bill? Bill, you're up. MR. TWEIT: Thanks, Mr. Chair. I 15 16 think everybody here is pretty aware, but just the quick primer as to what CMOD is, because it 17 18 is a new endeavor for the CCC that we've now 19 given a test run, a first-time run. You've had 20 a report back from that. The goals of CMOD are 21 fairly basic, but very powerful and important. 22 Supporting ongoing professional development of

Council members and cross-regional exchange among Council members and Council agency and staff.

We've certainly found over the years 4 5 in Fisheries Forum and now the first CMOD, that there's just a tremendous amount of value in 6 7 allowing both Council members and Council staff 8 who don't have the opportunity to serve on one 9 of the CCC committees the opportunity for 10 networking, as well as offering just 11 professional development in topic areas that 12 are of real interest to the CCC and therefore 13 are of interest to all the nations' Councils 14 and the Agency.

15 Just a reminder that we go to great 16 lengths to make sure that CMOD is policy-17 neutral. I've been a couple times myself told 18 that you're getting into policy, just stay 19 neutral. Our facilitators have been really good 20 about that. That's extremely important, as 21 well, to make sure that we're exploring the 22 issues in a way that individual Council members

> Neal R. Gross and Co., Inc. Washington DC

1

2

can take their individual Council hat off or their advocacy hat off and just soak in both the information and the opportunity to network from the perspective of just their role as Council members.

Based on the success of our first 6 7 effort, the CCC has already approved a second 8 CMOD event, and that's what I want to focus on for the rest of this discussion. The CMOD 9 Committee--and thanks to all the members of the 10 11 CMOD Committee--the committee has done some 12 advance planning for a 2025 event. Both the 13 numbers and venues seem workable, but I want to 14 get everybody's reaction to that today. Costs 15 are obviously up a bit, but not a gigantic 16 amount, which is good news.

Same funding formula that we used the first time, if everyone approves, and that was certainly what we were hearing after the first one was that seemed to work. I believe the Agency has already committed their part, and I think all the Councils are anticipating

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

1 that. Each Council, again, and the Agency 2 funding travel for their own participants 3 really assists with keeping the overall costs of the next session down. The meeting location, 4 looked at several, but the one that seemed to 5 float to the top was Vancouver, Washington. 6 7 For those who aren't totally 8 familiar, eminently familiar with West Coast 9 geography, Vancouver is immediately across the 10 Columbia River from Portland, Oregon, guite 11 accessible from the Portland airport and is 12 really, in and of its own, offers a good 13 location. The Pacific Council does meet there 14 with some regularity and has some familiarity, 15 and North Pacific Council is considering 16 beginning to make use of Vancouver, as well, 17 when we have one of our lower-48 meetings. 18 We did, though, also cost out both 19 Phoenix and Las Vegas, but overall the 20 committee agreed that Vancouver offered the 21 most promising venue. In particular the North 22 Pacific Council staff were appreciative of if

we indeed endorse Vancouver as the venue, it will help the North Pacific Council manage costs on our end for overseeing it.

To the slightly larger picture here, 4 5 the theme--and this had been discussed at the previous CCC discussion--the theme is the idea 6 7 is to link this up with what we expect the SCS8 8 to be working over in advance of the CMOD, and 9 that is very much tied to our efforts to become 10 more climate-resilient, our collective efforts. 11 That is operational changes to harvest control 12 rules. We're expecting that to be a very meaty 13 SCS8, and we're expecting the proceeds from 14 that to be available in time for the next CMOD. It should function as a really great 15 16 opportunity to really link up science and 17 management as we're all collectively 18 confronting climate change.

19 These are complex issues. They're 20 hard to wrap your brain around, but if CMOD can 21 help focus on them, it should help the Councils 22 get up to speed a little bit faster on what we

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

www.nealrgross.com

can expect in the future as we begin to think about how to adapt our Harvest Control Rule Curve Approach to a changing climate and rapidly changing ecosystems and a more chaotic environment, blah-blah.

I think as most folks are aware, 6 7 there's usually two major components--well, 8 there are two major components to a CMOD 9 meeting. One is an overarching theme just to increase individual Council members' knowledge 10 11 and understanding. The other is to help build 12 skills, just basic Council members' skills. 13 This time, the committee is recommending the 14 skill training be effective communication of 15 complex management actions to stakeholders. 16 You've already heard a little bit from Emily, 17 as well, about how that dovetails with the 18 Communications Subcommittee Plan.

19 I'm really looking forward to that 20 because I have a devil of a time explaining 21 some of our agenda items to my spouse and to 22 good friends. If it can help me, that alone

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

1 would be a miracle. What we're then looking 2 for, what the committee is looking for today is 3 based on the committee's work and estimates of 4 costs, as well as proposal for location, and as 5 well the proposed both theme and skill 6 training, the committee is looking for a thumbs 7 up from the CCC on all of those.

8 Pending that, then the next steps 9 will be North Pacific going ahead and starting 10 with securing the meeting venue and we'll 11 conduct a solicitation for the facilitators. 12 Recall that the first CMOD was facilitated by 13 Katie Latonich and Kim Gordon, who were 14 formerly the nucleus of Fisheries Forum. But we 15 did that through just a single contract. It 16 wasn't an ongoing contract, so we'll need to 17 resolicit. Obviously I think the committee's 18 role in that will be essential.

19 The North Pacific Council will just 20 be in the position of actually acting as the 21 administrative, but the committee will be 22 working closely with the Council to review. The

1 committee's role will shift then once the 2 facilitators are chosen. The committee's role 3 will shift then to working with the 4 facilitators to actually begin to put a finer 5 point on both the theme and the skills 6 development and just how the whole CMOD will 7 flow.

Again, the committee's put in a lot of additional work since the last CCC, but this thing now has some pretty good bones and I think is ready for a final nod of approval or for suggestions for where the committee may have gone astray. Don't even try it.

MR. ANSON: Thank you, Bill. So everyone's heard the information. Anyone have any concerns or any comments relative to the proposed topics? Merrick?

18 MR. BURDEN: Yeah, thanks, Mr. 19 Chairman, and thanks, Bill, for the overview. I 20 guess thanks, Diana Evans, for leading the 21 charge in all of this. I'll just speak quickly 22 to the meeting venue. We consider the hotel to

1 be essentially our home meeting venue, so we 2 use it extensively. It's a very nice location, 3 nice part of Vancouver. I want to encourage you 4 all to embrace that location. 5 MR. ANSON: Any other comments? Yes, Dave? 6 7 MR. WITHERELL: Thank you, Mr. 8 Chairman. I just wanted to comment that the difficulty with Mr. Tweit trying to explain to 9 10 his wife a complex motion might be more a 11 result of; She just doesn't want to hear it, 12 Bill. 13 MR. ANSON: Thank you. 14 MR. TWEIT: That never occurred to 15 me. MR. ANSON: So similar to the prior 16 17 reports, I guess I'll look to the room. No motion, formal motion, but just a nod of 18 19 approval that what's been presented is 20 sufficient and satisfies the CCC members and 21 they can move forward and go ahead with 22 planning and such. So we'll go ahead and do

1 that. We are getting close to the schedule--2 MR. TWEIT: I'm sorry, Mr. Chair. I 3 neglected to mention that right now the committee is shooting for one of two time 4 5 periods in later April, either April 21-25 or the following week of April 28-May 2. If 6 7 anybody has any comments on either of those, it 8 would be good to get those to the committee. 9 Again, just thank you to the CCC for your 10 support for CMOD. I found in my growth as a 11 Council member the Fisheries Forum process was an incredibly important part of it, and I think 12 13 our ability as the CCC to offer that to current 14 Council members I think is a really wonderful 15 thing, so thank you all. 16 MR. ANSON: I participated in the 17 first one myself and received a lot of 18 information, and I thought it was very 19 valuable, too. I'm not a newbie either, but 20 having the two different topics like you've 21 got, a theme and the skill set, I think work 22 very nicely and provide a little bit of a

257

contrast and such. Yeah, I thought it was a very good process and I look forward to the next one. Again, we're coming up close to the break.

Just in order so that we can try to 5 maintain continuity for the rest of the day's 6 7 topics and their assigned time slots, we might 8 be able to squeeze in the last workgroup on the 9 list. Again, going back to the Area-Based 10 Management and the Scientific Coordination 11 Subcommittee once we return from break. That 12 would then be Miguel, the EEJ Workshop update? 13 MR. ROLON: Thank you, Mr. Chairman. 14 Since we are close to the coffee break, I want 15 to be quick. Just to remind the group, next,

16 the first slide? The EEJ, the main subjects are 17 to prioritize identification, equitable 18 treatment, and meaningful involvement of 19 underserved communities, provide equitable 20 delivery of services, and prioritize EEJ in our 21 mission work with demonstrable progress. This

presentation was put together by the Western

Neal R. Gross and Co., Inc. Washington DC

22

1

2

3

1 Pacific staff and our Council staff. Next? 2 The CCC already approved this 3 working group's terms of reference last year. Next? At the May meeting, we presented the EEJ 4 5 strategy following the public comment period that was conducted in 2022. Based on those 6 7 results in the comment period, it was 8 encouraging to see outcomes of applying EEJ 9 across the different regions. At this time, we 10 know that the regions are working on this at 11 different levels. Okay Mark? 12 The regional offices are working on 13 the implementation. As I said, they have 14 different strategies. As an example, in the 15 case of our regime, they're working with the 16 Gulf Council, South Atlantic Council and the 17 Caribbean. Recently we had a good meeting, the 18 one that we mentioned. Gary participated and 19 John and myself. And the first thing that we 20 wanted to do was to look at the necessity for 21 translating the documents that are available to 22 the communities.

1	The first meeting we had was a mid-
2	term (phonetic) meeting, put together by the
3	regional office. As I said, we had Spanish,
4	English and Vietnamese. This is important
5	because most of the people who receive this
6	impact, most of the time they do not understand
7	what the impact is because of the language
8	barrier. Next?
9	The development of the regional
10	implementation plan, the CCC requested a
11	national workshop to identify priorities for
12	each region and avenues to support the Councils
13	to achieve those priorities. Join efforts may
14	be made with NGOs such as the Environmental
15	Defense Fund, so the proposed workshop. The
16	title that they have for the workshop is "Best
17	Practices for Equitable, Just and Climate-
18	Resilient Fisheries."
19	We intend to do something similar,
20	but this workshop will occur next year, spring
21	or June, and it will be all paid by the
22	Environmental Defense Fund. It will be a two-

1 day virtual workshop. They encourage
2 participation of all Council region, NOAA
3 Fisheries and the Councils themselves. Next?
4 Each region will continue working on the
5 implementation of the EEJ strategy. At this
6 meeting we need to decide on the next steps
7 regarding the EEJ strategy. Next?

Just to refresh our memories, these 8 9 are the conceptual models, the next steps for 10 the EEJ. Conduct the workshop. Conduct a 11 multiregional and national workshop with staff from Councils and NOAA fisheries to discuss the 12 13 role of the Councils as partners for 14 implementing the NOAA Fisheries EEJ Strategy. 15 This model would require that the Councils and NOAA Fisheries staff have the same level of 16 17 engagement in workshop planning and attendance. 18 In other words, this will be a 19 partnership with NOAA Fisheries and the 20 Councils to make this a success story. Next?

22

21

Neal R. Gross and Co., Inc. Washington DC

The action items for the specific meeting, and

we mentioned it several times, is to see if the

group endorses the, not the implementation but the continuation of the working group to start putting together this workshop. If you all agree that the workshop would be a good idea to follow up, to continue, then the CFNC will work with NOAA Fisheries and the other Councils, of course to see if we can put this together.

8 We are going to use the EEJ Working 9 Group. Graciella or myself will be the chair of 10 that group, and we will knock on the doors of 11 each Council because we will have a list of the 12 staff members that work in the working groups. 13 At this time, the only thing that we would like 14 to hear from you is if you agree on having this 15 workshop next year. The workshop could be a 16 standalone workshop or it could be in coordination with the one of EDF, but it's your 17 18 decision. Thank you, Mr. Chairman. 19 MR. ANSON: Thank you, Miguel. Yes,

20 go ahead.
21 MS. DROBNICA: Thank you for your

presentation, Miguel. I just have a quick

Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

5

6

7

question, and please forgive me because I'm new here. Would both of these workshops be directed at Council members and staff, or I guess I'm unclear. Is the second one envisioned to be a broader public effort? If you could provide some clarification, that would be helpful. Thanks.

8 MR. ROLON: The presentation that was 9 provided by the Mid-Atlantic Council the last time that we discussed this was to have the CCC 10 11 workshop directed toward Council members, 12 constituents of each area, fishers, tribes, et 13 cetera. It would be a large endeavor at this 14 time. The EDF is following the same thing. They 15 are going to contact the scientists, the 16 managers and the people who have authority in 17 National Main Fishery Service and other ANCs, 18 and that will be the first part of the two 19 parts that they are putting together. 20 They will have this virtual

21 workshop. The outcomes of the virtual workshop 22 will be conveyed to the communities. They will

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

5

6

1 have staff that will meet with each area, the 2 communities of the area. So for example, in the 3 Caribbean, of course they are going to meet with the fisheries of St. Croix, St. Thomas, 4 5 St. John and Puerto Rico. They will have a back-and-forth meeting with them. This is what 6 7 we agreed in Washington is good for the 8 communities.

9 We want to hear from you if you 10 agree or not, what other items that you would 11 like us to put together. Our meeting, the CCC 12 workshop, will be a hybrid. It will be in 13 person and also--it will not be--well, it's not 14 planned to be 100% virtual like the EDF, but it 15 could be a combination. It will be up to you 16 really. Number 1, do you want to have the 17 workshop? And Number 2, whether you want to 18 combine our efforts with another NGO. 19 MR. ANSON: Bill? 20 MR. TWEIT: Thanks, Mr. Chair. 21 Miguel, I think along the lines of Angel's 22 questions, and I may just be making this into a

much bigger thing, but it feels to me like a national scale workshop would be as much of an undertaking almost on a very big subject that pulls in all of our stakeholders and probably more stakeholders than we normally pull in, would be as big as managing our nation's fisheries for or as a 50th celebration and this really big undertaking.

9 Is EDF committed to this spring, or 10 would they be willing to hold off? Because I 11 don't know how the Councils would pull off anything like that between now and this spring. 12 13 This is a huge amount of work. If there was an 14 interest in partnership, would EDF be willing 15 to wait and do something that would fit our 16 abilities and resources better for having something like this? A workshop like this? 17 18 MR. ROLON: If I may? Thank you, Mr. 19 Chairman. That's exactly the question that 20 we're discussing at this time with EDF. 21 Probably we may have to have two parts. We may 22 have a light workshop next year in the summer

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

5

6

7

in conjunction with them, and they're willing to do that partnership with us. We can have a combination of both. If out of that meeting we believe that we have to enlarge the goals, not the goals, but enlarge the endeavor of having this meeting, maybe in 2025, or later in 2024, that they're willing to do that, too.

You're right on the nail. We believe 8 9 that this is almost like having a national 10 conference again. If we are going to try to 11 have all the players, you're talking about 12 Western Pacific Islands, the Islands of the 13 Western Pacific, the Caribbean, the tribes in 14 the Pacific area. There's a lot of people 15 involved. Remember when we started discussing 16 this, we didn't know what the communities work. 17 Even the definition was kind of confusing. 18 More and more the scientists working

19 on this are giving us these are the communities 20 that we call communities that should be 21 addressed under EEJ. All that calls for a 22 larger meeting. Maybe we could do it between

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

5

6

here and December. I can work with this group and see what we can do so we can inform them the possibility of having a joint venture with them in 2024 and a larger meeting later on. We'll have more participation and more people involved.

7 Again, they're quiet, you're right 8 here but we are going to talk to NOAA Fisheries 9 to see how can we engage better with them? We 10 always talk about funding. If we are going to 11 be involved in this, the EDF is going to pay 12 100% for what they are going to have. In our 13 case, we probably would have to ask some of the 14 Councils who have NOAA Fisheries to help us with funding. Whatever we end up doing as a 15 16 national workshop using EEJ. 17 MR. ANSON: Follow-up, Bill?

18 MR. TWEIT: Thanks, Miguel, that's 19 really helpful. As you were talking, though, it 20 got me realizing I actually probably had a 21 bigger question. I don't know if it's just for 22 you, but I think maybe for all the members of

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

5

the CCC. EEJ is such a big hot issue right now. Is there a real risk to us of partnering with a single NGO and not also partnering, as well, with some umbrella indigenous peoples' organizations, and maybe also advocates at a national level for food security issues throughout the nation?

8 If we just did this just with EDF, 9 I'm beginning to think that could be a real 10 optics problem. They're great to work with as a 11 partner from an administrative point of view, and certainly they're great at generating 12 13 funding and all of that. They bring a lot of 14 strengths, but I start to get really queasy at 15 the thought that the Councils, on this big an 16 issue that's got so much attention, just having 17 one non-governmental partner.

MR. ROLON: We discussed that, too, because there are NGOs that might be interested, but the optics is also important. If we are going to do a CCC activity, we need to talk to the other ED's, which organizations

1 can be involved? I don't know them, especially 2 the ones in the west. I would rely on the other 3 executive directors to help me identify entities that might be interested in 4 5 participating in something like this. The proposal by EDF, they will do it 6 7 anyway because remember, these NGOs, they have 8 three-year, five-year commitment with their 9 budget. If they don't do it, they lose the 10 money or something happens. They are offering 11 this to us as an idea, but it doesn't mean that 12 we are going to do it that way. It's just one 13 avenue that they are offering to us. If we are 14 going to have a workshop like this, first we 15 need to identify, all of us identify the 16 objective very clearly. 17 The ANCs or communities represented 18 here should be there at that meeting. I, for 19 example, believe that there are a lot of tribes 20 in the West Pacific that are working on this 21 already. The regional offices of each area,

22 they already have a program, they have

commitment, they have people working on this. My goal will be to communicate with as many people as possible. Then I would send you an email especially to executive directors, this is where we are. This is the list of things that can be done.

7 Then when I get the feedback from 8 the executive directors, we'd probably have to 9 have a couple of meetings. From that pool of 10 ideas, we can probably refine what is it that 11 we can do in terms of a workshop. He said we can maybe postpone it, not for '24, but '25. 12 13 Personally, I would say well, let's see what 14 EDF does and then we can use that as a good 15 opportunity for learning what can we do. EEJ is very important. 16

People think that EEJ is something from yesterday. We have been working on that for 34 years. We called it something else. But anyway.

21 MR. ANSON: Dr. O'Keefe?22 DR. O'KEEFE: Thanks. Yeah, in terms

Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

5

6

www.nealrgross.com

1 of the timing, we were informed in our region 2 that the draft Northeast EEJ strategy would not be released until December or January, so we 3 really haven't seen what's planned for our 4 region. I don't think that I would be prepared 5 to identify an objective for a national-level 6 7 workshop by spring of 2024 any time before we 8 get our regional plan. Then it's probably going 9 to take some digestion of those regional plans 10 for everybody.

11 Just thinking about if EDF is 12 planning this anyways and wants to do that as a 13 separate effort, maybe there's some lessons we 14 could learn from them and let them go ahead and 15 do it. We can partner with them to the degree 16 that we're invited or want to participate. I 17 feel like trying to put on a national-level 18 workshop on this topic in 2024 is a pretty 19 aggressive timeline and it may result in not 20 really the outcomes that we would want to have. 21 That being said, Emily just gave us 22 an update that there's potentially something

1 big planned for 2025 for the 50th anniversary. 2 Maybe there's a way to marry these two things. 3 This is a big national strategy and roll it out in the 50th year of Fisheries Management. Maybe 4 5 that is something to consider rather than having multiple workshops at a national level 6 7 over the next two to three years, but maybe try 8 to think about combining some of these topics 9 in a little bit more of an integrated, 10 strategic way. 11 MR. ANSON: Miguel? 12 MR. ROLON: If I understand your 13 proposal--by the way, the anniversary is 2026, 14 but we can do that. We can use 2024, see what 15 EDF or anybody else and use that as an experience and encourage you to participate 16 17 also. It would be virtual. Then also the 18 regional offices. We're in communication with 19 our regional offices. They already have ideas. 20 At the December meeting, they are 21 going to give us a report where they are and 22 where they're going. Yours probably would be

first quarter of '24 we will have maybe an idea of each area where are we and we can discuss it better. But out of this meeting, then I want to hear from you. Do you agree that probably the best time would be 2025, maybe 2026 to have a large meeting?

7 By that time, we will be able to 8 have the strategies of each region implemented, 9 probably some of the players, they already have 10 implemented. What is the idea that the group 11 would like to have to move forward?

12 DR. O'KEEFE: Just a brief follow-up, 13 I don't want to speak for everyone, but I think 14 a little later, we would prefer '25, '26. But 15 coming out of this meeting, I think it would be 16 useful to convene the working group again and 17 get those meetings back up and running. I know 18 from our counsel we've had some questions of 19 can the working group get a meeting on the 20 books again and maybe have something to bring 21 to an update for the May '24 meeting and see 22 where we are with our regional strategies on

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

5

1

2	Who's received them, what are people
3	thinking about them? Have the working group
4	discuss where all the different regions are and
5	start bringing it back to this group, but just
6	get that working group effort up and running
7	again sooner than later.
8	MR. ANSON: Merrick?
9	MR. BURDEN: Yeah, thanks, Mr.
10	Chairman. Let's see, I've got a few thoughts
11	running through my head. One is, we've had
12	experience partnering with NGOs in our Council
13	and if done appropriately it works quite well.
14	I have a lot of respect for people at EDF for
15	past employment reasons. I think this could be
16	a good thing. At the moment, I'm torn between a
17	few different directions.
18	One is, if I think about how EEJ is
19	playing out in our Council, I feel this strong
20	inclination to work from the bottom up. We have
21	very specific concerns with our treaty and non-
22	treaty tribes, for instance, on the West Coast,

274

and those need to be handled very appropriately and delicately and a national level effort doesn't--I'm having a hard time squaring that, to start with that rather than lead from the region.

I'm following Kate here in thinking 6 7 that we just need to take a little bit of time 8 and put some more meat on the bones and decide 9 what we need as Councils before agreeing to 10 partner with a group like EDF. It might be a 11 good idea, but I don't feel like I'm there at 12 the moment. I don't know if that helps you, 13 Miguel, but maybe another reconstitution of our 14 EEJ committee and/or a discussion among the 15 EDs, just put some more flesh to the bones. I 16 think that would be a good thing to do. 17 MR. ROLON: So Mr. Chairman, if we 18 all agree, the first thing would be to activate

the working group as soon as possible. The second is that EDF would be there, so if anybody wants to participate, fine. It would not be an official partnership with us at this

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

time. With that, that could be a product out of this meeting, if we all agree.

3 Then my job would be to move as fast as possible to get the working group together 4 5 and make sure that we have ideas and everything from each area to discuss the topics. Then I 6 7 can report back to you at the May meeting and 8 we can report on this. At that time, we will 9 have the strategies of each region finished and 10 some implementation. If we're all agreed, that 11 will be my task.

MR. ANSON: Everyone agree to what 12 13 Miguel has offered as a plan forward? Okay? 14 Nobody in disagreement? I don't see any shaking 15 of heads, so that sounds like the plan then, 16 Miguel. Yeah, go ahead and do that. All right, 17 great. That concludes the 1:30 to 3:30 session 18 that we had except for the two workgroup 19 reports remaining, and we will pick those up after our break. We will reconvene here at 20 21 let's say at 4:40.

22

1

2

(Whereupon, the above-entitled

1	matter went off the record at 4:22 p.m. and
2	resumed at 4:41 p.m.)
3	MR. ANSON: Ok, We will go ahead and
4	conclude the last couple of items on the agenda
5	for today, and that will take us to the last
б	two subcommittee updates that we did not
7	finish, and those are the Area-Based Management
8	and the 8th Scientific Coordination
9	Subcommittee meeting. The first one is Area-
10	Based Management Subcommittee, and that's going
11	to be presented by Ms. Michelle Bachman.
12	Michelle, are you there?
13	MS. BACHMAN: Yes, I'm here.
14	MR. ANSON: You can go ahead. We hear
15	you loud and clear.
16	MS. BACHMAN: Great. Thank you very
17	much. Thanks for the opportunity to update you
18	on the Area-Based Management Subcommittee's
19	work. I think at least a couple of subcommittee
20	members and our subcommittee chair are in the
21	room there, so they can certainly jump in, as
22	well, if they have things to add. Next slide,

please.

1

2	So at the May CCC meeting, I talked
3	with you about our report and some of the
4	analyses that we'd had done for us in terms of
5	the spatial work that Pacific States Marine
6	Fisheries Commission provided for the
7	subcommittee and we shared that report. After
8	that meeting, the Gulf Council staff took the
9	lead on preparing a press release, and we
10	worked with them on the details of that. I
11	assume everybody saw that, but there's just a
12	link here if you wanted a reminder or wanted to
13	re-read that.
14	Since that time, we've really been
15	doing a couple of things. A core group of us,
16	myself and Jessica Coakley from the Mid-
17	Atlantic Council and Dave Witherell from the
18	North Pacific Council spent some time over the
19	summer working on the manuscript that we are I
20	think going to be submitting this month. Just
21	given other work, we haven't quite buttoned

that up, and we obviously want to make sure all

www.nealrgross.com

the details are right. There's a lot of details in this report and in the manuscript.

3 I think we're pretty close on the text. We did get edits from many subcommittee 4 members, so that was really helpful. Really at 5 this point we're just doing final checks and 6 7 making sure that the details that we've put in 8 the tables--as you'll recall, we had 648 9 different managed areas that are part of the 10 inventory. We've grouped those into like areas 11 in the tables and making sure we're communicating accurately about gear 12 13 restrictions and describing those areas 14 effectively as we combine and condense into 15 tables has been the last check that we've been 16 trying to do.

17 That's on me, actually, to finish 18 cleaning those tables up and then we're going 19 to do one last check with the rest of the 20 subcommittee and then submit that hopefully in 21 the very near future. That's where we're at 22 with the publication. Obviously we'll continue

> Neal R. Gross and Co., Inc. Washington DC

1

to keep you updated on that and we'll share it if it gets accepted and is published eventually. Next slide, please? The other thing that we've been working on, as directed by the CCC at the May meeting, was having this web application built.

7 We had previously shared with you 8 the ArcGIS dashboard that Holy Cross, our GIS 9 contractor, prepared. A web application builds 10 an experience-builder, as we talked about 11 previously, has some advantages in that scales 12 to different screen sizes better. It allows us 13 to include a lot more text. We can have 14 multiple tabs showing multiple things. We did 15 over the summer extend our contract with 16 Pacific States Marine Fisheries Commission to 17 develop the application, so we basically just 18 appended that onto our previous contract with 19 them.

20 As of the time of putting these 21 slides together, we have a draft application. I 22 just grabbed some screenshots from that to show

3

4

5

1 you today. So essentially the components are 2 listed here. The homepage really provides a 3 concise overview of the project and a summary of our overall methods and approach. We have 4 5 some national results on one tab. We have the interactive web map on another tab, and that 6 7 lets you filter by Council region and get some of the details for individual areas and zoom in 8 and figure out where you are and how areas 9 10 overlap with each other.

11 That's based on the web map that the 12 contractor had already developed. Then we have 13 these individual area management tabs region by 14 region. We borrowed from that just a version of 15 the text that went into the report and also the 16 publication, and we tailored it for the app. 17 Then we have some links and resources for 18 further information. Certainly we can continue 19 to make a few tweaks to this.

I think we're looking to have any final edits or updates in the next eight to 10 days so that we can get the application

finalized by the end of the month, which is the end date that we have on the contract and what the contractor is planning for. Then we'll launch that and we'll be sure to share the link with everybody once it goes public. Right now it's on their GIS server, but it's behind a password with a username because it's still a draft.

9 If you go to the next slide, I can 10 show you some of what the app looks like. This 11 is just the landing page. It has this brief 12 overview. You can't quite see all the text. You 13 have to scroll, but this is some of what's 14 shown on the Area-Based Management webpage on 15 fisheryCouncils.org and just gives you an 16 overall sense of the project. Next slide. This 17 is just reminding folks that we did this 18 separate report and then has the national 19 results summary in terms of number of areas and 20 types of areas and aerial coverage of all the 21 areas that are in the inventory. Next slide? 22 This one would be best if we were

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

5

6

7

1 doing an interactive demo, but really how this 2 works is right now when you hit this landing 3 page, all of the Councils I believe are selected. You can toggle on and off the 4 5 different Council buttons on the left-hand side and you can select one or more Councils. The 6 7 graphics on the bottom will change in terms of 8 the conservation area summary and aerial 9 coverage by those three different conservation 10 objectives.

11 Then if you were to click on these 12 individual conservation areas, you can filter 13 the data and zoom. This is basically an 14 interactive way to view the web map. Next 15 slide? I just pulled the New England tab as an 16 example, but the other tabs are available in 17 the app, as well. This is just sharing, and you 18 can't see all the text here. You'd have to 19 scroll interactively in the app to be able to 20 see that.

It gives the data summary by gear type for year-round areas in terms of the total

Neal R. Gross and Co., Inc. Washington DC

21

1 area and then the percentage of the region. It 2 shows the static maps that we have in the 3 report and then it gives the narrative of fisheries in our region and how we use 4 conservation areas. Each of these narratives 5 and figures and tables are tailored for each 6 7 region. The subcommittee members have had an 8 opportunity to weigh in on this text, and 9 there's still, as I mentioned, some time to 10 continue to adjust this.

11 Certainly I guess I'd say 12 communicate with your individual subcommittee 13 member if you want to have a sense of what is 14 being shared in the app for your region and you 15 want to provide any detailed comments on the 16 text there. Then I think the last one maybe 17 shows the information page, if you go to the 18 next slide. We've got some different links in 19 here, links to the Council webpages, links to 20 where you can find fisheries regulations. Also a sense of how we evaluated 21

areas against the America the Beautiful

Neal R. Gross and Co., Inc. Washington DC

criteria, but certainly open to other ideas about links that we might have on this page. We'll, of course, on here direct people back to the fisheryCouncil.org page. We have that Area-Based Management section of that webpage and we can make sure that people are pointed there for any updates that we want to provide through that resource.

9 This long-term will be hosted by Pacific States Marine Fisheries Commission 10 11 through their GIS server, but it will be open to the public. Anybody can share a link to it 12 13 and we can host those links on our individual 14 webpages, I would think, and point people to 15 the application. I think that's about where 16 we're at with the project and with the 17 publication. I'm happy to take any questions 18 that you might have. Thanks.

19MR. ANSON: Thank you. We'll check to20see if anyone has any questions for Michelle.21I'm not--oh, we have one. Dave?

MR. WITHERELL: I don't have a

Neal R. Gross and Co., Inc. Washington DC

22

1

2

3

4

5

6

7

question, Mr. Chairman. I just want to give a 1 2 big shout out to Michelle and Jessica Cokely 3 from the Mid-Atlantic Council, who have put in enormous amounts of effort to get this thing 4 5 past the finish line. So I just want you to recognize those efforts. Thank you. 6 7 MS. BACHMAN: Thanks, Dave. 8 MR. ANSON: Michelle, thank you. 9 Thank you for your work and the team. 10 MS. BACHMAN: Great, and we'll share 11 this when it's published. 12 MR. ANSON: Yeah, we have--never 13 mind, we don't have a question, okay. 14 MR. REID: I was going to say what Dave said. 15 16 MR. ANSON: Okay, you were going to 17 echo that? 18 MS. BACHMAN: Thank you, Eric, for 19 your fearless leadership. Take care, everyone. 20 MR. ANSON: Thank you. You, too. That 21 will bring us to the next subcommittee update, 22 the 8th Scientific Coordination Subcommittee

Meeting, and that will be presented by Dr. O'Keefe.

3 DR. O'KEEFE: Thank you, Mr. Chair. I apologize, we lost Dr. Lisa Kerr, the SCS chair 4 5 in New England, as well as Dr. Rachel Feeney and the Council staff who have been working on 6 7 planning the workshop. Agenda changes and they were not able to attend late this afternoon. 8 9 Next slide, please. We are moving forward with 10 planning for the 8th National Workshop of the 11 Scientific Coordination Subcommittee. We chose a theme. The theme is 12 13 Applying ABC Control Rules in a Changing 14 Environment. We have selected dates and 15 location. The meeting will be held in Boston at 16 the Seaport Hotel, August 26-28, 2024. The 17 Seaport Hotel is a really great spot. It's a 18 lovely spot. I was shocked that we could get it 19 and afford it, to be honest. It's right next to 20 the Boston Fish Pier, which was established in 21 1910.

22

(202) 234-4433

1

2

We are working to facilitate a tour

1 of the building for the group when the meeting 2 takes place. Next slide please. The agenda is 3 currently under development. Again, the theme, Applying ABC Control Rules in a Changing 4 Environment. Some potential sub-themes, and I 5 will mention that the planning is occurring 6 7 with a steering committee that includes members of SSCs from all of the regions, as well as 8 9 staff from all of the regions. I think the 10 steering committee is up to about 30 people. 11 It's been a lot of input, but it's 12 working very well to really address all of the 13 different ideas from the different regions on 14 this larger topic. Potential subthemes include 15 changes that the regions have already 16 experiences and what can be learned from 17 management responses, noting and emphasizing 18 that not all changes are perceived as adverse. 19 There have been some beneficial changes that have been noted. Use of social science to 1) 20

22

21

Neal R. Gross and Co., Inc. Washington DC

understand the potential for control rules to

achieve management goals, and 2) how fisheries

and fishing communities can adapt to dynamic conditions.

1

2

3 Use of alternate reference points, indicators and analyses under data constraints, 4 for example, in the absence of analytical 5 assessments, which is a problem we face quite 6 7 frequently in the Northeast. Identifying 8 whether stocks are experiencing cyclic or 9 directional change in productivity and/or distribution to inform the setting of reference 10 11 time periods, stock status determination 12 criteria and rebuilding plans. These are big 13 buckets of subthemes under the overall theme. 14 Next slide, please?

15 For the workshop structure, the way 16 that it's being talked about now, including two 17 keynote speakers for broad perspectives across these subthemes. These keynote speakers may or 18 19 may not be from the US. We are looking at 20 potential international quests to talk about 21 experiences in other countries. Then within 22 each of those subthemes that I mentioned on the

> Neal R. Gross and Co., Inc. Washington DC

(202) 234-4433

previous slide, having some round robin sessions where members from each SSC can report on regional experiences, exploring case studies in-depth, using breakout sessions for some indepth discussion, and then reporting back to the full group in plenary. Trying to generate ideas for actionable next steps.

8 Really, the goal here is by the end 9 of the meeting to identify cross-cutting 10 outcomes through a synthesis exercise for all 11 of the subthemes. Next slide? The logistics 12 under development, as I mentioned, we have a 13 location, we have a date. We are developing a 14 budget for a three-day workshop. This most 15 likely will take the format of two and a half 16 days, but within those three days, the 24th-17 26th. We're aiming to be able to fund four 18 attendees from each region. This is going back 19 to how these meetings were held prior to COVID. 20 The SCS7 meeting was only able to 21 fund three attendees, but we're hoping to bring

it back up to four attendees from each region,

Neal R. Gross and Co., Inc. Washington DC

22

1

2

3

4

5

6

1	as well as members from NMFS Headquarters staff
2	and some local New England Council members.
3	This will allow for an in-depth discussion and
4	development of actionable recommendations. Our
5	target total participation and attendance,
б	about 60 people. We're trying to keep this at a
7	manageable number to address some of the
8	requests that the CCC had made on making more
9	actionable items out of these SCS meetings.
10	Once the subthemes are finalized, we
11	will continue on with planning and identifying
12	keynote speakers, presenters and case studies.
13	This will be conducted with Dr. Kerr, Dr.
14	Feeney, and that steering committee. Developing
15	the meeting format and timing, balancing
16	presentation with discussion. We are planning
17	for an in-person workshop with listen-only
18	webinar during plenary sessions. This worked
19	very well at the 7th SCS meeting in Sitka last
20	year. Next slide, please?
21	Responding to some of the CCC
22	tasking from May, Diana Strand gave a

presentation from the 7th SCS meeting, and the CCC talked about how the workshop conclusions could be shared with the CCC and the Councils in a manner that encourages the use of the recommendations. Trying to bring these two a little bit more actionable and not just scientific meetings that then there's a report out and not much further action other than shelving that report.

10 Ahead of the workshop, we're trying 11 to increase the engagement by the SSCs. This is the reason for this 30-member steering 12 13 committee, to try to get more people engaged 14 ahead of the meeting so that we can start 15 planning on exactly how we want to translate 16 case studies and presentations at the meeting 17 into actionable items for Councils. We're 18 trying to assign attendees more preparatory 19 work, identifying the case studies to present 20 and trying to do a little bit of homework 21 across the SSCs about why these case studies 22 are important, and planning time for regional

> Neal R. Gross and Co., Inc. Washington DC

1

2

3

4

5

6

7

8

discussion and final outcomes at future SSC and Council meetings.

3 This is something that SSCs haven't really taken advantage of. We finish the 4 5 meeting and then that's the end of it. We read the report when it comes out, but SSCs aren't 6 7 necessarily referring back to those reports in terms of usefulness for catch advice and other 8 9 things that SSCs do. During the workshop, the 10 group will try to develop actionable guidance 11 for SSCs on how to best support Councils, 12 managing fisheries with non-stationary systems. 13 That's right in line with the overall theme. 14 The bucket outcomes and next steps, 15 trying to understand who's going to do what and

16 when, and have a plan by the end of the 17 workshop of how to follow up, and allow time 18 for synthesis throughout the workshop. Just a 19 note that several SSCs are already engaging 20 ahead and thinking about how to engage 21 afterwards, but we're always looking for more 22 help and more ideas on how to really move this

> Neal R. Gross and Co., Inc. Washington DC

(202) 234-4433

1

forward. Next slide?

2	Following along in this theme, after
3	the workshop we want to distribute the work of
4	the final report-writing across different SCS
5	members so that we can have a report a little
6	bit speedier than past reports have come out.
7	We want to proactively report the outcomes and
8	don't assume that the report is read and
9	understood. We're trying to make this a
10	digestible report and ensure that people
11	understand what was done and what the next
12	steps could be.
13	Have the SCS prepare a summary
14	presentation to enhance dissemination of the
15	workshop findings and recommendations, so
16	really bringing this to Councils and to SSCs
17	rather than relying on them to take it up on
18	their own. Present outcomes to the SSCs and
19	Councils and potentially develop region-
20	specific recommendations. We want to encourage
21	continued discussion of the outcomes within the
22	regions.

1 We identified that we're going to 2 have continued staff and SSC time to support 3 the outreach dialogue and uptake after the meeting, which I think in the past has really 4 5 been isolated by the Council that is hosting the meeting, so we want to spread this effort 6 7 out. Then post all the presentations and 8 recordings on the website. What we're asking 9 for today is if the CCC has any other ideas for 10 improved use of the SCS recommendations other 11 than what we've identified here. 12 As Bill mentioned, one thing that we've already thought about is the synergy 13 14 between CMOD and the SCS meeting and tying the 15 themes together and really ensuring that this 16 SCS report is completed in advance so that it 17 can be used to inform the CMOD meeting in 2025. 18 I'm happy to take any questions. I'm happy to 19 bring any recommendations from the CCC back to the SCS. Thanks. 20 21 MR. ANSON: Thank you for the update. 22 Anyone have any recommendations? Bill?

1	MR. TWEIT: Thanks, Mr. Chair.
2	Thanks, Kate. Just a question first. In terms
3	of attendance, I think I heard you said that
4	the funding that's directed for this would just
5	support a limited number. Does that mean that
6	if Councils had some funds and wanted to send a
7	couple of additional either SSC members or
8	Council members over and above what you
9	suggested, does that mean that would work? Or
10	are you also really space-limited and trying to
11	do crowd management, as well?
12	DR. O'KEEFE: So that's certainly
13	something we could talk about. We were trying
14	to target a group size that would allow enough
15	participation from each region that it could be
16	covered under the budget, so we were targeting
17	four from each region. But also so that plenary
18	discussion and synthesis actually was
19	meaningful and that the group size didn't get
20	too unwieldy to really dig in and get good
21	results, but also have them widely dispersed.
22	It's a little bit of a balance. We

1	certainly could consider taking on more people
2	if the regions wanted to support it. One thing
3	that I think worked well in Sitka was that
4	there were some Council members there from the
5	North Pacific Council that were more of
6	audience attendees. They got the experience of
7	the meeting and didn't necessarily add too many
8	more folks to bog down discussion. So that's
9	certainly something we could consider is a
10	larger group in a little bit more of a listen-
11	only mode.
12	MR. ANSON: Janet?
12 13	MR. ANSON: Janet? MS. COIT: I don't even know if it's
13	MS. COIT: I don't even know if it's
13 14	MS. COIT: I don't even know if it's appropriate to comment since this is your
13 14 15	MS. COIT: I don't even know if it's appropriate to comment since this is your business, but I think Bill was at that meeting
13 14 15 16	MS. COIT: I don't even know if it's appropriate to comment since this is your business, but I think Bill was at that meeting in Sitka. One, I just want to endorse I think
13 14 15 16 17	MS. COIT: I don't even know if it's appropriate to comment since this is your business, but I think Bill was at that meeting in Sitka. One, I just want to endorse I think having Council members there, and I know Bill
13 14 15 16 17 18	MS. COIT: I don't even know if it's appropriate to comment since this is your business, but I think Bill was at that meeting in Sitka. One, I just want to endorse I think having Council members there, and I know Bill made comments. I've just heard a lot of

One, I just want to endorse I think having Council members there, and I know Bill made comments. I've just heard a lot of appreciation for having Council members at that
13 14 15 16 17 18 19 20	MS. COIT: I don't even know if it's appropriate to comment since this is your business, but I think Bill was at that meeting in Sitka. One, I just want to endorse I think having Council members there, and I know Bill made comments. I've just heard a lot of appreciation for having Council members at that meeting, so I just wanted to endorse that.

1 folks, say from the science centers who weren't 2 already there because they're part of an SSC. 3 But it just seems like some of what he presented about having more social science 4 5 and what we're investing in is relevant to this, which is relevant to the Councils and 6 7 that we should make sure that we coordinate so that we make the best use of some of what we're 8 9 investing in and what the SCS thinks is needed 10 and how that relates to management. I'm pretty 11 excited about it. DR. O'KEEFE: Yeah, thanks for the 12 13 comments. I failed to mention the steering 14 committee does include three NOAA 15 representatives, as well, so they've been part 16 of the planning for it and are informed. But 17 thank you, yes. 18 MR. ANSON: Any other--Bill? 19 MR. TWEIT: Thanks, Mr. Chair. 20 Thanks, Janet. You pretty much led into my 21 question of Cisco, and that is, does the Agency 22 have plans, either as part of the CEFI or just

1 regular work for uptake for the results from 2 this workshop? I think that might help me, at 3 least, think about other forms of dissemination. But if the Agency's thinking 4 about taking it up, I think that can be huge. 5 You all do a great job of disseminating. 6 7 DR. WERNER: Yeah, ever since the SCS 8 meeting in Sitka, we've been guite focused on 9 what has been coming out, particularly on this 10 topic of changing environment and next steps. 11 This one, I'll be sure that it's on our--more 12 than just on our radar to try to see how we 13 interact with what we were thinking and what's 14 coming out of here. The fact that some members 15 of the steering committee might be on both 16 sides, this is a really important opportunity, 17 so thank you. Thanks, Bill. 18 MS. COIT: And I think to your more 19 specific point, I think we can also help 20 disseminate outcomes, which I think was part of your question. 21 22 MR. ANSON: Any other recommendations

1 or comments about what's been proposed for the 2 next meeting? I'm not seeing any, so yes, Bill? MR. TWEIT: Given on both Cisco's and 3 Janet's answers, I think there's probably 4 5 enough federal folks on the steering committee already, but I think I would do some focus on 6 7 how we can both have our own Council-driven 8 dissemination but also really just leverage 9 that and take use of the synergy with the ways 10 in which the Agency can do it. It's 11 interesting, I think about some of the older SCSs that were just really internally focused 12 13 just for the SSCs themselves in just the last 14 few, particularly this last one. 15 Seems like each one of these is just 16 another evolution in terms of thinking about 17 how you provide the results to a much larger 18 world. This looks really thorough. You've 19 thought about a lot of things, and that's 20 really great. DR. O'KEEFE: Yeah, I'll just quickly 21 22 respond. I was previously on the SSC and I

1 attended Sitka as an SSC member. Dr. Lisa Kerr, 2 the current Chair of the New England SSC and I 3 were inspired at learning the experiences of other SSCs and regions on these types of 4 topics. That was a lot of the impetus behind 5 let's keep this going and make these really at 6 7 a national level so we can learn from each other and then disseminate the information. So 8 9 in complete agreement with, and we certainly 10 will leverage anything we can take and keep you 11 guys very much in the loop, so appreciate it. 12 MR. ANSON: Any other further 13 discussion? Seeing none, that will conclude the 14 subcommittee updates. That takes us to public 15 comment. Again, tomorrow we'll start with an 16 overview of the Fiscal Responsibility Act and 17 CEQs, proposed NEPA regulations. We'll do that 18 at 9:00, but we will jump into public comment. 19 I think we have one, a couple. First person for 20 public comment will be Bryan Randolph. 21 MR. RANDOLPH: I'll just stand here

then. My name is Bryan Randolph. I'm a resident

Washington DC

22

(202) 234-4433

of American Samoa, hence the shirt. I'd like to 1 2 make a short comment on the PRIA Sanctuary, 3 following up on Will's comments. We are a remote territory. I've spent most of my life 4 here in Washington, DC, and I can tell you it's 5 really hard to conceptualize what it's like to 6 7 be a five-hour flight from Hawaii and to refer to Honolulu as the mainland. 8

9 Living in American Samoa, the 10 Pacific is not just a concept or a fishery, 11 it's our front yard. It's as much a part of 12 where we live as the subway is to New York or 13 Maryland is to DC. We don't have a lot of 14 space. Our largest island is smaller than DC, 15 so the Pacific Ocean is part of where we live 16 and work. Fishing the Pacific is part of the 17 heritage and history of the Samoan and 18 Polynesian people dating back thousands of 19 years. But we all understand basic laws of 20 economics. Supply and demand requires supply. 21 A fishery we needs fish. We 22 understand ecology. Fisheries are delicate.

1 They need to be monitored and protected. I 2 don't mean to suggest we don't protect the 3 fishery. We can't survive without it, so we need it to be protected, but we also need it to 4 be accessible. It is protected in many 5 different ways, and as someone in this room 6 7 said earlier--I can't remember who it was--it's 8 not that protection isn't necessary. The 9 protection is already sufficient. The 10 protection is already there. 11 It's incredibly difficult to run a 12 fish canning business in a place that is as 13 remote as American Samoa. Energy is incredibly 14 expensive. Transportation is incredibly 15 expensive. Our access to this fishery is 16 essential, and we've been losing that access 17 for years and the tuna industry with it. My 18 hope is that we can find a way to do both, to 19 protect the fishery and guarantee the access of 20 the American Samoan market to the fish that it 21 needs to thrive way out there in the middle of 22 the ocean.

1	It really is a big part of who we
2	are, and without it, it will become very
3	difficult to survive. (Foreign language spoken)
4	to the CCC for all of your work and the time
5	and opportunity to speak to you. Thank you.
6	MR. ANSON: Thank you, Bryan, and
7	thank you for traveling that distance. Next
8	we'll have Drew Murkiewicz.
9	MR. MINKEVIC: It's Minkevic, but I
10	don't know what happened there.
11	MR. ANSON You were quick on that, by
12	the way, the correction.
13	MR. MINKEVIC: Yeah, it's not the
14	first time that's happened, nor will it be the
15	last. I'm an attorney based here in Washington,
16	DC, and I'm making comments on my own behalf. I
17	wanted to speak on the issue of the EEJ and
18	talk about something that I'vean issue that I
19	feel is being overlooked in the discussion on
20	that. That is access to this process for the
21	hearing impaired.
22	Fisheries Management and the Council
	(202) 234-4433 Washington DC

1 process is nearly impossible if you can't hear 2 or have trouble hearing. I don't say this 3 because I just watched Coda, good movie and all that, but I see it firsthand. I represent the 4 scallop fishery in the Northeast, and one of 5 our members on the AP just had to actually guit 6 7 the AP out of frustration because he is hard of 8 hearing. So many of the AP meetings now are 9 hybrid meetings where half the participants are 10 in-person, half are online.

11 He has to read lips to really understand people, and that's impossible when 12 13 people are coming in through the speakers. 14 Frankly, most of the NMHS presenters now don't 15 go travel to meetings anymore, they come in 16 remotely, so he misses all of those 17 presentations and a lot of the other comments. 18 It's also an industry where, frankly, a lot of 19 the participants work long hours around diesel 20 engines, so anyone that knows commercial 21 fisherman knows someone that's hard of hearing. 22 It is a real issue and I just don't

1	hear it being discussed with the EEJ concept.
2	It seems to be focused on a lot of other
3	things, which are important issues, too, for
4	sure. But this process needs to be accessible
5	to people who have problems hearing. That's my
6	two cents. Thank you.
7	MR. ANSON: Thank you, Drew. Next
8	we'll go to the online folks. We have Mellisa
9	Maktuayaq Johnson? We're trying on our end,
10	Mellisa.
11	MS. MAKTUAYAZ JOHNSON: Hello, can
12	you hear me?
13	MR. ANSON: We can hear you now,
14	Mellisa. Go ahead.
15	MS. MAKTUAYAZ JOHNSON: All right
16	(Native language spoken), my English name is
17	Mellisa Maktuayaq Johnson. I'm a Nome Eskimo
18	Community Tribal Member and (audio
19	interference) but I'm speaking on the EEJ
20	process. The laws providing diverse
21	representation is the actual MSA, where we
22	should have diversity in these management areas

and realize that it is up to the states for reappointment.

But where the Alaska Native tribes 3 make up 20% of the state's population, as only 4 5 one representative, there's a lack of sovereign tribal representation in the North Pacific 6 7 Fishery Management Council body. We support any 8 proposition of MSA reauthorizations, to include 9 majority voting of Alaska Native tribal seats, 10 realizing it may change the dynamic of the 11 outcome of the votes and decisions made if 12 permitted.

I would like to commend the current 13 14 and previous North Pacific Fishery Management 15 Council and AP members for having the 16 nomination process for a designated tribal APC. 17 Also, I would like to commend the motion that 18 was just carried at the October 2023 meeting 19 out by the North Pacific Fishery Management 20 Council for continuing to work and include ways 21 of incorporating our different local knowledge, 22 traditional knowledge and subsistence

> Neal R. Gross and Co., Inc. Washington DC

1

1	information into this management body.
2	MR. ANSON: Thank you, Mellisa. Thank
3	you for your comments. Next we have online
4	Matthew Seeley.
5	MR. SEELEY: Can you hear me okay?
6	MR. ANSON: Matthew, we can hear you.
7	MR. SEELEY: Thank you very much for
8	the opportunity to provide public comment. Good
9	afternoon, CCC members. Matthew Seeley, Senior
10	Manager with the Environmental Defense Fund on
11	the US Oceans Team. I also want to first thank
12	Miguel for bringing our workshop efforts to the
13	CCC's attention. Speaking on the EEJ workshop
14	that was brought up, EDF is developing a
15	workshop that focuses on identifying best
16	practices for equitable, just and climate-
17	resilient fisheries.
18	As Bill mentioned, these two major
19	efforts, EEJ and climate-resilient fisheries,
20	are very hot topics. We hope to streamline the
21	focus to ensure we appropriately prioritize
22	the needs of underserved communities and

307

(202) 234-4433

marginalized groups as we approach things like new species distribution and other adaptive fishery management policies.

EDF's efforts importantly are not 4 intended to replace the work by the CCC, but to 5 support your work, as well as the efforts on 6 7 the national strategy and those that are being 8 put forward on the regional implementation 9 plan. EDF has already been in contact with 10 staff from many of the regional offices and 11 science centers through coordination with the 12 national EEJ working group. We've also had 13 initial discussions with many of the Council 14 staff that are on the CCC's EEJ working group.

15 Ultimately, this workshop aims to 16 bring together social scientists, economists, 17 climate scientists, tribal liaisons and Council 18 staff to discuss and develop best practice 19 recommendations on how to approach EEJ and climate-resilient fisheries in tandem. 20 21 Ultimately, once recommendations are developed, 22 EDF plans to conduct surveys and interviews

> Neal R. Gross and Co., Inc. Washington DC

1

2

1 with fishery stakeholders to validate and/or 2 adjust these recommendations as necessary. 3 Ultimately, a final report will be made available to all of NOAA fisheries, 4 Councils and participants. As Miguel noted, the 5 workshop that EDF is putting on is tentatively 6 7 scheduled for Spring 2024. I just wanted to make sure that that information was out there. 8 9 Happy to answer any questions and appreciate 10 the opportunity for public comment. Thank you. 11 MR. ANSON: Thank you, Matthew. I 12 don't see any hands, so I'll just check with 13 Morgan. Do we have anyone else, Morgan, that's 14 either registered online or in the audience? 15 MS. COREY: No one else. 16 MR. ANSON: That concludes our public comment session. Thanks to everyone that 17 18 presented today and thanks for the 19 participation. We will go ahead and adjourn for 20 the day, but we will begin back here tomorrow 21 at 9:00 a.m., and again the overview of the 22 Fiscal Responsibilities Act and CEQ's proposed

1	need for regulations. Thank you.
2	(Whereupon, the above-entitled
3	matter went off the record at 5:18 p.m.)
